RE: Notice of Protest/ 927 Gun Club Road, Lewiston, Idaho 83501/ 85-15827

Dear Sirs;

We collectively are protesting Water Right Number(s) 85-15750 & 85/15751 that would combine the domestic and irrigation water associated with 927 Gun Club Road, Lewiston, Idaho 83501. The Field Report 85-15750 page 3 of 10 dated November 9, 2012 under "Narrative/Remarks/Comments" so states:

There are two wells that are part of 2 seperate systems at Cowger Additions (POU). One well is used for irrigation purposes for the west side of the subdivision (with the exception of the Cowger's home (which is the most southern home) and domestic use for the shop (one bathroom). The old well (drilled around the 70's?) was originally going to be for the 9 homes but it did not meet quality standards. A new well was put in 1999 and is used in house 9 homes, irrigation for the east side of the subdivision, and the Cowger's home.(SEE ATTACHED EXHIBIT A)....THIS REPORTS STATES THE OLD WELL DID NOT MEET QUALITY STANDARDS....why would it meet quality standards today?

ALSO, SEE (ATTACHED EXHIBIT B) Water Right License No. 85-15750 dated July 7, 2008, PAGE 1 documenting the use of the 2 wells.

We are asking that both wells be tested for water quantity and water quality before these 2 water systems be merged. This is for the safety and welfare of those using this water system. We are asking that the testing be done at the well(s) by a certified 3rd party.

We also have issues as to the continued abuse of the water system by the Cowger's. This has been going on for years and continues today. CURRENTLY, Two 2 extra units are being provided water, 1 travel trailer and 1 motorhome (pictures attached) . Please (SEE ATTACHED PUBLIC HEALTH NOTICE DATED JUNE 28, 2021 and MAY 7, 2013 EXHIBIT C 6 pages) where the Cowger's had MANY unauthorized units on the property and were providing water to these units. The Cowger's continue to push the limits and

continue to have a problem with contaminated water,see 2 reports (EXHIBIT D 2 pages). If the Cowger's provided water as permitted they mostly likely would not be having a water problem.

This property is also located in a high nitrate area (EXHIBIT E).

WE HAVE NO ISSUE WITH THE COWGER'S TAKING WATER FROM LINDSEY CREEK LEGALLY AS LONG AS IT IS BEING USED FOR IRRIGATION ONLY.....

We thank you for the time and attention you have given to this matter.

Sincerely,

Ron Klemm 907 Larch Lane, Lewiston, Idaho 83501 Ron Klemm

Gina Schaefer 907 Larch Lane, Lewiston, Idaho 83501 Gina Schaefer

Karen Autrey 910 Larch Lane, Lewiston, Idaho 83501 Karen Autrey

Helen Keeney 916 Larch Lane, Lewiston, Idaho 83501 Helen Keeney

Cc. Bill & Joann Cowger, 927 Gun Club Road, Lewiston, Idaho 83501

Exhibit A

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{I.R.}$ = (Acres Irrigated) x (Irrigation Requirement) = 0.7 acre x 4 af = 2.8 afa

$V_{D.R.}$ = [Diversion Rate (cfs)] x (Days in Irrigation season) x 1.9835 = 0.02 x 294 days x 1.9835 = 11.7 af

V = Smaller of $V_{I.R.}$ and $V_{D.R.}$ = 2.8 af

2. Volume Calculations for Other Uses: Domestic use of 9 homes x 0.6 af = 5.4 AF

G. NARRATIVE/REMARKS/COMMENTS

There are two wells that are part of two separate systems at Cowger Additions (POU). One well is used for irrigation purposes for the west side of the subdivision (with the exception of the Cowger's home which is the most southern home) and domestic use for the shop (one bathroom). The old well (drilled around the 70s?) was originally going to be used for the domestic use for the 9 homes but it did not meet quality standards. A new well was put in 1999 and is used for in-house use of 9 homes, irrigation for the east side of the subdivision, and the Cowger's home.

The old well is apparently 65' deep according to the Cowger's and I was able to measure a flow rate at the hydrant that is located at the well—average of 22 seconds to fill a 5 gallon bucket or 5 x 60/22 = 14 gpm Can back-calculate the hp equation with the psi of 36, depth of well is 65' and diversion rate of 0.03 cfs.

The old well is equipped for 2 pressure tanks for use at the bathroom.

The new well has a 2 horsepower pump and is pumped into 2-1500 gallon storage tanks that are located upstairs at the shop that sit 15' high. From the storage tank there is a 7 horsepower pump that conveys the water to a 3" mainline that then goes to the homes.

Since the system is not integrated, an amendment was necessary to add a PD to 85-7658. I received the amendment and split 85-7658 into 85-15750 (new well) and 85-15751 (old well).

Note that the domestic component between 85-15750 and 85-15751 is limited to 0.05 cfs total based on the amendment the permit holder signed.

