Feedback to your feedback regarding Steve's message.

I have settled on the following remark for POU1:

" Use of this right and associated rights are limited to the irrigation of a combined total of _____ acres within the place of use represented by the boundary on the attached map in a single irrigation season."

The down side of not listing rights is that the relationship between the specific right and any other right earlier or later in time is lost. If a right has been licensed but is not required to be in the SRBA then there are no combined use languages on any right that includes that right. I suppose that any future licensing recommendations could include combined use limits if that shop is so willing.

Is the language ok?

Subject: RE: new remark for using the Boundary POU instead of Q-Q listings

Steve, thanks for the model. I'm so focused on the grindstone in front of me I had not looked up to see where we're going on Remarks (or Condition Codes) from the crest I'm riding.

Yes, the POU's for the right(s) are deleted from the R-record when you're done. Some of your colleagues have made another A-record labeled Working Copy leaving the specific POU's in the data base before deleting the POU's from the R-record(s). The printed layouts are incorporated into the Report as additional page(s). In that way the POU Remark referencing the place of use within the boundary is related and available to see in graphical form. The layout is placed in the Report and a color copy is sent to the Claimant and/or attorney.

The strong tie with the layout brings into question the value of the E14-type remark. With data in a tabular form, we saw a need to make clear one water right was pointed and associated with the other(s). Drifting quickly to the use of spatial data, the paradigm of our precise and extensive remarks is currently questioned and examined. In the case of a canal company/irrigation district, the water right(s) is normally for the entire POU in each case. Given that a query of the POU location spatially will yield the water rights present. The need and expense to state on each right all the rights for the POU and the total number of acres appears to yield little administrative value. ?

We have only started pulling the cover off the issue of Remarks and Condition Codes. At this point I don't know how we'll look and operate when we get there (not later than 3/30). Your thoughts, ideas, and views on the subject are solicited and helpful. Thanks for joining this adventurous journey.

Subject: new remark for using the Boundary POU instead of Q-Q listings

Well, here is some quick shots at the possible remark based on the current remark in POU1 - E14...

and associated rights are

"Use of this right ~~with the rights listed below~~ is limited to the irrigation of a combined total of _____ acres ~~in a single irrigation season~~ within the Place of Use ~~shown on~~ the system boundaries on the attached map. Combined right Nos. : _____" ~~represented by~~

Then am I correct to remove all POU listings from the R-record? I will have the GIS map to attach to each claim but how does that travel to the SRBA court as part of the recommendation?

I will use this on the Challis Irrig. Canal (CIC) and the Gini Ditch Co. Later next month this same remark will be part of the Big Bend Irrig. (BBI) in basin 36.

thanks for your help folks...

When you let me wordsmith, you throw the door open. I find "associated rights" akin to "this right and all other rights shall not exceed .02 cfs per acre." As you offered the possibility of a future right, the new right may result in new land (pou) added to the previous total. I would offer the Remark in R35-02543 (Aberdeen Springfield) as an end toward your objective.

ACRES IN CIC

He was following up on the acres discussion we had earlier in the year... I told him all appears to be in order and I am trying to get the final report ready for the upcoming SRBA report this month. I told him of the boundary description that will be used instead of the Q-Q listings as we have discussed.

He asked about the expansion onto BLM acres by using the water more efficiently... BLM wants a written statement from me to assure the water right. I thought that would require an additional permit. I will review my notes and the files and call back ASAP. Phone 879-4417.

Three diversions like this one are set for closure before irrigation season this year. The east side of Round Valley will be served water through the Challis Irrigation Canal.

Anna Means photo

Cooperative effort consolidates diversions to save fish

by ANNA MEANS

This week, an idea hatched three years ago came to life as construction began to consolidate four Salmon River irrigation diversions into one. In a joint effort, five landowners, the Challis Irrigation Canal Company, Bonneville Power Administration (BPA), Soil and Water Conservation District (SCD) and the Bureau of Reclamation (BuRec) are improving in-river migration for anadromous and resident fish.

By eliminating the Upper McGowan, Lower McGowan and Keyes diversions and funneling all east valley irrigation waters through the Challis Irrigation canal, young salmon, steelhead and bull trout will have one instead of three diversions to negotiate in their downriver journey.

Local and voluntary

Gary Chamberlain, Vice-President of the Challis Irrigation Canal company, said some landowners will benefit from gravity feed irrigation from this project. Another plus is that the river diversions won't have to be rebuilt every time high water washes them out.

Chuck Keller, BuRec, emphasized that this is a local effort, administered by a local office and because of that, will cost at least one-third less than the original proposal designed by engineering staff with his agency. He added this was an all or nothing deal, because if

one landowner didn't want to participate, the project was off.

Karma Bragg, District Clerk with the SCD, said another reason it will cost less is because her office will only be reimbursed for actual cost, rather than taking a percentage off the top as is the practice of other agencies. She pointed out this was a voluntary effort by landowners, who will incur personal costs over and above the \$733,000 BPA is providing.

Preparations

Chamberlain said the BuRec came up with a design three years ago, but the price tag was too high. Irrigators came back with a counter proposal that was tentatively accepted. Tupper Construction from Salmon did a survey and presented a bid for the work.

