

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Renumbered to A21-04173

Ident. Number: ~~A31-04132~~

Date Received: 8/09/1988

Receipt No: E001147

Received By: SW

AMENDED

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

AMENDED

1. Name: MARGARET HAGENBARTH 406-683-2163
Address: P.O. BOX 1128
DILLON, MT 59725
OR
Name: DAVID J. HAGENBARTH 406-683-2163
Address: P.O. BOX 1128
DILLON, MT 59725
OR
Name: JAMES F. HAGENBARTH 406-683-2163
Address: P.O. BOX 1128
DILLON, MT 59725

2. Date of Priority: NOV 10, 1893

3. Source: KICK CREEK Trib. to: SINKS

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4	Lot	County
13N	40E	11	NW	SW	NE		CLARK

5. Description of diverting works:
DIKE, DITCHES FOR SUB/FLOOD IRRIGATION

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION	04/01	11/01	3.500		
STOCKWATER	04/01	12/31	0.230		

7. Total Quantity Appropriated is:
3.500 C.F.S. (and/or)

A.F.A.

8. Total consumptive use is 574.5 Acre Feet Per Annum.

9. Non-irrigation uses:
S/1000 RANGE CATTLE

10. Place of Use:

Township	Range	Section	1/4 of	1/4	Lot	Use	Acres

Receipt E001147

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that Margaret Hagenbarth, David J. Hagenbarth, James P.
(Name of Claimant) Hagenbarth

P. O. Box 1128 Dillon, MT 59725 Telephone No. 406 683-2163
(Mailing Address) (Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

- (1) Date of priority: (When was the water first applied to a beneficial use) October 1, 1943

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)

Kick-Creek tributary to sinks

- (3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

	(cfs, gpd, AFA)	(Domestic, Irrigation, Stock, Etc.)	(Both dates inclusive)	
			(Mo., Day)	(Mo., Day)
Quantity	<u>3.50 cfs</u>	Use <u>Irrigation</u>	Period of Use From <u>5/1</u>	To <u>10/31</u>
Quantity	<u>.05 cfs</u>	Use <u>Stockwater</u>	Period of Use From <u>6/1</u>	To <u>11/30</u>
Quantity		Use	Period of Use From	To
Quantity		Use	Period of Use From	To
Quantity		Use	Period of Use From	To

- (4) 3.55 cfs TOTAL QUANTITY USED.
(cfs, gpd, AFA)

- (5) A) Point of diversion: (Location of point where water is diverted from its source)

SW ¼ NE ¼, Sec. 11 Twp. 13N Rge. 40E B.M., County of Clark

Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. Dike 5 feet high & 6 feet wide diverts water into ditch with course running west for 1 mile. Ditch splits-one ditch runs east 3/8 mile into series of dikes, other ditch runs southwest 3/8 mile into main ditch.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼

RE: EVIDENCE OF PRIORITY

Dear Claimant(s):

The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

EVIDENCE OF PRIORITY

Page - 2 -

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel.

The Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by MARCH 9, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Eric Verner
Senior Water Agent

A F F I D A V I T

STATE OF MONTANA)
ss.
County Of Beaverhead)

James F. Hagenbarth, being first duly sworn upon oath,
deposes and says:

That I am of legal age and a landowner in Clark County,
Idaho. Under Idaho Law (Idaho Code 42-243) I am required to
record any surface water put to a beneficial use by me or my
predecessors before May 20, 1971, if said use is unrecorded.
It is my intention in the affidavit to claim a water right
which was established by my predecessor, D. V. Hagenbarth.
As a claimant of this water right and also the person completing
the required form, I will attest to and explain the proof
presented.

A brief history of the water and the land on which it is
beneficially used is vital to understanding the evidence presented
to substantiate this claim. In the late 1930's, my Father, D. V.
Hagenbarth, began acquiring land throughout Clark County. He
put together a livestock operation that was based in Clark
County, Idaho in the summer and Beaverhead County, Montana in
the winter. In the early 1940's Mr. Hagenbarth began to improve

MICROFILMED

NOV 17 1992

undeveloped rangelands in the Sheridan Creek and Antelope Flat Areas of Clark County (T13N,R39E & T13N,R40E). This improvement consisted of eradicating sagebrush and wyethia and developing an irrigation system which would put the available water to beneficial use irrigating these reseeded rangelands.

