POINTS OF DIVERSION:

There are 8 wells referred to as the "Holley Wells". They all discharge into an open ditch which commences near the wells in the SESE § 26, SWSW § 25 and the NWNW § 36, T.7N., R.35E. The ditch proceeds generally south, crosses Camas Creek by means of a flume and then continues in a southerly direction to the place of use.

In recent years, wells have been drilled on a number of farms served by this system to provide for more efficient irrigation of the lands by means of pivot and other types of sprinkler systems. The 8 old wells, or some of them, do not need to be pumped nearly as much and the transmission losses through the ditch system have been substantially reduced.

Such additional wells have been drilled or are proposed by Carl Hoggan, Sterling Murdock, Sid Ashcraft, Robert Bybee and Ron Torgerson. Some have been approved and some have not. We have listed below all points of diversion for such wells, and those not yet approved have been designated "New":

PLACE OF USE:

The specific places of use to be irrigated from the proposed new wells are shown in PART 1, page 1, under No. 5. However, such places of use are included within the place of use for all the water rights of the Holley Water Users Association, so this application is really only for the purpose of adding points of diversion under the 2 groundwater rights of the company, 31-0331 and ³¹⁻⁰³⁷¹31-0332, and there is no proposed change in place of use. The place of use for Rights Nos. ³¹⁻⁰³⁷¹31-0331 and ~~31-0332~~ is as follows:

CONDITIONS OF APPROVAL

Transfer of Water Right Nos. 31-0331 & 31-0371

Transfer No. 3680

1. Use of water under this water right is subject to control by the watermaster of State Water District No. 31, Mud Lake and tributaries.
2. A measuring device of a type approved by this Department shall be installed and maintained as part of the diverting works.
3. The director retains jurisdiction of this transfer up to 5 years for the purpose of determining potential injury to existing rights, both junior and senior, and for the purpose of modifying the conditions of transfer approval as necessary to prevent such injury.
4. The cumulative rate of diversion and annual volume under Right Nos. 31-0331 and 31-0371 shall be appurtenant to the place of use so that each irrigated acre will receive an equal portion of water from the same source identified under both rights. Unless and until the Department imposes a different restriction, Holley shall reduce its pumping from the Holley wells by the same cumulative amount that the applicants propose to divert at their new points of diversion. The Department reserves the right to impose additional or different conditions on this transfer based on evidence provided during the period of retained jurisdiction or otherwise.
5. As specified by the court decree of Owsley Canal Co. vs. Ernest Bauerle, October 14, 1940, the period of use under Right Nos. 31-0331 and 31-0371 is limited to the period from May 1 to November 1.
6. The change authorized by this transfer shall be accomplished within (1) year of the date of this approval.
7. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
8. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

RECEIVED
MAY 30 1991

9. This permit is subject to the agreement dated March 11, 1991 between permit holder and protestant(s) to the extent such agreement covers matters within the jurisdiction of the Department of Water Resources.
10. Transfer Nos. 3680 & 3787 add place of use descriptions to Right Nos. 31-0331 & 31-0371, but do not expand the amount of irrigated acreage authorized under the rights.

2. A measuring device of a type approved by this Department shall be installed and maintained as part of the diverting works.

RE: Holley Water Users/Torgerson & Hoggan Transfers

Dear Mr. Jones:

I have received your letter of April 11, 1991 regarding the above-referenced transfers in which you state that, based on the stipulation between Mr. Larsen and the transfer applicants, the Department considers the Protest against the application resolved and has resumed processing their application.

I am assuming that this means that the Department will not require a Withdrawal of Protest to be filed. I see no problem with this approach, and agree that the application can be processed on the understanding that the processed application, if approved by the Department, will contain conditions that conform with those to which the parties stipulated, and the understanding that Larsen may request and obtain a hearing during the five year period of retained jurisdiction and submit additional information to the Department regarding conditions on the transfer.

If my understanding of the facts is not correct, please advise me immediately.

Sincerely,

Michael C. Creamer

Dear Mr. Barney:

Enclosed please find a copy of a protest filed against the above referenced application. You should be aware that the following are the items we can consider at a conference and/or hearing in either approving or denying an application for transfer:

1. Are other water rights injured by the transfer?
2. Does the change constitute an enlargement in the use of the original right?
3. Will the proposed use under this transfer conflict with the local public interest?

The applicant must be prepared to present evidence and/or testimony addressing each of the three items should an additional hearing be necessary. You will be notified at a later date as to the time and place set for conference and/or hearing. Although representation by legal counsel is not mandatory at a proceeding before the Department, you may retain an attorney in your behalf.

If we may be of further assistance, please contact us.

3. Will the proposed use under these transfers conflict with the local public interest?

The protestant must be prepared to present proof of the allegations involving one or more of the items. You will be notified at a later date as to the time and place set for conference and/or hearing. We appreciate your support in this matter. If we may be of further assistance, please contact us.