The next step was to obtain permitting and concurrence from a long list of agencies. Chamberlain said it took at least six months just to get all the paperwork done.

Keller said they got a 404 permit from the Army Corp of Engineers, completed an archeological survey, performed an environmental assessment on BLM land, received concurrence from NMFS as well as secured the blessings of the Idaho Department of Water Resources, Department of Environmental Quality, Sho-Ban Tribe and Idaho Department

Cooperative effort consolidates diversions to save fish

of Fish and Game.

Procuring easements for pipelines transporting water from the Challis canal was up to the landowners who are changing their points of diversion from other canals to the Challis Irrigation canal.

Upgrading

Keller said the Challis canal capacity has to be increased from 120 cubic feet per second (cfs) to 160 cfs, which amounts to a good cleaning out of the ditch. He figured the upper end of the canal will be widened by two feet but only by a foot lower down.

In addition to eliminating the three diversions from the river, three obsolete fish screens will be removed. Larry Week, with Fish and Game's engineering department in Salmon, said years ago one-quarter-inch mesh was fine for salmon smolts, but now they are screening for steelhead and bull trout fry. Mesh size went from one-quarter to one-eighth and now is supposed to be 3/32-inch diameter. He says instead of mesh they now have perforated stainless steel plates with 40 percent of the surface being holes. Also, today's standards call for an approach water velocity of .4 feet per second, which requires the screen be placed at a 22-1/2 degree angle to the river's current.

Pat Markison, fish screen program coordinator for Fish and Game, said the Challis canal system will have to be upgraded when the extra 40 cfs comes in, but the cost is substantially less than screen replacement for the other three diversions. That was estimated at between \$250,000 to \$300,000. Markison said it costs about \$2,000 per cfs to upgrade old systems. Another savings, he said, is on annual maintenance. He figures it costs about \$7,500 per screen each year to have them cleaned and maintained.

Cost share

Another advantage to the cooperative effort, said Chamberlain, is the cost of irrigation will be spread out over more users when all five landowners join the Challis Irrigation Company. Once the canal company delivers the water to the five landowners, they will join and become shareholders of stock in the company.

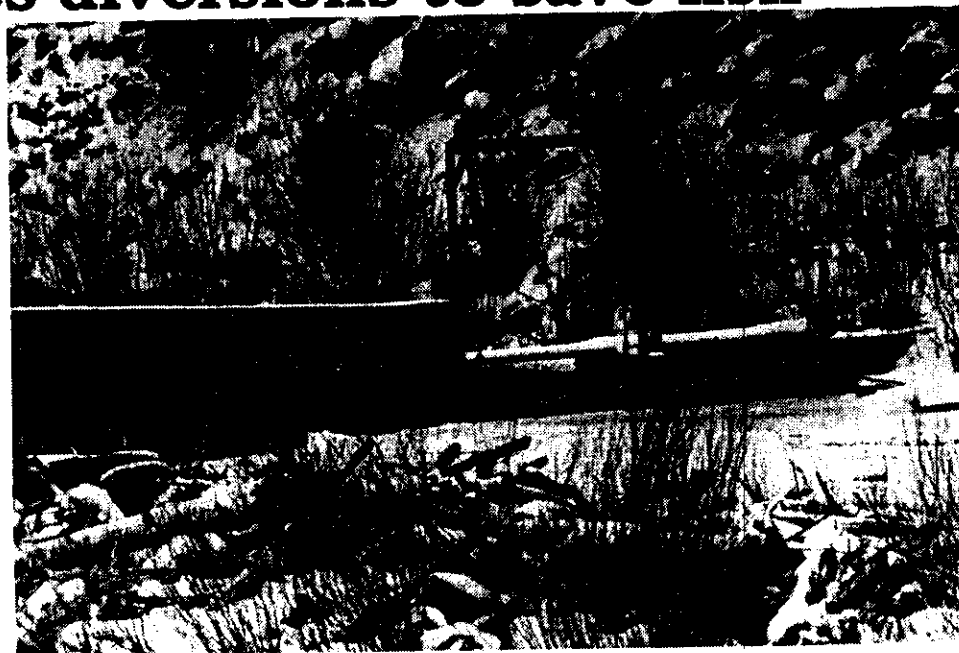

The SCD applied for and received the BPA monies, which are provided by ratepayers. Bragg said the canal work itself will cost \$344,000 and another \$7,000 goes toward closure of the three canals. The rest of the money is to be used for installation of pipelines to irrigated properties and for some on-farm systems. She said not all of the landowners will be upgrading their systems, but some will install wheel line, hand-line or pivot systems. Chamberlain said those people have traded a portion of their water allotment in exchange for financial assistance to upgrade.

Keller said landowners will be providing labor, materials and installation. He said upgraded systems will use less water than traditional flood irrigation.

Chamberlain said they wanted to start construction last November, but believed they could just get it done if started in February.