In the above described area of Clark County, the snow pack is quite heavy as is the spring run-off. During the spring run-off, every draw carries a flow of water, some flows larger than others. This early water lasts only for a few days. In this area there are only two creeks that maintain a yearlong flow to downstream users, Sheridan Creek on the east and Ching Creek on the west. The distance between these two creeks is 9.5 miles. Between the Sheridan Creek and Ching Creek drainages, the only creek of record which delivers water to the downstream users is Dry Creek. Dry Creek supplies high water to the Camas Creek drainage in District #31. Said right ceases when Dry Creek no longer flows into Spring Creek. Dry Creek usually ceases to flow into Spring Creek by mid June. Other than Dry Creek, several small streams lie between Sheridan Creek and Ching Creek. These streams are Scalp Creek, Moose Creek, Mud Creek, and Kick Creek. Scalp and Moose Creek are in the Camas Creek drainage and have filings on their flows belonging to me. Mud Creek and Kick Creek are in the Sheridan drainage and there are no filings of record on their flows. Except for a few days in the spring during peak run-off, the flows of these named streams never are tributaries to either Sheridan or Camas Creek on a regular basis. Several small springs lie between Sheridan Creek and Dry Creek and these spring's flows are never tributaries to Sheridan Creek. The fact that the flows from these small streams and springs never reach a live stream on a regular basis is very common in this area because of the porous soils and the vast lava fields. Consequently, with the exception of Dry Creek, all the sources of water between Sheridan Creek and Ching Creek are tributaries to sinks. I own two recorded rights on Dry

MICROFILMED

I-NOV 1 / 1992

Creek, #31-2274 and #31-2275. The water used under License #31-2275 supplements water claimed in this filing.

The water being claimed in this filing is put to beneficial use by a sub-flood irrigation system installed by my Father in the early 1940's. This system is centered around a large heavily diked low gradient ditch which begins at a diversion on Dry Creek in Section 9, T13N,R40E and meanders easterly through Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Several secondary low gradient dikes and ditches were constructed to further disperse the water throughout the lands serviced by this system. The slow moving water in these ditches, along with several permanent and temporary dams or dikes, forces the system's water out onto the surrounding lands in a sub-flood combination. This system was designed to handle both large and small flows of water efficiently and with little labor or maintenance. When the spring run-off ceases, this system combines small flows from several sources and uses them more efficiently than if each source was used by itself.

In Attachment B of this filing (Paul Gneiting Affidavit), Mr Gneiting attests to the fact that he helped Mr. Hagenbarth construct this system in 1942 and 1943, and that the system was completed in September of 1943. It becomes obvious that the unrecorded sources of water diverted and used by this system were diverted no later than October 1, 1943. Therefore October 1, 1943 is the date of first use or priority date in this filing.

In Attachment B, Mr. Gneiting also explains the system and how it works. He mentions further that the sources of water used by the system decrease in flow radically after spring run-off and barely reach the system. This would substantiate that these flows of water are absorbed by the surrounding lands and are therefore tributaries to sinks.

The water which flows into this irrigation system is not only put to beneficial use for irrigation, but also stockwater. The main ditch crosses several pastures and the livestock use this water.

I-5
MICROFILMED
NOV 17 1992

The use right claimed in this filing is for water which flows in Mud Creek and is diverted into the main supply ditch in the SENWSE of Section 10, T13N, R40E. Mud Creek is a small creek with a drainage limited to Section 3 and the N $\frac{1}{2}$ of Section 10 in Township 13N, Range 40E. The flow from Mud Creek supplements the other sources of water for the entire system and is used to irrigate and supply stockwater to lands below the main ditch, land lying south and east of Mud Creek. The place of use is clearly identified on the claim form and on Attachment C (map). The place of use is owned by the claimants. Attachment C was included to give a better understanding of how the system is geographically laid out and works. This map enables one to more accurately describe the entity of the system. The flows claimed for irrigation from Mud Creek are the maximum early spring flows used by the system. These flows decrease considerably as previously indicated.

