CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 31.
2. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
3. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
5. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
6. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
8. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
- *** 9. The total instantaneous diversion of water from all points of diversion under Transfer 5335 shall not exceed 503.21 cfs during the irrigation season.
10. Approval of Transfer 5335 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
- ** 11. Rights 31-00327, 31-00328, 31-00329 and 31-00330 when combined shall not exceed a total diversion rate of 200.00 cfs during the irrigation season, and may be diverted at their full authorized rate of diversion into Mud Lake for storage purposes during the non-irrigation season.
- * 12. Right 31-02289 is limited to irrigation of 160.0 acres in the place of use described above in a single irrigation season.
- * 13. Right 31-02290 is limited to irrigation of 240.0 acres in the place of use described above in a single irrigation season.
- * 14. Right 31-02297 is limited to irrigation of 340.0 acres in the place of use described above in a single irrigation season.

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5335

DATE: February 9, 1999

Transfer 5335 combines the groundwater rights of the Holley Water Users, Jackett Canal Co, and Owsley Canal company. These three companies have combined under the Owsley Canal Company name and will operate a single combined system.

The application identifies 34 points of diversion and a combination of the land lists evidenced under each company's SRBA claims or 24261.3 acres. The decreed rights are vague, while the licensed rights identify specific acres and limits. SRBA review of all these rights through the adjudication process will provide specifics and verify the validity of all of these rights.

Review of these rights found that Right 31-02317 was actually licensed in two parts with separate rates and priority dates. These rights were more accurately entered as Parts A & B on the database and the additional 8.08 cfs added to the total diversion rate under this transfer. Also, a combined limit of 200.00 cfs during the irrigation season was identified under Rights 31-00327/00328/00329 & 00330. Right 31-02259 was listed on the application, however this right was superseded by Right 31-00330. After making these adjustments, the total rate of diversion under these rights is 643.21 cfs limited to 503.21 cfs during the irrigation season and 5,000 af storage.

Season of use and diversion volume were adjusted to current standards where specific acres were identified. Recommended conditions include watermaster control, supplemental groundwater, irrigation overlap, measuring/lockable controlling works, right-of-way, permissible place of use, combined limits and standard transfer conditions.

PRE-IRRIGATION SEASON
PUMPING AGREEMENT

Department of Water Resources
Eastern District Office

THIS AGREEMENT, made and entered into by and between the undersigned parties, each of whom is entitled by virtue of valid appropriated rights of record to divert and use certain of the waters of Mud Lake, all within the boundaries of Water District #31, in Jefferson County, State of Idaho, for irrigation purposes,

WITNESSETH:

WHEREAS, the undersigned water users and water user entities constitute all of the persons and parties who are entitled by law to divert water from Mud Lake and apply the same to beneficial use upon their lands or to distribute the same for the beneficial use upon the lands of their stockholders; and

WHEREAS, such rights to the use of the waters of Mud Lake have previously been described and awarded by courts of competent jurisdiction in the following decrees:

1. A decree entered in the District Court of the United States for the District of Idaho, Eastern Division, in the case of Ernest Sauve, plaintiff, v. W. H. Abbott, et al, Equity No. 635, by the Honorable Charles C. Cavanah, United States District Judge, on November 1, 1930.
2. A decree entered in the case of the Owsley Canal Company, plaintiff, v. Ernest Bauerle, et al, defendants, Civil No. 1739, in the Ninth Judicial District of the State of Idaho, in and for the County of Jefferson, by the Honorable C. J. Taylor, District Judge of said Court on the 14th day of October, 1940; and

WHEREAS, during many years, commencing about 1960, shortages in the supply of water available from Mud Lake have occurred as a result of insufficient natural flow from its various tributaries, including both natural surface streams and sources described and set forth in the above-referenced Sauve v.

Abbott decree, and natural artesian flows from various wells as described and set forth in the above-referenced Owsley v. Bauerle decree; and

WHEREAS, during the years of such shortages, the water users and the watermaster of said Water District have developed the practice of causing the wells described in the Owsley v. Bauerle decree to be pumped prior to May 1, so as to augment the flows into Mud Lake in order to fill the lake and supply all of the rights to use of water therefrom; and

WHEREAS, such practice is the most practical method of insuring the filling of Mud Lake in the manner necessary to permit distribution of water in accordance with the maximum rights of the parties hereto; and

WHEREAS, the undersigned parties now desire to define in a formal manner, the details and terms of this Agreement and practice,

NOW, THEREFORE, for and in consideration of the mutual promises and conditions hereinafter set forth, the parties hereto agree as follows:

1. This Agreement shall become binding upon the execution hereof by all parties and shall extend through the end of the 1987 irrigation season, which is agreed to be November 1, 1987. This Agreement shall automatically renew on the same terms and conditions for successive five-year periods from November 1, 1987, and each five-year period thereafter, unless a party signatory to this Agreement or their successor in interest shall give written notice of election not to continue this Agreement to the watermaster of Water District #31 by October 1 of the year in which the five-year extension shall be scheduled for automatic renewal. All rights of parties under this Agreement shall thereupon terminate at the expiration of such five-year period.