Objections

Not all of the 60 shareholders in the Challis Canal Company are happy with the change. Lynda Hoggan told the *Messenger* she and her husband don't want the project, but can't afford to fight the canal company. She said others are opposed to it but were out-voted by those with larger shares at the company meetings. She said three people are going to get a nice irrigation system out of the deal, but not everyone will. The bottom line, said Hoggan, is there's no such thing as a free lunch. Even though

Fish friendly — Pat Markison, Fish & Game, said as diversions go, the Challis Irrigation Canal is fish friendly. He said it doesn't go cross-channel, has blow-offs just before the headgate and has a fairly modern fish screen and by-pass. Markison, who is in charge of screening about 200 diversions on the Salmon River, is one of many officials pleased to see the consolidation completed.

Anna Means photo

they've been promised BPA will pay for the project, she doesn't think that will really happen. Hoggan said she doesn't think taxpayers or ratepayers will benefit from the change and neither will the fish.

Chamberlain said although all five of the landowners currently using the three diversions had to agree to the consolidation, the story is different for the canal company. He said the canal company is guaranteeing delivery of water, through its ditch, to the five landowners. This responsibility was assumed after a majority of shareholders in the Challis Irrigation Company voted in a January meeting.

Sharlene Miller, secretary of the canal

company, said of the 153.75 shares represented at the January 25 meeting, 10.5 were cast against it and 144.25 in favor. She said the 60 shareholders own between 36 to .25 shares in the company. Out of those 60 members, only three have spoken out or written letters against the project.

Hoggan said the proposal was voted down once, but Miller says the issue only came to a vote in the January meeting. Chamberlain said the project had been presented to shareholders in previous meetings. Those working on the plan had asked if they should continue to proceed and each time were given permission to continue.

Mr. Clelland:

When I called the Challis ^{Department of Water Resources} ~~Irrigation~~ Company's Secretary for Judge Hurlbutt's address, she mentioned you as the one Gary Chamberlain was working with on the adjudication process.

As I understand it, someone flew over this area in 1982 & based on their findings, our water shares are now being reduced with "historical usage" as the reason. Excuse me but that's such flimsy justification. This whole valley had to be "improved upon" for ownership way back then, i.e. irrigation.

Idaho would be a virtual dustbowl without water. The Warranty Deed for my place declares the right to so many inches of water. The idea that our government can take (some say steal) the water is an abomination.

It's easy to understand paranoia on the farmers/ranchers part. The government has been steadily eroding or threatening their livelihoods. I can say this being an outsider who lived most of my life in Iowa, moving here 5 1/2 years ago to

-2-

retire. A portion of my land was nothing but dirt, rocks & weeds. One year after arriving alfalfa was planted. Now the land has returned to its former glory.

These hardy souls, who worked without electricity until the 50's, love working the land. To see that dedication & hard work jeopardized is a travesty.

Your job cannot be an easy one in this respect. I can only hope that wisdom & justice will guide you

Sincerely,

Dear Mrs. Stark:

Enclosed is a copy of the decision dated January 9, 1995, which classified the land in your desert land application, IDI-29774, as suitable for entry. The decision has now become final.

You should now proceed with the purchase of the shares from the Challis Irrigation Company and obtain the necessary approval from Idaho Department of Water Resources (IDWR). The enclosed decision should accompany your request to IDWR so that they will know the lands have been classified as suitable.

Please submit a copy of the documentation showing you have purchased the shares and a copy of the approval from IDWR. Upon receipt of the copies, we will then proceed on issuing the Notice of Allowance of your entry.

If you have any questions, please contact Gloria Romero, at (208) 756-5421.

CLASSIFICATION DECISION

(Initial)

A.

The following-described land has been examined and found suitable for agricultural purposes:

T. 14 N., R. 19 E., Boise Meridian, Idaho
sec. 25, E1/2SE1/4

Containing 80.0 acres

The land is hereby classified as suitable for disposal under provisions of the Desert Land Act, as amended (19 Stat. 377; 43 U.S.C. 321-323) and the Carey Act, as amended (28 Stat. 422; 43 U.S.C. 641 et seq.), and the regulations thereunder (43CFR 2520 and 2610).

The above-described land is physically suitable and adaptable for agriculture. There would be no significant adverse impacts resulting from the development.

B.

This Initial Decision is in accordance with the Endangered Species Act of 1973 (P.L. 93-205, 87 Stat. 884, 16 U.S.C. 1531), Executive Order No. 11593, National Historic Preservation Act of 1966 (80 Stat. 915, 16 U.S.C. 470 et seq.), as amended, National Environmental Policy Act of 1969 (P.L. 91-190, 83 Stat. 852; 42 U.S.C. 4321), Federal Land Policy and Management Act of October 21, 1976 (P.L. 94-579, 90 Stat. 2743 Section 102(8)), and Section 7 of the Taylor Grazing Act (43 U.S.C. 315, 315a-315r).

This classification action meets the criteria in, and is made pursuant to 43 CFR 2410.1(a)-(d), 2430.5(e), 2450, and 2520.0-8.

This decision relates only to land classification. Adjudicative action by the appropriate land office will determine at a later date the merits of the applications as well as the qualifications of the applicant.

RE: CHALLIS IRRIGATION COMPANY SRBA CLAIMS REVIEW

Dear Gary,

Enclosed is the acreage listing I discussed with you by phone earlier on this day. Also as discussed, I will try to outline the concerns and information needed to complete the SRBA recommendation for these rights.