After a careful analysis of the above mentioned attachments and an understanding of the history and use described, it becomes obvious that Mud Creek's flows were put to a beneficial use by D. V. Hagenbarth via the sub-flood system described above. The use of Mud Creek's flows began on October 1, 1943 and has continued into the present. As successors in interest to D. V. Hagenbarth, the claimants, Margaret Hagenbarth, David J. Hagenbarth, and James F. Hagenbarth, have the right to claim and use this water for irrigation and stockwater as provided for under Idaho State Law.

James F. Hagenbarth
James F. Hagenbarth

Subscribed and sworn to before me this 2nd day of March, 1984.

Attachment B

A F F I D A V I T

STATE OF MONTANA)
ss.
County of Beaverhead)

Paul Gneiting, being first duly sworn upon oath, deposes and says:

That I am sixty-nine (69) years of age and now a resident of Silver Bow County, Montana, and make this affidavit at the request of the Hagenbarth Family relative to the history and use of irrigations waters in the Sheridan Area, Clark County, Idaho. On September 26, 1983 I made an inspection trip to the Sheridan Area to ensure that the facts addressed in this affidavit are accurate in relation to the irrigation system I helped install in the early 1940's.

In the spring of 1938 I came to Glen, Montana and was employed by D. V. Hagenbarth, who at that time was managing Consolidated Farms in the Glen Area and also owned lands in Clark County, Idaho. The first years of my employment were spent in the general operation and development of Mr. Hagenbarth's ranches in Montana and in Idaho. During the 1950's and until 1959, I assumed management of Mr. Hagenbarth's ranches in Montana. I was employed by Mr. Hagenbarth until the spring of 1959 when I purchased a ranch north of Melrose in Silver Bow County, Montana. I still own and operate this ranch.

During the spring, summer, and fall of 1942 and 1943, I assisted Mr. Hagenbarth in developing an irrigated pasture system in the Sheridan Area. This development work included reseeding and installing a sub-flood irrigation system in Sections 10, 11, 12, 14, and 15 in Township 13 North, Range 40 East, B.M.

MICROFILMED

NOV 17 1992

irrigation system was designed to handle the heavy spring run-off and also the waters which flow from Dry Creek, Mud Creek, Kick Creek, and several springs which lie in Sections 10 and 11 in Township 13 North, Range 40 East. The construction of this system was completed in September of 1943 and the sources of water were turned into the system.

A heavily diked slow moving ditch was used to carry the majority of the water from its sources. This main ditch began in Section 9 at a diversion on Dry Creek and had a course which ran easterly across Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Below this main ditch several dikes and secondary slow moving ditches were constructed to spread these waters throughout the pasture system. On Kick Creek I constructed a dike and diverted Kick Creek's flow into ditches which irrigated lands lying above the main ditch in Section 11, T13N, R40E. The waste water then flowed into the main ditch and throughout the remainder of the system.

This irrigation system was designed to spread the available water in slow moving ditches throughout the pasture system. The water in these ditches would sub-irrigate the surrounding lands, especially when dams were installed at various locations to slow the flow and make the ditches bank full. This sub-flood system was designed to handle large or small amounts of water with a minimum of labor or maintenance. After the spring run-off, the amount of water available from the various sources sharply declined, and the system picked up those small amounts and pooled them so they could be used effectively.

It was my observation while working in the Sheridan Area in the 1940's, that the sources of water used by this irrigation system, especially Mud Creek and Kick Creek, radically decreased in flow shortly after the spring run-off. The flows of Kick Creek and Mud Creek barely made it to the main ditch by summer's end.

After my trip to the Sheridan Area in the fall of 1983, it was evident to me that the system is still being used as

I constructed it in the early 1940's. There are a few minor changes because of the construction of a new road through the area, but these changes are insignificant.

RE: Hagenbarth Dry Creek-Sheridan Creek
Water Delivery System

I am representing the claimants in the filing of their water rights in the Snake River Basin Water System. The claimants are Margaret Hagenbarth, David J. Hagenbarth and James F. Hagenbarth.