Have conditions of permit approval been met? ___x__Yes _____No

H. RECOMMENDATIONS

1. **Recommended Amounts**

BENEFICIAL USE	PERIOD OF USE	DIVERSION RATE	ANNUAL VOLUME
DOMESTIC	1/01 to 12/31	0.040 CFS	5.4 AF
IRRIGATION	2/15 to 11/30	0.020 CFS	2.8 AF
	Totals:	0.050 CFS	8.2 AF

2. **Recommended Amendments**

___Change P.D. as reflected above _x__Add P.D. as reflected above ___None

_x__Change P.U. as reflected above ___Add P.U. as reflected above ___Other

Water Right License

WATER RIGHT NO. 85-15750

Priority: July 07, 2008

Maximum Diversion Rate: 0.05 CFS
Maximum Diversion Volume: 8.2 AF

It is hereby certified that BILL COWGER
927 GUN CLUB RD
LEWISTON ID 83501-9789 has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated June 22, 1999; and has submitted Proof of Beneficial Use on July 7, 2008. An examination confirms water is diverted from:

SOURCE
GROUND WATER

and a water right has been established as follows:

BENEFICIAL USE	PERIOD OF USE	DIVERSION RATE	ANNUAL DIVERSION VOLUME
DOMESTIC	01/01 to 12/31	0.04 CFS	5.4 AF
IRRIGATION	02/15 to 11/30	0.02 CFS	2.8 AF

LOCATION OF POINT(S) OF DIVERSION:
GROUND WATER L4 (NW¼NW¼) Sec. 4, Twp 35N, Rge 05W, B.M. NEZ PERCE County

PLACE OF USE: DOMESTIC

					L3	L4											

Total Acres: 0.7

CONDITIONS OF APPROVAL

1. This right when combined with all other rights shall provide no more than 0.02 cfs nor more than 2.8 afa for irrigation of the lands above.
2. Domestic use is for 9 homes. Irrigation of lawn, garden and landscaping associated with 4 homes is authorized under the irrigation component of this right. The 4 homes are specifically located at 927 Gun Club Rd., and Cowger Additions 6-8.
3. Irrigation of lawn, garden and landscaping associated with the 5 remaining homes is authorized under right 85-15751.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 1st day of February, 2013.

William J. and Joann Cowger
927 Gun Club Road
Lewiston, ID 83501

Dear Mr. and Mrs. Cowger,

On May 1, 2013, Public Health received a complaint described as someone living in a camp trailer and dumping their sewage into Lindsay Creek. On May 3, Public Health – Idaho North Central District investigated and observed several camp trailers located on Parcel RP35N05W042587 and RP35NO4WO42591. The Nez Perce County Assessor's office names you as the legal owner of this property.

These camp trailers appeared to have drain hoses connected and going into the ground. It appeared that the trailers were being lived in at the time of the investigation. While there didn't appear to be any sewage on the ground at the time of investigation, I do have questions about how the sewage from the trailers is being disposed of since there are hoses connected to the trailers.

IDAPA 58.01.03 are the rules that govern individual/subsurface sewage disposal in the State of Idaho. The intent of these rules is to protect health, safety and the environment of the people of the State of Idaho.

As the property owner you are responsible for the proper treatment and disposal of wastewater generated on your property according to IDAPA 58.01.03.002.04.a.i. which states, *"Responsibilities. Every owner of real property is jointly and individually responsible for: storing, treating and disposing of blackwaste and wastewater generated on the property."*

Please contact me by May 15, 2013 to inform me of how the sewage from the trailers is being disposed of. Failure to do so may result in associated fines and legal action. I can be reached at (208) 799-0356 or emarugg@phd2.idaho.gov.

Sincerely,

Edward A. Marugg, R.E.H.S.

Subject: RE: Cowger Trailer park

Yes, they did have to remove the trailers being used as residences from their residential lot. I think one may have stayed within the trailer park, but that is permitted. The Cowgers were very nice and also cooperative. They admitted that they knew they probably weren't allowed to do what they were doing.

Thanks for checking!

Alison

Subject: Cowger Trailer park

Alison,
Just inquiring as to what happened with the Cowgers on their Mobile Home park on Gun Club Road where they were allowing trailers along the creek. We just received a complaint about the drinking water system and it jogged my memory about this. Did they ever have to move those trailers out?
Thanks for your assistance.

Comments/Findings:

05/03/2013 - Drove into the Cowgers Mobile Home park on Larch Lane, and drove towards Lindsay Creek. There were several trailers/RVs parked on the west side of Lindsay Creek with what appeared to be drain hoses buried into the ground. There was also a camp style trailer on the east side of the creek, with a silver Dodge Truck parked at it. The Trailers all appeared to have people staying in them. I contacted Nez Perce County to investigate ownership of the property, and the County indicated that they would mail notices of violation as nobody should be living in the trailers. Only for storage. I did not see or witness any sewage on the ground, or signs of it running down into the creek. Some trailers had drain hoses that I could see buried into the ground, and I also noticed a green pipe spanning the creek. I don't know whether that pipe is carrying water or sewer.

05/13/2013 - Met with Mr. and Mrs. Cowger, owners of the property in question. They claim that the camp trailers are hooked into City sewer. When the City ran sewer lines up Lindsay creek, they extended laterals out to be able to hook up trailers like this (according to Mr. Cowger). They were upset about someone complaining that they were allowing sewage to go into the creek. I told them I didn't see any signs of sewage on the ground or in the creek, but that was the complaint that came to me. They seemed to be aware that they were not supposed to have trailers parked there with people living in them, and said "we got caught". I asked if the city was aware that these trailers were hooked into city sewer, and they said they didn't know. I recommended that they contact the City to let them know that they are. Mr. Cowger said he got a letter from Alison Tompkins from the County, and was going to go meet with the Commissioners about this issue. I recommended that they talk Alison first. I consider this resolved.

05/13/2013 - Mr. Cowger called back and left a message that he had contacted the City of Lewiston about the connections of the trailers to City Sewer. They told him every connection would be an additional $38.00/month per hookup. He wants to wait until he contacts and talks to the County before he decides what to do.
