SUBJECT: Claim A47-02263, Lanting

Permit 47-08261 covers the same water sytem as this claim. The claim is for one well, and the permit covers two wells. There are two wells in the system, which supplement SRCC shares. The license covers 70 acres, but a total of 569 acres are watered. A licensing exam for 8261 was conducted recently to determine these facts. Anyway, this claim should be recommended as a 70-acre ppu within the 569 acres. Only the licensed well should be covered by the claim. Both wells will be covered as 8261 is licensed.

INTEROFFICE MEMORANDUM

TO: TRANSFER FILE NO. 5279
FROM: KELLY K CHRISTENSEN
SUBJECT: ADJUDICATION REVIEW OF TRANSFER
DATE: 12/23/98

Only 47-02263 is part of the adjudication process and therefore my analysis is primarily limited to the analysis of this right only. GIS rectified photography is not available at this time, therefore no mapping has been done.

As the ground has been in CRP, 47-02263 is recognized as valid for the licensed rate and acres. This right should therefore be conditioned to the irrigation of 70 acres within the PPU. This right should also be limited to the same combined limit of 347 acres when combined 47-08007B and 47-08261. As licensing data indicate a system capacity greater than the combined rates for the three rights, no combined diversion rate limits are required.