The claimants' predecessor, Father-in-law and Grandfather respectively, F. J. Hagenbarth, diverted waters of Sheridan Creek and Dry Creek on September 24, 1912. Part of this water was licensed for use on lands now owned by the claimants. As testimony to the above facts, see Warranty Deed filed on July 17, 1944 in Book 12 of Deeds at page 319 in the Clark County Clerk and Recorder's office and also water license # 8990/21-2054 on file with the Department of Water Resources. The deed clearly proves the claimants' control and ownership of 590 acres which were claimed as place of use by F. J. Hagenbarth in License # 21-2054. Since the claimants' predecessor, D.V. Hagenbarth, passed ownership of the above described land to the claimants via an estate, it follows that 590 miner's inches (11.8 c.f.s.) from 21-2054 belong to the claimants. Also note on Sheet #2 of the diagram on the water license that the original points of diversion are identical to those the claimants use at present. Please note on Sheet #2 that the Dry Creek source includes both the east and west forks and note the three canals leaving the point of diversion, one with a southerly course and the other two with easterly courses, but one lying more northerly. Note on sheet #2 the pond which lies in Lot 7(SWSW) of Section 6, T13NR41E. This pond is identical to Morrain Springs which is a tributary to Sheridan Creek and is the Sheridan Creek source diverted by the claimants. The point of diversion used by the claimants for Morrain Springs is identical to Sheet #2 and lies in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 6, T13NR41E. There is no question that the sources and PD's identified in this filing are identical to the sources being used by the claimants presently.

In 1943 my Father, D.V. Hagenbarth finished construction of a water delivery system which pooled the waters from many sources in the area and put the waters to an even greater beneficial use. The system is a sub-flood irrigation system with slow gradient ditches capable of handling and distributing either large or small flows of water. Mr. Hagenbarth applied for additional water out of Dry Creek as evidenced by licenses #31-2274 and #31-2275. As the years progressed this system has developed so as to put water from 8 different sources to a beneficial use on lands owned by the claimants. This use is a result of utilizing the waters from 12 different water rights on lands lying both north and south of Sheridan Ridge in T13NR40E. Of these 12 water rights, six are licenses and 6 are claims based on use. The sources are Dry Creek, Woody Headquarters Spring, Headquarters Spring, two unnamed springs, Mud Creek, Kick Creek, and Morrain Springs. Each source contributes to the water delivery system,

MICROFILMED

NOV 17 1992

(continued-Hagenbarth water delivery system)

but will have an independent land list depending upon where the source enters the system. The total system includes 1274 acres. 1092 acres will be attached to the Dry Creek sources, an additional 163 acres will be attached to the Kick Creek filing and the remaining 19 acres will be included with Morrain Springs.

Water right #21-2054 will be separated into two rights so that those waters diverted by said right from Dry Creek will be separate from those waters diverted from Morrain Springs. By doing this it will return each right to its respective district so the user can be billed properly and the rights can be regulated correctly according to priority dates. Morrain Spring is in District 21 and Dry Creek is in District 31. 8.00 c.f.s. will be claimed for Dry Creek and 3.8 c.f.s. for Morrain Spring via 21-2054.

All the sources except Morrain Springs have the same characteristics as most creeks in this area in that the spring flow is tremendous and the summer flow is very minimal, consequently the total c.f.s.'s appropriated seem rather large for the place of use in regard to one miner's inch per acre. This maximum use is short lived. In early spring the maximum flow of water claimed has been used on the lands designated, but only for a short period of time. Later on in the summer it is not unusual for only stockwater to be available.

These comments will be included in each of the filings on all the sources of water that are put to beneficial use by the water delivery system constructed by D.V. Hagenbarth. Included with many of the filings are separate comments dealing with each individual source.

