Dept of Water Resources

ATTN: Dave Carlson

RECEIVED

OCT 31 1994

Department of Water Resources
Eastern District Office

Dave,

This letter is in response to
your request for information about
Producers Irrigation Co.

Pump # 6 was updated in 1979.

Pump # 2 was updated in 1985.

Pump # 9 was put into service
in 1979.

In 1993, The USGS made 3
discharge and water-loss measurements.
These were done 3 June 93, 30 June 93,
and 6 Aug 93.

3 June :	Discharge -	75.47	cfs
	Streamflow -	67.40	cfs
	Loss	8.1	cfs

30 June :	"	"	59.58	cfs
	"	"	51.8	cfs
	"	"	7.78	cfs

6 Aug 93

Discharge -	72.8	cfs
Stream flow -	<u>64.8</u>	cfs
loss	8.0	cfs

The streamflow measurements were taken just above our first two points of delivery. The distance from this point to our final point of delivery is five miles. We assume we are losing 5-8 cfs more in this section of the canal.

Sincerely,

Michael D. Orent

Michael D. Orent
President
Producers Inn Co.

NOTICE OF ERROR
REPLY

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: March 9, 2001

Water right number: 31-2347, 31-10963, 31-2391, 31-10669

PRODUCERS IRRIGATION CO
C/O MIKE OVERTON

800 E 2886 N

MONTEVIEW, ID 83435

Daytime Telephone Number: (208)657-2529

Evening Telephone Number:

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

1. Number of total proposed CFS's.
2. Acres irrigated are 3355 acres, not 3270 acres
3. Priority date of 31-10669 is 6/22/53, not 8/7/62