As of 1963 the Challis Irrigation Company (CIC) had four water rights (72-02076A, 72-02076B, 72-00034 & 72-00035) for a total of 77.5 cfs; total acreage is unclear at this point. In 1967 the CIC enlarged the canal by 24.9 cfs (per affidavit by Gary Chamberlain). This would bring the total canal flow to 102.4 but later measurements indicate the flow to be nearer to 120 cfs. The canal was not enlarged again until 1996 and flows were 123 cfs in 1993.

If this is correct, the CIC had flows of 123 cfs but only had water rights for 77.5 leaving a flow of 45.5 cfs without a water right on record. In 1976 they filed a permit, 72-07051, for an additional flow of 47.4 cfs. This permit would account for the remaining flow and cover additional acreage developed during that time frame. As I told you IDWR does not have record of the Proof of Beneficial Use or the License Field Exam Report for this permit.

Do you have any copies of these documents which will help me to establish this permit?

IDWR has issued a license for 72-07269 for 1.2 cfs on 83 acres on the Stark property. In 1992 CIC filed a SRBA claim, A72-11740, which states it lists lands that should have been covered in the permit 72-07269. Is this SRBA claim for additional water flows or simply an enlargement of existing water flows? If for an increase in flows, how was the canal flow increased to accomplish this? Could you please provide a copy of your original SRBA filing on this claim to complete our records?

To summarize briefly, when we meet to discuss these rights could you bring all the information you have on the following:

1. Documentation on permit 72-07051, especially of the IDWR exam visit in 1986.
2. Original SRBA filing of A72-11740 and evidence to support use of water on the acres claimed.

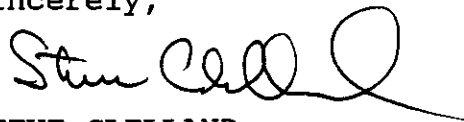

Chamberlain - pg. 2

3. Records of water flow measurement showing historic flow rates in the canal. Especially during the dates of 1967, 1971, 1976 and/or 1986. Any others you feel are helpful.
4. Any documentation of historic irrigation place of use to show total irrigation at a given point in time.

Please call me when you plan to come to Twin Falls so I can arrange to be here. I do believe it is necessary for us to discuss this in person rather than by phone. Please let me know if there is anything I can do to assist you in preparing for our meeting.

For your information, the Transfer pending on Mr. Starks behalf will be delayed until these claims are resolved to allow for an accurate analysis of the Transfer as proposed.

Dear Steve,

Thank you for taking time to answer my questions concerning irrigation water rights and your field exam of 1993. Our area of concern is the 40 acres in the SW1/4 of the NW1/4 of Section 12, T13N R 19E, and our shares of water from the Challis Irrigation Company.

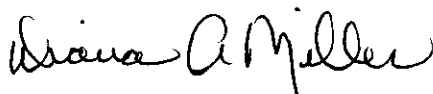

The following is the chronology of events concerning the irrigated acres within the forty acres described above:

1. In 1981 George Gentner purchased this acreage from Watson Perry and platted a subdivision.
2. Through the following years it was flood irrigated and pastured by Harold Charlton.
3. In July 1987 Jim Peninger bought 5 acres with the shares of water to irrigate this acreage. Peninger later bought another acre with water rights. All of which he irrigates and pastures.
4. In the fall of 1992 Harold Charlton purchased approximately 13 acres from George Gentner within this quarter (SW of NW).
5. In the summer of 1993 Charlton cultivated, planted, ditched, and corrugated this thirteen acres.
6. In February/March of 1997 I, Diana A. McCurdy Miller, purchased 5 acres with water rights from Harold Charlton.
7. In December of 1997 William and Glenda Lindsey purchased 7 acres with water rights from Harold Charlton.

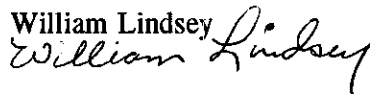

Enclosed is the 1978 aerial flight map of Section 12 T.13N, R19E, with the acres in question marked.

RE: SRBA CLAIM REVIEW

DEAR GARY,

Thank you again for meeting with me yesterday to resolve the place of use for irrigation of the CIC. I reviewed the claims and documents on file after our meeting and finally arrived at some possible rough draft ideas for you to consider.

As we discussed I think there is sufficient documentation to support the diversion rate in use is about 123 cfs; as measured at the parshall flume. With the results we developed, 3008 acres irrigated, the per acre rate of application for the whole system is 0.04 cfs (123 cfs/3008 acres). I think this is very accurate since some flood users apply more than that rate while sprinklers apply somewhat less based on their relative efficiencies.

The challenge I have is how to make the existing rights, new permit and SRBA claims all fit to show the water use as it exists. Here is the solution I finally came to; keep in mind it is a rough draft and some numbers will vary in the final version.

CIC Summary of Rights:

Old rights	1311 acres	77.5 cfs	(0.06 cfs/ac.)
1967 claim	290	17.4	(0.06 cfs/ac.)
72-07051 permit	1324	26.48	(0.02 cfs/ac.)
72-07269 lic.	83	1.2	(0.014 cfs/ac)
=====		=====	
	3008 ac.	122.58 cfs	(0.04 cfs/ac.)