2. The duly elected watermaster of Water District #31 of the State of Idaho, shall administer this Agreement, but shall have no obligation other than to exercise his best judgment in the determinations, decisions and actions he is required to perform hereunder.

AFTER Consultation with the Presidents of the ~~the~~ Canal Co's and IDAHO WATER USER ASSOC.

3. At such time as said watermaster shall, prior to May 1 of any year, notify the parties hereto in writing, each agrees to commence pumping his or its respective wells at his or its own proper cost and expense, at such rates as said watermaster may from time to time request, and allow the water pumped therefrom to flow by the usual means into Mud Lake to the end that said lake may be filled, prior to May 1 of each year, to such maximum height on the United States geological survey gauge located on Mud Lake at the mouth of Camas Creek, as said watermaster may determine is warranted by existing conditions.

4. The watermaster shall keep accurate records of all amounts of water pumped from the wells of the parties hereto prior to May 1, pursuant to this Agreement, and shall record the same as a separate item on the record kept by him known as the "Mud Lake Allotment Sheet," under the heading "Well Water Balances." All such amounts pumped prior to May 1, after deducting therefrom the amount agreed upon herein as the proper amount for transmission and storage losses, shall be credited to the account of the individual or entity doing such pumping, and such individual or entity shall be entitled, during the irrigation season, in addition to all amounts which may naturally accrue and which he or it might be entitled under the existing decrees to divert and use, all or any portion of the amount shown on said "Mud Lake Allotment Sheet" as a credit. It is agreed that because of the difficulty in making measurements of actual transmission and storage losses prior to May 1, the watermaster

3 - PRE-IRRIGATION SEASON
PUMPING AGREEMENT

shall deduct amounts determined by the watermaster to be necessary to compensate for transmission and storage losses. No credits for such amounts pumped shall be carried past November 1 of such year, whether or not all of the amount credited to any individual or entity was used during the irrigation season.

5. It is understood that said pre-irrigation season pumping shall be in lieu of any natural or artesian flows which may have occurred during the same period, and the parties hereto agree that each has a valid and existing right to engage in and continue the practice of pre-irrigation season pumping, as described herein, by virtue of the above-referenced court decrees, and having done so over a period of many years. No party claims any right other than or in addition to the rights set forth in said decrees and as further described herein, by virtue of this Agreement or other written or oral agreements made for the same or similar purposes in the past, or the actual practices in previous years. Each party hereto hereby releases each and every other party and the watermaster of and from any and all claims of every name, nature, and description, which may arise out of, or in the course of, the administration of or in compliance with this Agreement.

6. The provisions and stipulations hereof, shall inure to the benefit of, and shall be binding upon the heirs, executors, administrators, assigns or successors in interest of the parties hereto.

IN WITNESS WHEREOF, the parties have hereunto set their hands this 5 day of ^{MARCH}~~February~~, 1982.

ATTACHMENT TO, AND PART OF, PRE IRRIGATION SEASON PUMPING AGREEMENT

We the undersigned do hereby agree to pay our appropriate per cent cost of charges assessed by the actual billings of the following:

1. Power bill charges made to the sub pump owners of waters pumped and returned into Mud Lake due to high lake levels caused by pre season pumping.
2. Maintenance bills of above pumps for service, and parts to maintain said pumps.
3. The pumpers eligible for payment shall be Art Dobson, Jay Furness, and Blaine Park and Joe Marty.
4. All waters pumped, that are paid for by this agreement shall be credited to Mud Lake losses and evaporation and not for any individual or corporation credit.
5. Method of collection Pump owners shall pay said bills as charged. At the end of sub-pump season a copy of said bills with a copy of receipt of payment shall be presented to the Watermaster of Water Dist. #31, which in turn will be pro-rated and assessed by per cent as follows. The Watermaster would then return checks of proper amounts to pump owners.

Gentlemen:

We are enclosing for filing forty-one (41) claims on behalf of the Owsley Canal Company, together with checks in the amounts of \$20,000.00 and \$30.00 to cover the filing fee.

You will note that each of the claims except for two domestic claims, refer to a set of maps. Only one set of maps has been enclosed for all of the claims. We hope that they are satisfactory and adequate for the purpose. If you have any questions please do not hesitate to contact us at your convenience.

Thank you for your kind assistance with this matter.