2. Describe the changes you wish to make in the proposed recommendation:

We want 108.01 CFS

3. Give a brief explanation as to why you disagree with these portions:

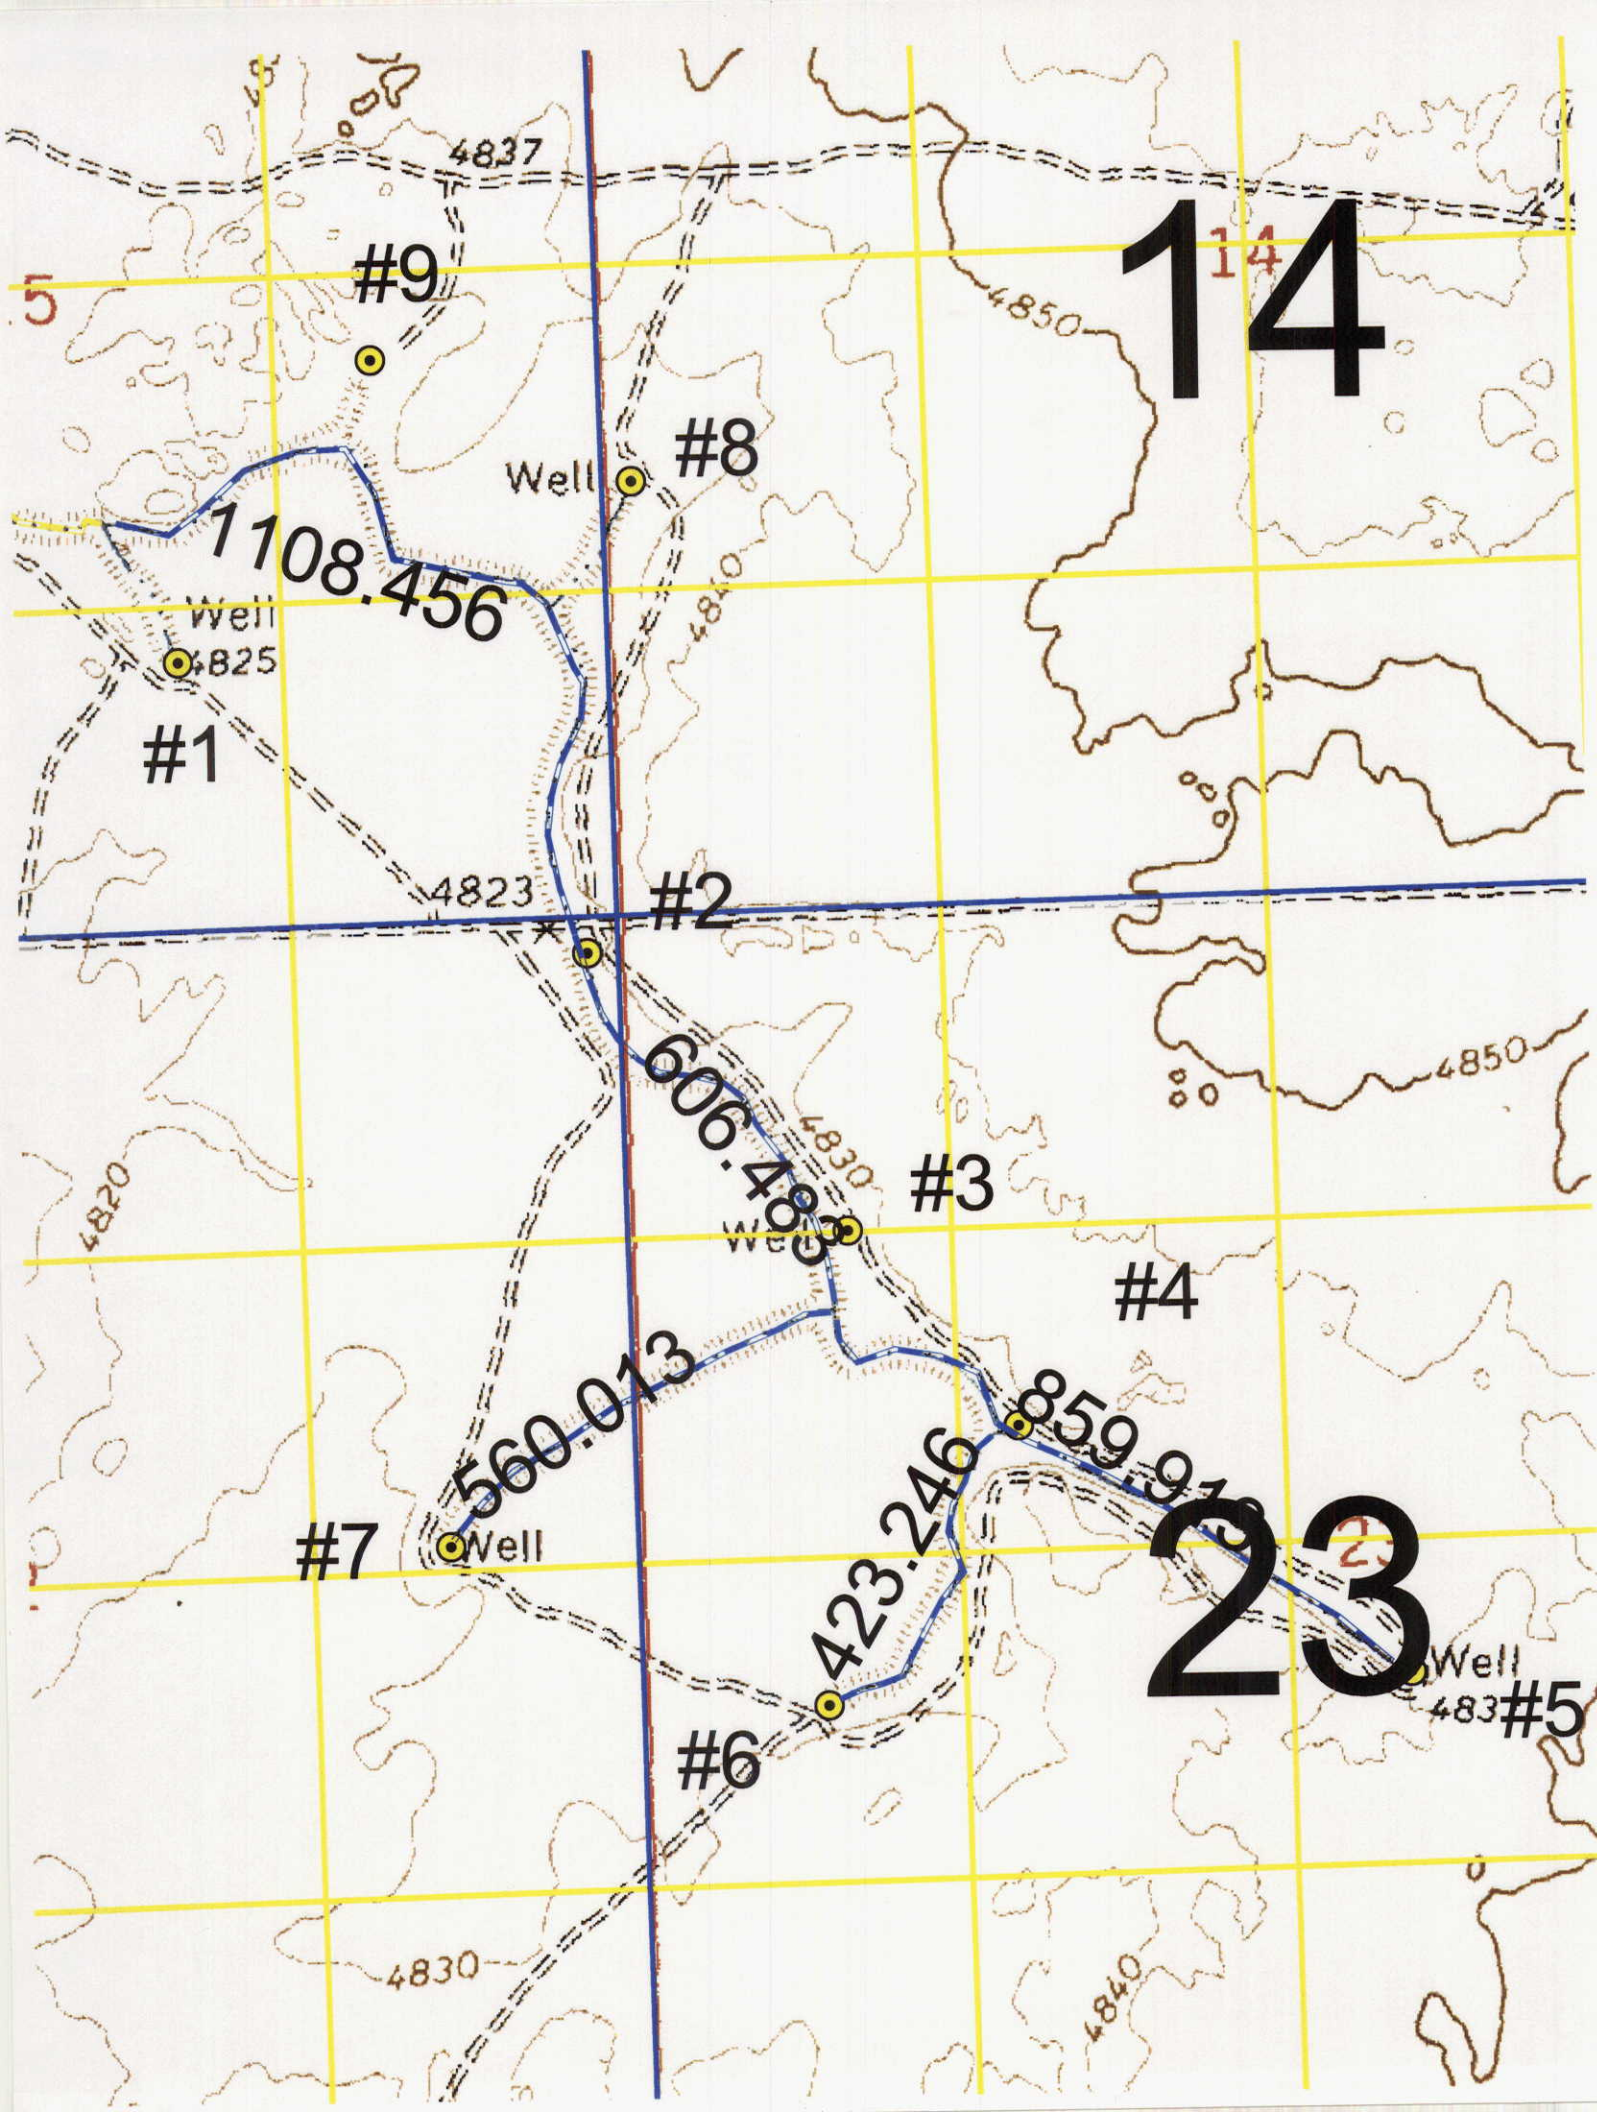

83.18 CFS is not enough water to supply our stockholders on every day of the pumping season.

☐ I AGREE with this proposed recommendation: no changes need to be made.