Some notes of clarification:

- 1.) The Old rights are 72-02076 A & B, 72-00034, 72-00035 and the acres are determined after eliminating the acre overlap between rights. These figures are not going to change.
- 2.) The 1967 claim, a yet to be filed SRBA claim to cover some of the canal expansion that occurred in 1967. It will cover the acres found below the canal system that were developed using a gravity irrigation system (0.06 cfs/ac.).

COPY

Challis Irrigation - page 2

3.) The pending permit will cover most all the acres above the canal that are using sprinkler rates and is limited to 0.02 cfs/acre as filed in the requested permit.

4.) License 72-07269 appears to have been assessed as additional appropriation of water and not an expansion as I believed earlier. This still needs further research (by me) to be confirmed absolutely.

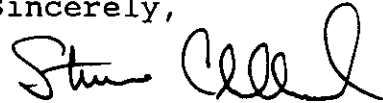

5.) The SRBA claim A72-11740 will be an expansion on the Stark property for the acres found by GIS in section 26, near the river.

This will be better shown after I have prepared the GIS maps for the area. The GIS review will determine a final acre count for the system as we discussed and that will be used in completing the correct numbers in the above chart.

What you need to do:

1. Send me a copy of the Permit exam for 72-07051, for clarity.
2. Gather Evidence of Priority for the 1967 SRBA Claim. (See Brochure)
3. File a beneficial use claim for the 1967 canal enlargement. Wait awhile on this so I can be sure of the Permit 72-07051 approval. There will be a \$50 fee for this also.
4. Other? Can't think of anything else at this time.

Sincerely,

STEVE CLELLAND
Sr. Water Resource Agent

RE: DIVERSION RATES & SPILL RIGHTSDATE 2-18-92

NAME OF PARTY

GARY CHAMBERLAIN

(879-4417)

I took this call and answered some questions & concerns of Mr. Chamberlain.

① Their Diversion structure in the Salmon River has substantial seepage loss at the river. He was wondering if he should file on the extra amount needed to push out their rights as delivered. I told him it doesn't sound as though they divert the extra water from the river, since it flows right back in. I think the key issue will be the point at which their water right is measured and considered "~~del~~" Diverted from the River."

② On the other end of the canal they have for the last 10-20 years, spilled water back into Salmon River via Hot Springs Creek. Apparently, a couple years after they began this practice (to accommodate the pumps used on the canal) a water user in the Hot Springs Creek Built-a-Dam and began to complain about the return flow to the Salmon River for the Canal system. The Dam is owned by Robert Hammond under WR-72-04041. It is 6-8' tall with a concrete spillway. Mr. Hammond has threatened the Canal Co. with lawsuits for years. (Proof Report Attached)

RE:

GARY CHAMBERLAIN

APPT

COO ON CIC

He brought in the draft document to convey the COO to CIC from the private parties as drafted by Rosholt. He wants me to review the info and see if it is all there and will the doc work to meet the needs of the COO. I faxed the form to our legal staff and they approved it as a workable form. I found a couple missing rights to be converted.

2:00 PM - Gary returned to discuss the findings. We agreed upon the following rights to change:

Hansen -230 & -4010
Ingram -242
R. Hunt -4192A & B
Winter -186B
Sullivan -186 A & -187B
Bennetts -184
Schowengerdt -4192C & -10235
Bauchman/Chivers -185A & -10120

There is some problem with another right that is part of this - Malone 72-00185; He is not a shareholder since he has so little of a right. Minimum share in the canal is 30 inches. I think this needs to be addressed and dealt with by the CIC since he is part of the system.

I will need to follow up on the missing permit for CIC; defer to Tuthill to get the process finished. Also need to track down the Chivers COO and POD Transfer... callback to Gary C. with all the findings or results.

I told him Hunt has already filed the COO removing his dad's name from the rights. He has not filed any type of protest against the recommendation; he did not file a Notice of Error or Objection with the court. Gary says he claims to have filed them timely. I will check the paper file to be sure it is not listed there.

TRANSFER NO. 4900
WATER RIGHT NO(S). 72-00185A/72-10120

CONDITIONS OF APPROVAL AND REMARKS

1. After specific notification by the department, the right holder shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
2. This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- *** 5. Right 72-00185A is limited to the irrigation of 86.0 acres in the place of use described above in a single irrigation season.
- * 6. Rights 72-00185A and 72-04222A when combined shall not exceed a total diversion rate of 5.37 cfs, a total annual maximum diversion volume of 301.0 af at the field headgate, and the irrigation of 86.0 acres.
- ** 7. Rights 72-00185A, 72-04222A and 72-10120 when combined shall not exceed a total diversion rate of 18.61 cfs, a total annual maximum diversion volume of 784.0 af at the field headgate, and the irrigation of 224.0 acres.
8. Approval of Transfer 4900 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
9. All water rights within Basin 72 are from connected sources of water in the Snake River Basin and shall be administered conjunctively.

Dated this 12th day of May, 1999.

