RE: NOE Reply SNAKE RIVER BASIN ADJUDICATION CLAIM(S): 47-120L, 151L, 4455, 152B

Dear Mr. Frazier,

With regards to the SRBA Basin 47 Notice of Error reply for A47-120L and 151L. You indicated that you would like to see changes to the quantity, point of diversion, and total acres made on your recommendation. For 47-120L and 151L as of 1987, within the historically irrigated decreed place of use, 26 acres of irrigation was identified within property you own. When Upper Rock Creek Ranch Subdivision was developed, the distribution was set up as 0.03 cfs per lot, which left 0.32 cfs per decreed right (120L & 151L) appurtenant to the property you now own. Those two decreed rights are now fully appropriated. The points of diversion for these two rights were recommended based on the decreed locations, since no approved transfer through IDWR has legally moved the points of diversion for this place of use.

Your SRBA Basin 47 Notice of Error reply for A47-4455 indicated that you would like to see changes made to the recommended quantity, total acres, and priority date. As A47-4455 is claimed on the same place of use as 120L and 151L, the same 26 acres of irrigation were recommended per the recognized priority date of 1957. As discussed previously, the priority date for A47-4455 was recommended as the date when the groundwater ceased being used under license 47-2500 and was available to be beneficially used on your claimed place of use. Per a 1947 licensing field exam for 47-2500, the examiner wrote on the exam that the POD in question was not being used to irrigate any land in Section 24...therefore we cannot recognize your claimed date of 1945. Also, a statement by Lois Willis indicates that the well was still being used for its licensed purpose in 1950 and in 1957 the accomplished transfer of points of diversion under 47-2500 occurred. Based on this information, 1957 is the earliest priority date that can be recommended for 47-4455. The quantity recommended for A47-4455 was based on the IDWR standard of 1 miner's inch (0.02 cfs) per acre of irrigation. Therefore 26 acres at 0.02 cfs per acre equals 0.52 cfs or 26 inches.

You also mentioned that you did not recall a claim for A47-152B. This claim was actually appurtenant to property located at 12S 18E S24 SWSW, which according to the Twin Falls County tax lot information is not owned by you. Apparently whoever purchased the property in question did not do a change of ownership. Therefore, you do not need to take any further action with regards to A47-152B.

Sincerely,

Amanda J. Kriwox
Sr. Water Resource Agent

Remarks:

Motor: Baldor 230 3 Phase 15 HP
Pump: Berkeley Model H5129

Mr. Frazier uses the water only on his NWNW 12S 18E Sec24. The owners of Lot 38; Lisa McCauley, and Lot 41 & 42; Duane Broner, don't have water claims with their properties. It looks like Mr. Frazier could use this water and Claim A47-152B only on this place, because he doesn't own any other lots.

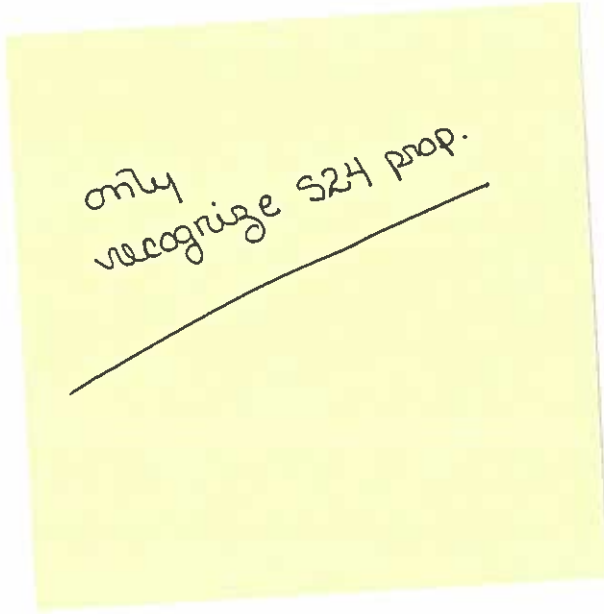

The 12S 18E Sec 24 SENWNW is right for the diversion, but the 12S 18E Sec 24 NWNWSW diversion is in Bruce Wojcik's area.

As, for the place of use he doesn't own property there. He owns property in the 12S 18E Sec 24 NWNW (40 Acres) outlined in black.