DATE: 19 ^{Mar} ~~Apr~~ 01 SIGNATURE: Michael D. Overton

3270 ACRES TOTAL

USE OF THIS RIGHT WITH THE RIGHTS LISTED BELOW IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 3270 ACRES IN A SINGLE IRRIGATION SEASON. ~~COMBINED RIGHT NOS. 31-02347, 31-02391, 31-10669~~ THIS RIGHT IS LIMITED TO THE IRRIGATION OF 2862 ACRES WITHIN THE PLACE OF USE DESCRIBED ABOVE IN A SINGLE IRRIGATION SEASON.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

THIS PARTIAL DECREE IS SUBJECT TO SUCH GENERAL PROVISIONS NECESSARY FOR THE DEFINITION OF THE RIGHTS OR FOR THE EFFICIENT ADMINISTRATION OF THE WATER RIGHTS AS MAY BE ULTIMATELY DETERMINED BY THE COURT AT A POINT IN TIME NO LATER THAN THE ENTRY OF A FINAL UNIFIED DECREE. SECTION 42-1412(6), IDAHO CODE.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

RIGHT INCLUDES ACCOMPLISHED CHANGE IN POINT OF DIVERSION PURSUANT TO SECTION 42-1425, IDAHO CODE.

RIGHT INCLUDES ACCOMPLISHED CHANGE IN PLACE OF USE PURSUANT TO SECTION 42-1425, IDAHO CODE.

THE FOLLOWING RIGHTS ARE ALSO DIVERTED THROUGH POINT OF DIVERSION DESCRIBED ABOVE: 31-02347, 31-02391, 31-10669

THIS RIGHT IS A COMBINATION OF OLD RIGHT NOS. 31-02324, 31-02325, 31-02326

call "C" and others call "i". In English units these coefficients are expressed as cubic feet per square foot per day or simply feet per day.

The following table of "C" values is from American Civil Engineering Practice:²⁵

<u>Kind of Material</u>	<u>Loss per Day</u> (in feet)
Cemented gravel and hardpan	0.34
with sandy loam	0.41
Clay and clay loam	0.66
Sandy loam	0.68
Volcanic ash	0.98
Volcanic ash with some sand	1.20
Sand and volcanic ash or clay	1.68
Sandy soil with some rock	2.20
Sandy and gravelly soil	0.33
Concrete lining	

The following table of "i" values is taken from the California Department of Water Resources Inspection Manual for use with the Etcheverry formula.

<u>Kind of Material</u>	<u>Loss per Day</u> (in feet)
Impervious clay loam	0.25 - 0.35
Medium clay loam underlaid with hardpan at depth of not over 2 to 3 ft. below bed	0.35 - 0.50
Ordinary clay loam, silt soil or lava ash loam	0.50 - 0.75
Gravelly clay loam, sandy clay loam, cemented gravel, sand or clay	0.75 - 1.00
Sandy loam	1.00 - 1.50
Loose sandy soils	1.50 - 1.75
Gravelly sandy soils	2.00 - 2.50
Porous sandy soils	2.50 - 3.00
Very gravelly soils	3.00 - 6.00

"C" and "i" are identical factors and the tables above could be used interchangeably to assist in assigning a factor for a described soil. Both of them use soil descriptions different from those now used in the National Cooperative Soil Survey. Some judgement is required in selecting coefficients.

RE: SRBA Claim No. A31-10669

Dear Mr. Verner,

Producers Irrigation Company was incorporated in 1954. From that time until present, no additional lands have been irrigated other than those lands covered by our state licenses.

We are seeking approval of the license in question by the reason of beneficial and historical use. This additional water has been used since the 1950's in order to adequately provide water for our company. The water requirements for flood irrigation of these lands has basically remained the same from the 1950's until present.

As you must be aware, our system's wells are close to five miles from the closest point of delivery to our system's land. (ie., a stockholder's headgate) Some of the farthest land irrigated is over ten miles from the points of diversion.

SRBA Claim No. A31-10669 was filed to cover the amount of water needed (above the licensed amount) to be pumped at the points of diversion in order to supply the licensed and needed amounts of water at the places of use. The transmission losses of our system from the furthest point of diversion to the furthest point of delivery has been estimated to be approximately the amount of water covered by Claim No. A31-10669. By using a discharge measurement (Encl #1) done 15 May, 1980 at a point approximately 3 miles below our points of diversion, we arrived at 87 CFS. By measuring the depth of our wells at that same time of year and knowing the capabilities of our nine pumps, it was estimated they could pump 109-110 CFS. This would show a loss of 22 CFS in the first 3-4 miles of canal. It was

MICROFILMED

APR 15 1994

POOR ORIGINAL

estimated that another 20 CFS could be lost in the many miles of ditch below the point where the measurement was made. (Encl # 1) Through the years, many attempts have been made to lessen this loss by using bentonite and ever re-channeling around extremely porous areas. Due to the numerous broken lava formations our canal goes through, water loss is hard to control.

