CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 31.
2. The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.
3. This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
5. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
6. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
7. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
8. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
- *** 9. The total instantaneous diversion of water from all points of diversion under Transfer 5335 shall not exceed 503.21 cfs during the irrigation season.
10. Approval of Transfer 5335 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
- ** 11. Rights 31-00327, 31-00328, 31-00329 and 31-00330 when combined shall not exceed a total diversion rate of 200.00 cfs during the irrigation season, and may be diverted at their full authorized rate of diversion into Mud Lake for storage purposes during the non-irrigation season.
- * 12. Right 31-02289 is limited to irrigation of 160.0 acres in the place of use described above in a single irrigation season.
- * 13. Right 31-02290 is limited to irrigation of 240.0 acres in the place of use described above in a single irrigation season.
- * 14. Right 31-02297 is limited to irrigation of 340.0 acres in the place of use described above in a single irrigation season.

FROM: Pam Skaggs^{CS}/State Office

SUBJECT: Transfer 5335

DATE: February 9, 1999

Transfer 5335 combines the groundwater rights of the Holley Water Users, Jackett Canal Co, and Owsley Canal company. These three companies have combined under the Owsley Canal Company name and will operate a single combined system.

The application identifies 34 points of diversion and a combination of the land lists evidenced under each company's SRBA claims or 24261.3 acres. The decreed rights are vague, while the licensed rights identify specific acres and limits. SRBA review of all these rights through the adjudication process will provide specifics and verify the validity of all of these rights.

Review of these rights found that Right 31-02317 was actually licensed in two parts with separate rates and priority dates. These rights were more accurately entered as Parts A & B on the database and the additional 8.08 cfs added to the total diversion rate under this transfer. Also, a combined limit of 200.00 cfs during the irrigation season was identified under Rights 31-00327/00328/00329 & 00330. Right 31-02259 was listed on the application, however this right was superseded by Right 31-00330. After making these adjustments, the total rate of diversion under these rights is 643.21 cfs limited to 503.21 cfs during the irrigation season and 5,000 af storage.

Season of use and diversion volume were adjusted to current standards where specific acres were identified. Recommended conditions include watermaster control, supplemental groundwater, irrigation overlap, measuring/lockable controlling works, right-of-way, permissible place of use, combined limits and standard transfer conditions.

MUD LAKE

Under the federal court decree in the case of Ernest Sauve v. W. H. Abbott, et al., Case No. 635, entered November 1, 1930, the watermaster is charged with the responsibility of accounting for water stored in Mud Lake during the nonirrigation season on the basis of priorities to the use of the waters of Mud Lake and its tributaries during the irrigation season.

As a result of the drilling of wells which for many years resulted in the flow of significant amounts of water therefrom without the necessity of pumping, other court decrees have resulted which also impact such storage rights. Notable among such decrees is the one entered by the District Court of the Ninth Judicial District for Jefferson County in the case of Owsley Canal Company v. Ernest Bauerle, et al., Case No. 1739, on October 14, 1940.

By the early 1960's, most of such flowing wells had ceased to flow in average water years, either during the irrigation or nonirrigation season. Pumps were installed and in very recent years some wells have been deepened in order to provide the

required amounts of water. Coincidentally with the increased number of groundwater diversions in the areas surrounding Mud Lake, wintertime flows from Camas Creek and the other tributaries have, in many of the past twenty to twenty-five years, been insufficient to fill Mud Lake.

In response to the need to fill Mud Lake during the nonirrigation season, for the benefit of all holders of natural flow and storage rights therein; a practice has developed of pre-irrigation season pumping from many of the same wells which are the subject of the Owsley v. Bauerle decree, as well as some other wells. The pre-season pumping has been done pursuant to an agreement entered into by all those who hold rights to the use of the waters of Mud Lake. A copy of the agreement currently in effect is attached hereto.

Claimant has made a claim for storage rights under each of its natural flow rights. The storage capacity of Mud Lake is only 45,000 acre feet, which is far less than the combined total of the potential storage rights of all holders of such rights. In addition to the limitations imposed upon such claimed storage rights by nature, by the size of the storage facility, by the applicable decrees of courts and the priorities provided therein, such storage rights have been and are presently subject to the practice described in the attached current pre-season pumping agreement.