Chief, Water Allocation Bureau

MEMORANDUM

TO: Files 72-00185A & 72-10120 (Combined Rights 72-00238/00240/04178)

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 4900

DATE: May 11, 1999

Transfer 4900 changes the point of diversion[✓] under Rights 72-00185A and 72-10120. The applicant is changing the point of diversion and consolidating delivery with the Challis Irrigation Company canal system.

Right 72-10120 is a combined right for Rights 72-00238, 72-00240 and 72-04178, which was a combination of the original decreed rights. The transfer application identifies the decreed rights and represents the same system as recommended under Rights 72-00185A and 72-10120 in the SRBA. The transfer approval reflects these recommendations.

Season of use and diversion volume was adjusted to current standards. The place of use was modified to reflect the SRBA recommendation of 224.0 acre permissible place of use. Other recommended conditions include permissible place of use limits, combined right limits, right-of-way, future measuring & annual reporting, irrigation overlap and standard transfer conditions.

RE: Transfer of Chivers Water Rights

Gentlemen:

As purchasers of Garth and Glennis Chivers property (Chivers), Stephen and Lyndella Bauchman d.b.a. as Challis Creek Cattle Co. (CCCC) have transferred ownership of Chivers water rights as indicated below:

<u>Right #</u>	<u>Priority</u>	<u>CFS</u>	<u>Water Source</u>
72-0185A	4/1/1887	10.0	Salmon River
72-10120	6/1/1890	9.6	Salmon River
72-0422A	6/1/1951	4.0	Warm Spring Cr.
72-2097A	10/17/52	.6	Rock Spring

Additionally, rights retained under the original Challis Irrigation Canal were also transferred. The amount of this right under the Canal is asserted to be approximately 10.5 shares by the Chivers. According to the records provided by the Chivers this consists of an original amount evidenced under right 72-4178 and additional rights purchased through the canal.

In 5-13-1999 water rights [excluding 72-2097A] were transferred to the Irrigation Canal as the delivery system. Accordingly, these rights are being transferred through the Idaho Department of Water Resources. Said rights are listed as a part of the total number of shares in the Canal Co. These shares should be transferred into our name. If

you have information that is contrary to that purported herein, please furnish written documentation to the contrary to the address listed above.

Under the terms of the purchase agreement between Chivers and CCCC, 3.5 shares were transferred back to Chivers for consideration. Furnished as an attachment is an agreement, drafted by counsel, between the parties stipulating ownership of the shares and the legal description of use. This should provide the Canal Company with the necessary information to correct your records, and provide notice as necessary. It is our understanding that the ownership of the original Challis Irrigation Canal shares will not be transferred until the SRBA is settled. We would like to know the reason that this cannot take place immediately. Furthermore, once transfer can take effect it is our intention to transfer additional shares to Charlene Miller to accompany property sold.

You should have in your possession a power of attorney for Troy Ziegler to conduct business on behalf of CCCC. We would appreciate a change of address for notice of business to Challis Creek Cattle in place of the Chivers.

Sincerely,

A handwritten signature in cursive script, reading "Stephen Bauchman". The signature is written in black ink and is positioned below the word "Sincerely,".

RE:

ISSUES AT CIC

He called to confirm he needs to sign the Amended Permit and I told him yes he should; the license is being issued as needed to fit in the full SRBA review.

He asked about the use of CIC shares on the old Ingram place, now owned by Al Morganroth. He says Morganroth now wants to get back the shares that were given up by Ingram in 1983-84 when the earthquake increased the flow of the Warm Spring. I asked who is using the shares now and Gary said no one, they are sitting in the desk waiting for someone to use them. We discussed the possibility of an increase in the flow rate of the canal and I said no; the flow is already at it's peak measured flow as historically documented. Therefore any increase would be a new development. It would appear other parties have been using the water for their share deliveries if the water is not available for the Ingram shares.

I told him a generic approach, if it is possible, is to file an Objection to all the claims, then file an Amended Claim and we could then develop a second recommendation based on the documentation you have supplied. I need to discuss this with our attorney before I can comment on what is necessary in this case.

Call back at 879-4417.

RE: Update to GIS Map of Non-CIC Acres

Dear Gary,

Enclosed is the updated version of the GIS map showing the location of the Non-CIC acres in yellow. The green striped area with red outline to the east is the area under the existing CIC boundary. Let me know if you notice any errors in this copy.

Please note the areas I left out before are already within the CIC boundary (the 39 and 33 acre shapes in the upper right) and that is why they were left out before. Hopefully this illustrates the overlap in a better way.

