KEROSENE, GASOLINE, GAS, DISTILLATE, OIL ENGINES

KANSAS CITY, Mo. Dec. 10, 1917.

Mr. Oscar C. Peterson,
Hollister, Idaho.
Dear Mr. Peterson:

I want to thank you for your order which just came in, and wish to express my appreciation of the confidence you have placed in the WITTE engine.

Your order will be given personal attention and extreme care will be taken to see that the shipment is properly packed, well crated and leaves here in first-class condition. It should reach you in good shape, but if anything is damaged in transit, you are protected by our Safe Delivery Guarantee, if you will have the freight agent make full notation of any damage on expense bill before receiving shipment; then my Service Department will replace the damaged parts and file claim for same.

A complete illustrated book of instructions is included with the engine. A great deal of time as well as expense entered into the making of this Book in order that the user might have at hand all information for installing, starting and operating. I want you to read it carefully and get acquainted with operating parts of the engine and their uses.

Do you happen to know of anyone wanting an engine? If so, please drop me the enclosed postal card, with the names and addresses. I will greatly appreciate it. Again I wish to thank you for your kindness. Feel free to write me at any time.

Sincerely yours,

RE:
PROOF OF PRIORITY

THEY CAME IN WITH SOME OLD ENGINE DOCUMENTS AND SAID THE ENGINE WAS USED TO RUN THE WELL PUMP. HOWEVER, NOTHING IN THE INFO SUPPORTED THIS STATEMENT. I SUGGESTED THEY GET SOME AFFIDAVITS OR POWER HOOK UP RECORDS TO SHOW WHEN THE USE BEGAN. I COPIED THE OLD WITTE ENGINE DOCUMENTS FOR THE FILE IN CASE THEY REFERENCE THEM IN THE FUTURE.

USES FOR ENGINES AND COMBINATIONS

TYPE "F" — Mounted on good wood skids, semi-portable, easily moved from place to place. Especially adapted to farm trade where you wish to move engine to several jobs.

TYPE "H" — Mounted on iron base for permanent installation, or on some machinery where the "Tank in the Base" is an advantage. This engine has large cast alloy steel cover over the connecting rod, crank and piston; compression grease cup on rod; steel guard over gears, and a special iron exhaust muffler.

HEAVY DUTY — Engines are for heavy and continuous work, such as in oil fields, cotton gins, saw mills, flour mills, irrigation, mines, elevators, or work requiring continuous operation. A big sturdy engine and a "brute" for strength.

PUMPERS — These are built in many styles, deep wells with jacks, direct gear driven or belted. Horizontal for force or suction, vertical triplex, centrifugal, rotary, turbine, pneumatic and diaphragm, for any liquids from water to oil.

LOG SAW — The log saw is adapted for sawing up the log after it is on the ground, sawing it up in small blocks so that it can be easily split into stove wood size. This useful and economical equipment saves the work of many men and always pays its way.

LOG AND TREE SAW — This equipment saws down the trees and also saws up the logs after they are on the ground. The outfit is complete for this entire operation and is one of the big money-makers in the WITTE line. If a belt and pulley are ordered, a small circular saw may also be operated by it for sawing up branches.

HOME BUZZ SAW — These are made in three sizes with 3, 4 and 6 H.P. They are mounted on skids and can be easily transported from place to place wherever their work may require, and later used for general work.

3-IN-1 SAW RIG — They are made in two sizes, 6 and 8 H.P., on steel truck so you can take the power to the work. In this rig you not only have a portable engine, a stationary engine, but a sawing outfit and even a steel running gear that can be used for many other purposes on the farm.

deposes and says: This affidavit is

well used on : NW $\frac{1}{2}$ S $\frac{1}{2}$ NE $\frac{1}{4}$ Sec

section at residence approximately mid way on south side.

This well was drilled between 1912 and 1917 and was used to irrigate garden lawn,
trees and providing water for livestock and poultry and domestic uses.

An order for a 3 horse power Witte gasoline engine in 1917 was purchased and installed
on the existing water well by then owners, Albert Rackow and Oscar E. Peterson. A repair
for the Witte engine was received on January 26, 1928. Both orders accompanys this
affidavit.

Knowledge of the uses of this well was known in 1942 by the present owners.

In 1950, the above Witte engine was in use on the well when the property was purchased
from Oscar Peterson by Roy Joseph (Joe) and Ruth M. Owen, present owners, and was re-
placed by an electric motor soon after and used in the previous manner stated above and
used to this date.

A well was drilled in 1968 , east of residence, and can be used for domestic purposes.

RE: Evidence of Priority

Dear Claimant:

* RESPONSE DEADLINE *
* MARCH 15, 1995 *

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will, at a later date, conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided by the claimant** supporting the priority date claimed.

If you no longer own the property to which the claim is appurtenant please forward this correspondence to the present owner, or return it to the department. If you have received this correspondence from the previous owner of the property it is recommended that you file a Change of Ownership form with the Department in order to receive future mailings and to continue to be a party in the adjudication.

Please find enclosed a computer printout of your Notice of Claim and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

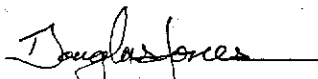

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a

January 10, 1995

notarized affidavit.

Please submit the required evidence supporting the priority date by March 15, 1995, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Sincerely,

Douglas Jones, P.E.
Water Rights Supervisor
