FROM: KAY WALKER

RE: Amendment of Permits Review

Date: August 3, 2007

These permits are being amended for use at the Twenty Mile South farm that the City utilizes to disperse sediment from sewage ponds.

Pursuant to point of diversion overlap review I found many rights to be diverted from wells within the same location of the wells identified on these amendments. All of the rights found are in the name of the City of Boise and it appears that the amendment applications are filed to reflect that these rights as being part of an interconnected system. Overlapping rights identified are as follows: 63-7005B, 63-7042B, 63-7053, 63-70055C, 63-7055D, 63-7064A, 63-7064B, 63-7078B, 63-7755B, 63-8130B, 63-9243, 63-9359, 63-15489, 63-15491, 63-15492, 63-3013, 63-3014, 63-8435, 63-7047, and 63-7055A. The licenses of these permits should contain overlapping rights conditions when issued.

Place of use overlap for 63-12461:

Rt. 63-7047 for City of Boise - Stock water place of use overlap only

Rt. 63-8435 for City of Boise – Irrigation place of use overlap in E½NW¼, S33 @ less than 1" per acre, should be clarified and conditioned at time of licensing.

Place of use overlap for 63-12470:

Rt. 63-7078A for Pioneer Hi-Bred claimed in SRBA but recommended for disallow.

Rt. 63-3639 for BLM, claimed in SRBA and then withdrawn; water use for stock water storage.

Recommend approval of the amendments with conditions that were applied at time of permit approvals.