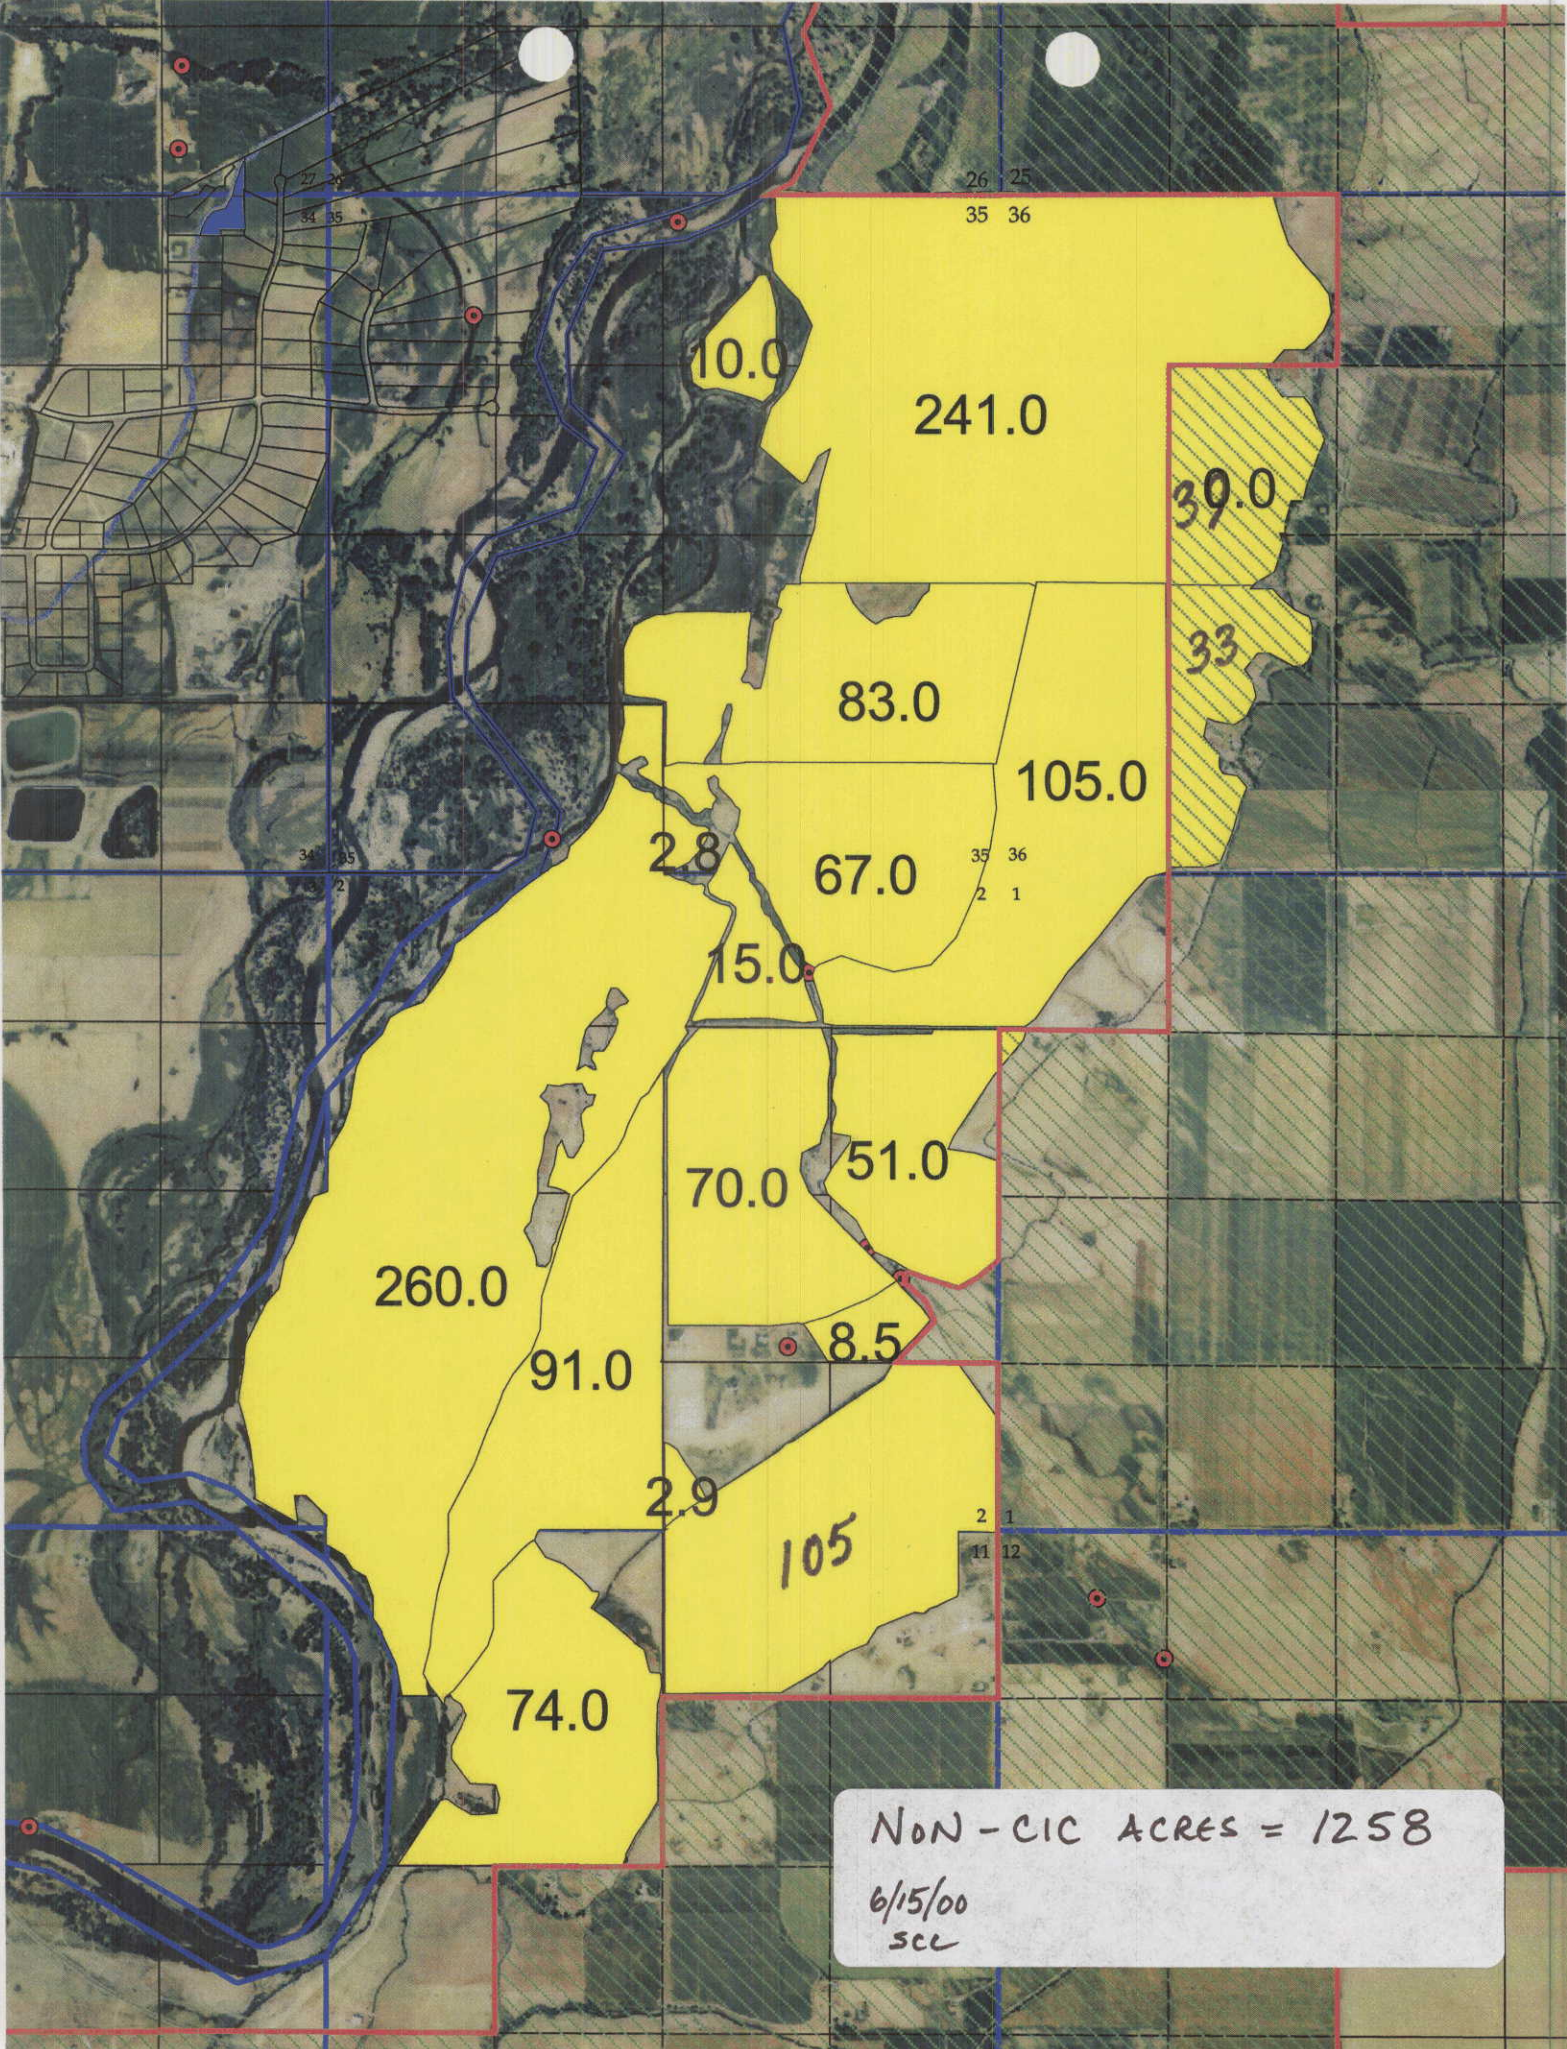

If you have any further corrections or questions please contact our office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Clelland'.

IDWR Employee/Agent STEVE CLELLAND Date 8-16-94Contact Person(s) STEVE ZETZLENature of Contact Called to ask about Adjudication.

Substance of Communication He said he knows nothing of the
AJ process. He bought the Gene Westergard property, about
55 Acres of alfalfa. He has shares in Challis Irr. Canal.
I explained the Challis Irr. Co. has filed their
claims for the Water Rights and from my initial
review they have complied correctly with the SRBA.
He asked what I think? I told him about
the gag order from the Court. He asked will
he be farming 10 years from now? I said
probably so, there are some well established rights
under the Challis Irr. Co. Suggested he watch the
events that will unfold around the Water Users & be a
part of the process.