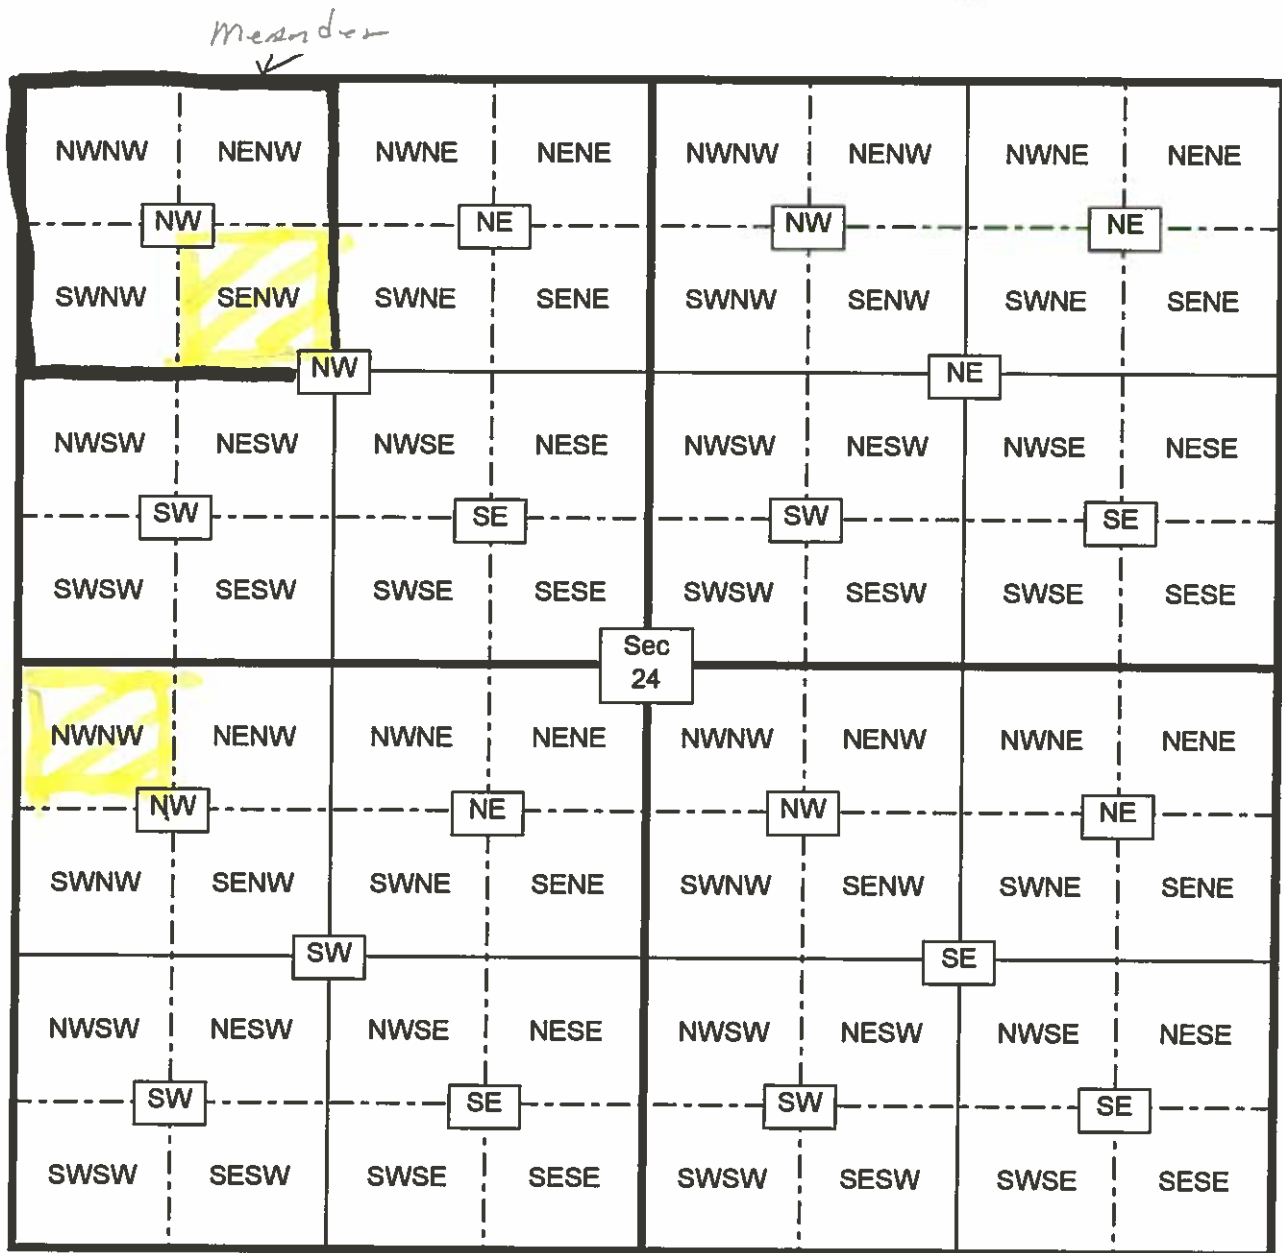

Best regards,

Glen Gier