Creamer of Givens, Pursley, Webb & Huntley, and pursuant to I.C. § 42-222 and Department Rule 3, 1 hereby protest the Application submitted by the Holley Water Users Association to transfer Water Right Nos. 31-0371 and 31-0331 to new points of diversion and places of use described in the application as the Ronald Torgerson place of use and the Carl Hoggan place of use. The grounds for this protest are as follows:

1. Protestant is the owner of surface and groundwater rights in Jefferson County, Idaho which may be materially injured either directly or indirectly by such transfer;

2. The transfer will result in enlargements of both the place and period of

use of the water rights sought to be transferred;

3. The transfer will result in an increase in the consumptive use of water under water rights nos. 31-0371 and 31-0331;

4. The Application for Transfer does not contain sufficient information to determine the extent to which the transfer would result in a decrease in transmission loss, if any, and what effect this might have on other water rights;

5. The Application for Transfer does not contain sufficient information to determine the extent to which the right to divert under water rights 31-0371 and 31-0331 should be reduced as a result of decreasing transmission loss or other factors;

6. The Application for Transfer does not contain sufficient information to determine the effect of reducing transmission losses on the quantity, quality and location of return flows and location of discharge or the effects such reduction will have on other water rights; and

7. The proposed transfer involves projected diversions in excess of the duty of water for the acreage listed as the place of use.

Protestants reserve the right to state additional grounds as facts are adduced through discovery or otherwise.

For the foregoing reasons, the Application for Transfer No. 3654 should be denied.

Protestants Blaine Larsen, Larsen Farms, and Larsen of Idaho, by and through their attorneys Jeffrey C. Fereday and Michael C. Creamer of Givens, Pursley, Webb & Huntley, and pursuant to I.C. § 42-222 and Department Rule 3, 1 hereby submit their Conditional Withdrawal of Protest in this matter.

This conditional withdrawal is based on a joint stipulation entered into between Protestants and the Applicants whereby Protestants agreed to withdraw their Protest to the Applicants' transfer applications provided that any approval of the applications by the Department of Water Resources ("Department") contain conditions that, among other things, provisionally reduces the amount of water that may be produced from the original points of diversion by the amount that the Applicants propose to divert to beneficial use at the new points of diversion and that retains jurisdiction in the

Department to evaluate potential injury to other water rights and to modify the transfer conditions as necessary to prevent injury. The stipulation among the parties also provided that Protestants have the right to inspect the Applicants' points of diversion and to investigate their use of water under water right Nos. 31-0371 and 31-0331 and the right to present information to the Department during the period of retained jurisdiction relevant to necessary conditions to prevent injury to other water rights.

On October 29, 1990, the Department approved Application No. 3654 with conditions substantially similar to those agreed to by the parties in their stipulation. The stipulation among the parties and the Department's approval of Transfer Application No. 3654 contemplate that the Protestants may submit information to the Department for the purpose of seeking a modification of the conditions imposed by the Department on the Applicants' diversion of water from the new points of diversion. Application No. 3680 has not yet been approved, but the Department has represented to Protestants that any approval of Application No. 3680 will contain the same conditions as were imposed in its approval of Application No. 3654.

Accordingly, Protestants hereby withdraw their Protest to Transfer Application Nos. 3654, while expressly reserving their right to request a hearing before the Department at any time during the period of retained jurisdiction for the purpose of presenting such information and seeking such modifications of conditions as the Protestants deem are appropriate. With regard to Transfer Application No. 3680, Protestants hereby conditionally withdraw their Protest, provided that the conditions imposed by the Department in any approval of such application conform to those

5. The Application for Transfer does not contain sufficient information to determine the extent to which the right to divert under water rights 31-0371 and 31-0331 should be reduced as a result of decreasing transmission loss;

6. The Application for Transfer does not contain sufficient information to determine the effect of reducing transmission losses on the quantity, quality and location of return flows and location of discharge or the effects such reduction will have on other water rights; and

MEMORANDUM

TO: FILE

FROM: TIM LUKE

DATE: June 28, 1990

RE: HOLLEY TRANSFERS NO.S 3645, 3654, & 3680

=====

Based on correspondence between the Department and party protesting the above transfers, and the proposed stipulation agreement between the protesting party and applicant Holley Water Users Association, the following conditions of approval are recommended:

Proposed Conditions of Approval:

1. Use of water under this transfer is subject to control by the watermaster of State Water District No. 31, Mud Lake and tributaries.
2. A measuring device of a type approved by this Department shall be installed and maintained as a part of the diverting works.
3. The director retains jurisdiction of this transfer up to 5 years for the purpose of determining potential injury to existing rights, both junior and senior, and for the purpose of modifying the conditions of transfer approval as necessary to prevent such injury.
4. The cumulative rate of diversion and annual volume under Right No.s 31-0331 and 31-0371 shall be appurtenant to the place of use so that each irrigated acre will receive an equal portion of water from the same source identified under both rights. Unless and until the Department imposes a different restriction, Holley shall reduce its pumping from the Holley wells by the same cumulative amount that the applicants propose to divert at their new points of diversion. The Department reserves the right to impose additional or different conditions on this transfer based on evidence provided during the period of retained jurisdiction or otherwise.
5. As specified by the court decree of Owsley Canal Co. v. Ernest Bauerle, October 14, 1940, the period of use under right no.s 31-0331 and 31-0371 is limited to the period from May 1 to November 1.

RE: Transfer Applications of Holley Water Users' Ass'n Nos. 3654 and 3680

Dear Mr. Saxton:

We have received your letter of June 12, 1990. Based on our understanding of the Department's intent regarding the proposed conditions as stated in your letter, we would not object to their inclusion in approvals of the Holley transfers.

To clarify our understanding, the conditions would be applied to the Holley Water Users' Ass'n transfers involving the Holley, Murdock, Bybee, Hoggan and Ashcraft wells that are referenced in the stipulation between those parties and Mr. Larsen. Condition number 3 in your May 25 letter would follow the language which we proposed in our June 8, 1990 letter. Condition number four would contain the language which you originally proposed, supplemented by the last two sentences of our proposed language.

I will forward a copy of your letter to the other parties. Upon notification from them that they will agree with this language, we will forward an executed stipulation to the Eastern Region along with a withdrawal of the protests filed by Mr. Larsen.

Sincerely,

Michael C. Creamer

RE: Transfer Applications of Holley Water Users Association
Transfer Application No.s 3654 & 3680

Dear Mr. Creamer:

I have reviewed your letter of June 8, 1990 concerning the Department's proposed conditions for the above referenced transfers.

In response to your comments and concerns, I first wish to state that my previous correspondence did not reference transfer no. 3680 simply because the stipulation which you asked the Department to review did not reference this latter transfer application. Since both transfers are similar in nature and a protest is pending between the same parties, the Department will extend similar conditions to transfer no. 3680.

In regard to our proposed condition no.3, the five year period for retained Department jurisdiction is standard. The additional language which you proposed seems acceptable and can be incorporated with our proposed condition.

The language of our proposed condition no. 4 was chosen with the intent to prevent expansion by limiting the diversion rate and volume, without specifying exact measurements, to an amount commensurate with actual beneficial use. This condition is a variation of a more standard condition that the Department often uses when issuing licenses and approving transfers. The Department understands that one of the parameters of beneficial use is the total number of irrigated acres identified by the transfers. Holly Water Users will be required to reduce their pumping by the same amount that certain individuals (i.e. Bybee, Murdock etc.) propose to divert at their new points of diversion. The Department will add the last two sentences as you have proposed to condition no. 4.

MICROFILMED

NOV 01 1990

I hope that these revised conditions are satisfactory to both parties. Please do not hesitate to contact me if you have additional questions or concerns.

Sincerely,

RE: Transfer Applications of Holley Water Users Ass'n

Dear Mr. Saxton:

I have reviewed your letter of May 25, 1990 regarding the proposed conditions for the Holley Water Users' Association transfers and have forwarded copies to Kent Foster and the landowners involved.

Let me first point out that the stipulation entered into by Mr. Larsen and the other parties encompasses Transfer Application Nos. 3654 and 3680 and also the Murdock well. Therefore, the Department should include the same conditions in each transfer approval.

Although the Department's retained jurisdiction language does not coincide with that contained in the stipulation which all the parties have now signed, Mr. Larsen would not object to the Department retaining jurisdiction for a period of not more than five years. We believe that the other parties likely would agree to this condition as well. We expect that if they do agree, they will write to me and convey their intention that the stipulation be considered amended to reflect the 5-year retained jurisdiction condition the Department has proposed.

We suggest, however, that your proposed condition no. 3 read as follows:

The director retains jurisdiction of this transfer for up to five years for the purpose of determining potential injury to existing rights, both junior and senior, and for the purpose

RECEIVED

NOV 01 1990

of modifying the conditions of transfer approval as necessary to prevent such injury.

