the right was not licensed for either irrigation or domestic uses, therefore these uses are not being recommended.

I also found that the ponds start just into Sec 21 and then run into Sec 16.

The point of diversion is at the mouth of a drainage tunnel, therefore, the source is considered to be ground water rather than an unnamed stream under current guidelines.

This morning I met with Robert at the location of this water right, and we walked around and he showed me where he used to raise little fish before he took them out into the raceways, and he advised me about how they raised the fish for sale to other fish hatcheries. We then walked up the canyon side to his POD of this unnamed stream which is a big pipe approx. 24" in size out of the side hill into a concrete box where he pipes this water into his fish hatchery and raceways. There is a pipe from this concrete box for water into a pond then flows into a open ditch east of the houses for flood irrigation of approx. 5 to 6 acres for pasture. He said that they raised approx. 50,000 pounds of fish a year.

11/23/05 = I went back out to this property and walked down the creek and observed the dirt raceways then I went up the ditch east of the houses to a place this water flows into the creek as per GPS # 2.