Sincerely,

James F. Hagenbarth

RE: Hagenbarth Dry Creek Use Right
Dry Creek-Sheridan Creek Irrigation System

7/26/1990

I, James F. Hagenbarth, am responsible for filing the water rights for Margaret Hagenbarth, David J. Hagenbarth, and myself, James F. Hagenbarth, under the Snake River Adjudication. As I researched each right I learned more about how all the rights are interrelated and how each right developed to the way it is used beneficially today. As I researched the Suave Decree and the water records in Clark and Fremont Counties, it became evident that many of the water rights on Dry Creek and the drainages east to Sheridan Creek are more numerous and were used by my predecessors much earlier than I realized and originally filed on. Consequently I am required to amend the appropriate filings to reflect the findings of fact revealed by my research and also make one new filing on Dry Creek to reflect a use right which was developed in 1893 and used ever since. The problem with Dry Creek is that it lies on a flood plain which flows both to the Camas Creek drainage and the Sheridan Creek drainage. Water which was diverted from Dry Creek to the Sheridan drainage has not been covered or addressed by the Suave Decree or the Sheridan Creek Decrees or the respective watermasters, even though there have been documented continuous use and licenses issued and in good standing. It is my intention to file a use right on Dry Creek which reflects the continuous use my predecessors and myself have made on Dry Creek since 1893 to insure that this water right be addressed by the Snake River Adjudication and given the legitimacy it has had since 1893. In 1893 Chris Sorenson and Geo. L. Wall filed on a total of 1000 inches of Dry Creek water and used it on land now irrigated from Dry Creek and owned by the claimants. Both men mentioned that their land included the original Bianches and Rainville Desert entries. Bianches and Rainville filed on water in the area in 1890, but the descriptions were such that I chose to use Sorenson's and Wall's filings because of better accuracy. These Sorenson and Wall filings can be found in the Clark County Water Locations Book at pages 25 and 183 respectively. The Wall and Sorenson notices give an accurate description of land, the same land where the water is used today. I have chosen to combine these two filings and use the later priority which would make just one filing. Geo. Wall filed on Nov. 10, 1890 and this is the priority I am claiming. Sorenson filed in August, 1893.

In 1902 Harry Dunn filed for Dry Creek water on land owned by the claimants and this filing is recorded on page 104 of the Clark County Water Locations Book. In 1908 Harry and Helga Dunn and E.T. and Anna Underwood transferred land and Dry Creek water to Wood Live Stock and F.J. Hagenbarth. This is recorded in Book 2 of Deeds, page 112 and Book 2 of Deeds, page 114 in the Clark County records respectively. Dunn and Underwood were issued patents on the land Sorenson and Wall used Dry Creek water on in 1893 and the claimants are using Dry Creek water on

today. On September 6, 1928 during the testimony for the Suave Decree, in Volume VIII, pages 1746-1755. Mr. F.J. Hagenbarth testified that Dry Creek water was diverted toward Sheridan in 1889 and has been continuously used to the present (1928). Mr Hagenbarth then describes how Dry Creek flows into two drainages, Camas and Sheridan, and then speaks about the Harry Dunn use right and how Dry Creek water was used to irrigate land lying east of Dry Creek. In the 1930's the Wood Live Stock Company went broke and John Stringer purchased the land now owned by the claimants. In the 40's Stringer sold to my Father, D.V. Hagenbarth, the land claimed in this use filing. As mentioned in earlier affidavits and information, in the early 40's D.V. Hagenbarth extensively developed a sub-flood system to more beneficially use those Dry Creek waters diverted away from the Camas Drainage. This sub-flood system has continuously been used to the present.

In summary there is no question that Dry Creek water has been diverted and used beneficially by the claimants and their predecessors continuously since Nov. 10, 1893. The fact that Dry Creek is tributary to two drainages explains the reason why water from Dry Creek used on land in the Sheridan drainage was not covered either by the Suave or Sheridan Decrees. The same holds true for a portion of water right #21-02054 which is being filed by the claimants via A31-10245. Since the claimants are irrigating a total of 434 acres in Sections 10, 11, 12, 14 and 15 in T13N40E using Dry Creek water, the same land and water claimed by Sorenson and Wall, we claim a use right of 434 miners inches or 8.68 cfs with a priority of Nov. 10 1893. Said right is diverted from Dry Creek in the NENWSW os Section 9, in T13N, R40E. Water from this right is pooled with all the other rights claimed from Dry Creek and used on all the 1092 acres listed as place of use. This use and irrigation system is explained in an earlier document. Total use of Dry Creek water should not exceed 1 miners inch/acre or 1092 total inches with said amount being filled starting with the earliest priority and proceeding to the latest until the rights are filled.

In the Snake River Adjudication the claimants have previously made use filings on several small water sources which flowed into an irrigation system constructed by D. V. Hagenbarth in 1943. A 10/01/43 priority was claimed. After completing the above research, it became evident that the claimants' predecessors Sorenson and Wall had an irrigation system which intercepted these small sources and put them to beneficial use much earlier than the claimants originally filed for. Consequently the claimants will amend six use claims (A31-04129 to A31-04134) and change the priority date from 10/01/43 to Nov. 10, 1893.

Sincerely,

James F. Hagenbarth
