The diagram illustrates the experimental design. It shows a sequence of steps: a stimulus is presented, a response is recorded, and a verbal report is provided. The response and report are then compared to the stimulus. The diagram is divided into two main sections: 'Stimulus' and 'Response/Report'. The 'Stimulus' section shows a word 'cat' and a picture of a cat. The 'Response/Report' section shows a response 'cat' and a report 'cat'. The response and report are then compared to the stimulus.

SYSTEM DESCRIPTION:

Surface water is diverted from Walker Creek into a 2' wide .5' deep private ditch. Water is conveyed by ditch through a culvert passing beneath a county road. Acreage is gravity flood irrigated by a network of ditches.

REMARKS:

System shown & described by Raymond Girard. Std rectangular weir was present but had been temporarily removed. Girard's diversion point is just on the creek and is situated adjacent to Herdicks. As Herdicks has the prior right the water is turned out of Girard's diversion when Herdicks needs the water.