Yours very truly,

Kent W. Foster

DESCRIPTION OF
EXISTING DIVERSION WORKS

The Owsley Canal Company diversions fall into four categories:

1. Diversions from Mud Lake in Section 1, T6N, R34E.

Water under all rights to the natural flows of Mud Lake and its tributaries, water diverted by the Bybee wells, and at times much of the water diverted by the North Lake wells, as well as water under all storage rights in connection with such sources, flows from Mud Lake through the main intake canal of the company to the main lift pumping station located just south of Highway 28 in the NW1/4NW1/4 of Section 24, T6N, R34E. There are four pumps at the main lift station, three 200 HP pumps and one 150 HP pump. The pumps lift water about seventeen feet and produce some 329 cfs of flow in the canal system. In addition some water is diverted through the Level Canal Company intake from Mud Lake in the SW1/4SW1/4 Section 34, T7N, R34E and then recaptured by means of a pump located on the south bank of said canal in the SE1/4SE1/4 Section 33 of said township and range for the irrigation of some two hundred acres of farm land. This is referred to as the Shively (tenant) or Staley (landowner) diversion.

2. Diversions of groundwater at the Bybee well field in Section 25, T7N, R35E.

When these wells were first drilled, the water flowed from them under pressure in the amount of about 200 cfs. Over the years the number of wells and the depth has been increased, and pumps have been installed to produce the 200 cfs. There are now eight wells with pumps. They range in depth from twenty-two feet to one hundred feet. There are six 100 HP pumps, one 75 HP pump and one 60 HP pump. Water from the wells is collected in a system of ditches with a large sump and discharged through a concrete and earthen structure into Camas Creek. It flows through the channel of Camas Creek to Mud Lake from which it is then rediverted as described above.

3. Diversions of groundwater at the North Lake well field in Sections 13, 18, 19 and 24 of T7N, R34E.

There are some sixteen drilled wells in this location, eleven are currently in use. Their combined maximum capacity is 197.66 cfs. The depth of nearly all eleven producing wells is one hundred feet. All but one of the pumps are 75 HP pumps; one is a 60 HP pump. These wells discharge into a system of collection ditches which feed a main ditch running in a generally southwesterly direction to a bifurcation structure in Section 34 of said township and range. From the bifurcation structure, water is either delivered south into Mud Lake for rediversion as described above, or in a southwesterly direction to the west lift pumps of the company, sometimes referred to as the "Sparks Pumps". This lift station is located in the

MICROFILMED

NOV 17 1992

SW1/4SW1/4 of Section 33, T7N, R34E where the water is lifted some fifteen feet into the Owsley Canal system.

4. Diversions of wastewater within the Owsley Canal system by means of subpumps.

There are twelve subpumps located strategically throughout the Owsley system for the purpose of pumping excess tailwater and subwater from irrigation of the lands back into either the canal system or Mud Lake for reuse. These are relatively smaller pumps ranging in size from 3 HP to 20 HP and lift water eight to eighteen feet.

STORAGE RIGHTS

IN

MUD LAKE

Under the federal court decree in the case of Ernest Sauve v. W. H. Abbott, et al., Case No. 635, entered November 1, 1930, the watermaster is charged with the responsibility of accounting for water stored in Mud Lake during the nonirrigation season on the basis of priorities to the use of the waters of Mud Lake and its tributaries during the irrigation season.

As a result of the drilling of wells which for many years resulted in the flow of significant amounts of water therefrom without the necessity of pumping, other court decrees have resulted which also impact such storage rights. Notable among such decrees is the one entered by the District Court of the Ninth Judicial District for Jefferson County in the case of Owsley Canal Company v. Ernest Bauerle, et al., Case No. 1739, on October 14, 1940.

By the early 1960's, most of such flowing wells had ceased to flow in average water years, either during the irrigation or nonirrigation season. Pumps were installed and in very recent years some wells have been deepened in order to provide the

MICROFILMED

NOV 17 1992

required amounts of water. Coincidentally with the increased number of groundwater diversions in the areas surrounding Mud Lake, wintertime flows from Camas Creek and the other tributaries have, in many of the past twenty to twenty-five years, been insufficient to fill Mud Lake.

In response to the need to fill Mud Lake during the nonirrigation season, for the benefit of all holders of natural flow and storage rights therein; a practice has developed of pre-irrigation season pumping from many of the same wells which are the subject of the Owsley v. Bauerle decree, as well as some other wells. The pre-season pumping has been done pursuant to an agreement entered into by all those who hold rights to the use of the waters of Mud Lake. A copy of the agreement currently in effect is attached hereto.

Claimant has made a claim for storage rights under each of its natural flow rights. The storage capacity of Mud Lake is only 45,000 acre feet, which is far less than the combined total of the potential storage rights of all holders of such rights. In addition to the limitations imposed upon such claimed storage rights by nature, by the size of the storage facility, by the applicable decrees of courts and the priorities provided therein, such storage rights have been and are presently subject to the practice described in the attached current pre-season pumping agreement.
