

ABOVE: View looking down the drainage, towards the north to northeast, of the point of diversion area. The pond visible in this view is the pond present on the USGS quad map and the GIS imagery. The spring and point of diversion is located at the southwest corner of this pond, towards the lower left corner of this view. The arrow, pointing to the patch of stinging nettle, indicates the approximate location of the view below.

BELOW: View of what appears to be some sort of diversion works at the likely spring location. In addition, to this diversion structure, the ground below (to the north of) the pond appeared to have been previously disturbed more than likely indicating a buried pipeline in the area indicated on the Application for Permit.

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Ident. Number: A47-13230A
Date Received: 12/22/1988

RECEIVED

NO. A47-13230

AFFIDAVIT

DEC 3 1995

Department of Water Resources
Southern Region

Thomas A. Williams being first duly sworn, deposes and

says: The Well in Sec 10 T 125 R 17E was drilled in 1945 on 45FS land in which we have an easement this well flows about 15" of water into Dry Cottonwood Cr. and Charges the Creek to our private property in Sec. 34 T125 R17E for stock water.

The Spring in sec 33 T125 R17E has never been known to go dry. This spring flows about 30 gpm and piped to our private and BLM allotment with watering stations in sec 29-33-32 T125 R17E. It furnishes water to six stock water tanks there is also a 1700 gallon storage tank in the system. Cows watered about 500 fair.

The Well in sec. 3 flows in the Spring of the year however drops off and furnishes water only in early spring.

Thomas A. Williams (signature)

On this 15 day of March, in the year of 1995

personally appeared Thomas A. Williams known or identified to me to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same.

RE: Evidence of Priority

Dear Claimant:

* RESPONSE DEADLINE *
* MARCH 15, 1995 *

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will, at a later date, conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided by the claimant** supporting the priority date claimed.

If you no longer own the property to which the claim is appurtenant please forward this correspondence to the present owner, or return it to the department. If you have received this correspondence from the previous owner of the property it is recommended that you file a Change of Ownership form with the Department in order to receive future mailings and to continue to be a party in the adjudication.

Please find enclosed a computer printout of your Notice of Claim and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

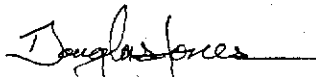

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a

January 10, 1995
page 2

notarized affidavit.

Please submit the required evidence supporting the priority date by March 15, 1995, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Sincerely,

Douglas Jones, P.E.
Water Rights Supervisor

Enc.

DEC 03 1996

MEMORANDUM

TO: BLM Application for Permit File *ALSO SRBA CLAIM*
FROM: Corey Skinner *CS* *A47-13230A*
DATE: July 26, 1999 *FILE*
SUBJECT: Staff Review

The enclosed Application for Permit, filed in the name of the U.S. Bureau of Land Management, seeks to obtain a water right for an existing stockwater development located in the foothills south of Twin Falls. The development consists of a spring and buried pipeline(s) to stock watering troughs in a couple of nearby sections. The spring is located in the Southwest $\frac{1}{4}$ of Section 33 (T12S, R17E) and the stockwater troughs are located in Sections 31 and 32 (T12S, R17E).

~~It appears that SRBA claim~~ A47-13230A, filed in the name of WT Williams Inc, is diverted from the same spring. Apparently, the spring is located on WT Williams, Inc. property. A field check of the source was conducted on July 7th. It was observed that a pond exists at the base of a spring in the area indicated on the application. At the southwest corner of the pond, there appeared to be a diversion structure at the probable spring location. Mr. Williams had told me that the diversion is at the southwest corner of the pond. The attached photos document my July 7th visit.

It should be noted that it appears that the spring is located very near to the $\frac{1}{4}$ line that divides the NESW $\frac{1}{4}$ and the NWSW $\frac{1}{4}$ of Section 33. The USGS quadrangle map appears to indicate that the spring is probably in the NENWSW $\frac{1}{4}$ of Section 33, but very close to the quarter line. The enclosed application originally listed the NWNESW $\frac{1}{4}$ as the location of the point of diversion, as does SRBA claim A47-13230A. However, the Department's GIS information appears to indicate that the spring is located in the NENWSW $\frac{1}{4}$ of Section 33. This day I spoke with Steve Davis of the BLM regarding the legal description for the spring. Mr. Davis looked over his information and he was under the impression that the spring was located right on the quarter line. With Mr. Davis's permission, I changed the application so that it listed both legal descriptions (NENWSW $\frac{1}{4}$ or NWNESW $\frac{1}{4}$). It should be emphasized that only one point of diversion exists, and is proposed, under this application.

ABOVE: View looking down the drainage, towards the north to northeast, of the point of diversion area. The pond visible in this view is the pond present on the USGS quad map and the GIS imagery. The spring and point of diversion is located at the southwest corner of this pond, towards the lower left corner of this view. The arrow, pointing to the patch of stinging nettle, indicates the approximate location of the view below.

BELOW: View of what appears to be some sort of diversion works at the likely spring location. In addition, to this diversion structure, the ground below (to the north of) the pond appeared to have been previously disturbed more than likely indicating a buried pipeline in the area indicated on the Application for Permit.
