REPORT OF ENGINEER

Permit No. G-24646

This proof is for Completion of Works & Beneficial Use In Water District No.

1. Name of applicant O. S. Butler, Kimberly, Idaho

2. Source of water supply: Subterranean from a well

3. Location of point of diversion: Is in the SW 1/4 SE 1/4 of Section 20

T. 11 S. R. 18 E. County of Twin Falls

4. Describe works as they exist, giving dimensions and capacities of same:

Water is pumped from a sump in the stream bed by a 20 hp Fairbanks Morse Horizontal Motor No. 581869 and an 8 by 6 Fairbanks Morse Centrifugal pump through a pipe line with a 371 lift to the high points in the field. Water distribution is by gravity. This water is surface water flowing down Dry Creek through the sump made in the stream channel. This water is actually rising water and return flow from irrigation above.

5. Water is used for: Irrigation

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

SW 1/4 SE 1/4 Section 20, Twp. 11 South, Range 18 East, B. M.

See the map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

NOTE: Mr. Butler has canal water out of the Twin Falls Highline and has made a deal with the Canal Company whereby a 14" pipe extends across under the canal from the point of delivery in the South to a sump where he uses a 50 hp Westinghouse Motor and Pump to take all of his canal water to the South to high ground where he has developed a good farm. The water under Permits Nos. G-24646, G-24644 and 24647 actually replaces the canal water which has been moved to the higher ground to the South.

This examination was made on the 19 day of July, 1955