The language contained in proposed condition number 4 is unclear. If it is the Department's intent that approval of the transfers will not result in an expansion of the water right, we agree with that intent. However, the language is ambiguous in this respect and therefore would not provide the stipulated prerequisite for withdrawing our protest. We suggest that the following language be substituted for the Department's proposed condition no. 4:

The cumulative rate of diversion, annual volume diverted and acreage irrigated under Right Nos. 31-0331 and 31-0371 shall not be increased above the decreed rate and volume of diversion as a result of this transfer, nor shall the acreage irrigated be increased beyond that decreed under these rights. Unless and until the Department imposes a different restriction, Holley shall reduce its pumping from the Holley wells by the same cumulative amount that the applicants propose to divert at their new points of diversion. The Department reserves the right to impose additional or different conditions on this transfer based on evidence provided during the period of retained jurisdiction or otherwise.

Since this condition reflects the intent of the parties, I anticipate that they will agree to inclusion of this language in the transfer approvals. We hope that the Department can make these changes to its proposed order.

I look forward to your response.

Sincerely,

Michael C. Creamer

RE: Transfer Application No. 3654/Holley Water Users Assn.

Dear Mr. Creamer:

Department staff has received your letter dated May 21, 1990 and a copy of the proposed stipulation between Blaine Larsen and Holley Water Users Association.

The Department does not disagree with the general terms of the stipulation as it is currently proposed. Since the Department is not a party to the stipulation, the Department specifically requests that this stipulation not appear to be a matter before the Director of the Department. The heading of the stipulation therefore should exclude lines one and two which pertain to the Director of the Idaho Department of Water Resources.

Listed below are several proposed conditions which the Department will likely use as conditions of approval for this particular transfer application. I believe the conditions will satisfy the terms of the stipulation. I hope that our listing of proposed conditions at this time will assist the two parties in reaching an agreement and resolving the pending protest.

Proposed Conditions of Approval:

1. Use of water under this transfer is subject to control by the watermaster of State Water District No. 31, Mud Lake and tributaries.
2. A measuring device of a type approved by this Department shall be installed and maintained as a part of the diverting works.
3. The director retains jurisdiction of this transfer up to 5 years for the purpose of determining potential injury to existing rights, both junior and senior, in the vicinity of the transferred point of diversion.
4. The cumulative rate of diversion and annual volume under Right No.s 31-0331 and 31-0371 shall be appurtenant to the place of use so that each irrigated acre will receive an equal portion of water from the same source identified under both rights.

5. As specified by the court decree of Owsley Canal Co. v. Ernest Bauerle, October 14, 1940, the period of use under right no.s 31-0331 and 31-0371 is limited to the period from May 1 to November 1.

I hope this response addresses your concerns and questions. Please feel free to contact this office if you have additional questions or would like further assistance in this matter.

RE: Casing recommendation for Transfer Application #2656 (a new well in T7N R35E Section 36 NW $\frac{1}{4}$ NW $\frac{1}{4}$, Jefferson County)

It would appear that the proposed well would likely draw water from Camas Creek which is close to the well site. Although we have no idea of the proposed depth of the well (a shortcoming of these transfer applications which I pointed out to you in a recent memo), I have found in two logs from wells in Section 35 a clay layer which may protect surface flows from pumping. In one log, the layer is found from 74 to 88 feet below land surface and in the other, from 58 to 84 feet. If this clay layer is continuous and is penetrated in the drilling of the new well, then unperforated casing should extend some reasonable distance into it.

you will find attached form as requested.

I question your findings of 45 cfs. total
when the decree states they can divert
up to 50 cfs. daily continuous from May 1
to Nov 1 of any year.

Their history exceeds this amount each
year early in the season, but then drops off
making a shortage later in the season -
This necessitates drilling more wells to
maintain said 50 cfs.

They need all this water including the 5
cfs. They are short on those transfers.

02344/02345/07005

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5335

DATE: February 9, 1999

Transfer 5335 combines the groundwater rights of the Holley Water Users, Jackett Canal Co, and Owsley Canal company. These three companies have combined under the Owsley Canal Company name and will operate a single combined system.

The application identifies 34 points of diversion and a combination of the land lists evidenced under each company's SRBA claims or 24261.3 acres. The decreed rights are vague, while the licensed rights identify specific acres and limits. SRBA review of all these rights through the adjudication process will provide specifics and verify the validity of all of these rights.

Review of these rights found that Right 31-02317 was actually licensed in two parts with separate rates and priority dates. These rights were more accurately entered as Parts A & B on the database and the additional 8.08 cfs added to the total diversion rate under this transfer. Also, a combined limit of 200.00 cfs during the irrigation season was identified under Rights 31-00327/00328/00329 & 00330. Right 31-02259 was listed on the application, however this right was superseded by Right 31-00330. After making these adjustments, the total rate of diversion under these rights is 643.21 cfs limited to 503.21 cfs during the irrigation season and 5,000 af storage.

Season of use and diversion volume were adjusted to current standards where specific acres were identified. Recommended conditions include watermaster control, supplemental groundwater, irrigation overlap, measuring/lockable controlling works, right-of-way, permissible place of use, combined limits and standard transfer conditions.
