The map is a topographic representation of a region in Idaho, centered around the Portnevo River. Key features include:

- Geographic Features:** The Portnevo River flows diagonally from the upper left towards the lower right. To the west of the river is a large area labeled "T 7 S". To the east, the "Blaine Municipal Golf Course" is partially visible. Several parks are marked: "Rainey Park", "Tracker Park", "Rose Park", and a "Cem" (Cemetery).
- Infrastructure and Landmarks:** A "Water Tank" is located in the upper left, and a "Well" is marked in the lower left. A "Point of Diversion" is indicated on the river with an arrow pointing to a specific spot. A "Place fuse 2" is also marked on the river.
- Administrative and Survey Data:** The map is overlaid with a grid. Sections 15, 6, and 7 are labeled. A prominent diagonal line is labeled "R34E". The boundary between "BLAINE" and "PORTNEVO" is shown. Various spot elevations (e.g., 4495, 4520, 4530, 4552) and benchmark elevations (e.g., BM Pocahontas 4788) are noted.
- Handwritten Annotations:** In addition to the printed labels, there are handwritten notes: "Place fuse 2", "T 7 S", "Point of Diversion", and "R34E".

There is a seepage and small springs about one-half mile above my house and barn in canon directly above my land, an opening on same which water at present sinks in gravel. This water I wish to develop by tiling or otherwise and pipe to house and barn for domestic use, and irrigation. I also wish to claim all flood waters or flow of the canon not already appropriated, when those sources fail, I want to pump from Fortneut River water sufficient to irrigate crops on land as described. Referring to "8" I expect it to take considerable time and expense to lay tile for seepage as out in some places are probably ten or twelve feet deep. Referring to "4" - the diversion of water from canon is near the southwest corner of the lot four, section one, which is my own land. The pump is also on my land as indicated by plat. The pipe line from the springs will run parallel to the bed of canon approximately. Amount of water claimed from Fortneut River is (3 4) three-quarters of one cubic foot. The amount of water claimed from the springs is 0.12 sec. ft. The springs in question are located on the Montello Forest Reserve. There is no land between mine and the Forest Reserve.

APPROVAL OF COMMISSIONER OF RECLAMATION

Mr. C. S. Lamb,
Pocatello, Idaho.

Dear Charlie:

We are enclosing letter concerning your
Permit No. 15953 from the Reclamation Commissioner.

It would seem that your permit claims two different sources of water in two different amounts. The only one which is material to you, in so far as the State Engineer's office is concerned, is the one from Portneuf River. In view, also, of the fact that the only party ahead of you is the Twin Falls Canal Company on the Snake River, we question very much whether you should go to the expense of obtaining a water license. The fact that you have been using the water establishes a right although it will give you a different priority date than if you completed your application for water through the State Engineer's office.

Under the circumstances, our advice to you would be to permit your permits to lapse as you would gain nothing whatever by obtaining a water license. You should, however, retain in your files the letter which we are enclosing.

Yours very truly,

TCC:BMA