As you can see, our measurements are crude at best. Producers Irrigation Co. has contracted with the U.S. Geological Survey to measure and monitor our system's streamloss, output, etc. This will proceed as soon as possible this year. We feel this information is vitally necessary to arrive at a concise figure on which to base the claim in question.

As far as the priority date of our claim, it was based on our earliest licensed priority date. Many people can testify to the fact that the system was basically fully in operation in the 1950's. The earliest recorded evidence at my disposal (Encl # 2) shows that 10 holes were dug and 8 wells in place 4 Nov., 1959.

I'm sorry this response is late. It wasn't until 8 March that I realized you were interested in our beneficial use claim. I mistakenly thought I was to verify our licensed claims and spent many hours on that endeavor.

If this response is not sufficient to move our claim forward, please let me know what more I have to do. I feel a very heavy burden dealing with these vital issues, as fifteen other stockholders are depending on me to do the right thing.

Sincerely yours,

Michael D. Overton

POOR ORIGINAL

Producers Irrigation Co.
800 E. 2886 N.
Montevideo, ID 83435

9 March, 1993

Eric Verner, Sr. Water Agent
Idaho Dept. of Water Resources
900 N. Skyline
Idaho Falls, ID 83402

MAR 12 1993

RE: SRBA Claim No. A31-10669

Dear Mr. Verner,

Producers Irrigation Company was incorporated in 1954. From that time until present, no additional lands have been irrigated other than those lands covered by our state licenses.

We are seeking approval of the license in question by the reason of beneficial and historical use. This additional water has been used since the 1950's in order to adequately provide water for our company. The water requirements for flood irrigation of these lands has basically remained the same from the 1950's until present.

As you must be aware, our system's wells are close to five miles from the closest point of delivery to our system's land. (ie., a stockholder's headgate) Some of the farthest land irrigated is over ten miles from the points of diversion.

SRBA Claim No. A31-10669 was filed to cover the amount of water needed (above the licensed amount) to be pumped at the points of diversion in order to supply the licensed and needed amounts of water at the places of use. The transmission losses of our system from the furthest point of diversion to the furthest point of delivery has been estimated to be approximately the amount of water covered by Claim No. A31-10669. By using a discharge measurement (Encl #1) done 15 May, 1980 at a point approximately 3 miles below our points of diversion, we arrived at 87 CFS. By measuring the depth of our wells at that same time of year and knowing the capabilities of our nine pumps, it was estimated they could pump 109-110 CFS. This would show a loss of 22 CFS in the first 3-4 miles of canal. It was

MICROFILMED

APR 15 1994

POOR ORIGINAL

estimated that another 20 CFS could be lost in the many miles of ditch below the point where the measurement was made. (Encl # 1) Through the years, many attempts have been made to lessen this loss by using bentonite and even re-channeling around extremely porous areas. Due to the numerous broken lava formations our canal goes through, water loss is hard to control.

As you can see, our measurements are crude at best. Producers Irrigation Co. has contracted with the U.S. Geological Survey to measure and monitor our system's streamloss, output, etc. This will proceed as soon as possible this year. We feel this information is vitally necessary to arrive at a concise figure on which to base the claim in question.

As far as the priority date of our claim, it was based on our earliest licensed priority date. Many people can testify to the fact that the system was basically fully in operation in the 1950's. The earliest recorded evidence at my disposal (Encl # 2) shows that 10 holes were dug and 8 wells in place 4 Nov., 1959.

I'm sorry this response is late. It wasn't until 8 March that I realized you were interested in our beneficial use claim. I mistakenly thought I was to verify our licensed claims and spent many hours on that endeavor.

If this response is not sufficient to move our claim forward, please let me know what more I have to do. I feel a very heavy burden dealing with these vital issues, as fifteen other stockholders are depending on me to do the right thing.

Sincerely yours,

Michael D. Overton
President
Producers Irr. Co.

RE: Extension of Time
Snake River Basin Adjudication

Dear Sirs:

This letter is in reply to a Request for Extension of Time for the Mud Lake Area Water Users.

I am granting your request for an extension until December 30, 1988. I urge you to make appointments with our Eastern Region office as soon as possible, because we will be serving Commencement Notices in Fremont County on December 9, 1988. The earlier you make your appointments, the less likely you are to encounter congestion from the Fremont County clients.

If you have any questions, please do not hesitate to contact any office of the department.

Yours Truly,

David B. Shaw
Adjudication Bureau Chief
