He stated that he had been working with Frank and that he thought he needed to file a late claim for irrigation on ground formerly owned by the BLM. I did an aj5 records search and compiled the 4 rights on a land list grid. From that review it does appear that there are some areas that do not match what is the current practice, but there are areas that apparently have shifted through an unrecorded transfer(s). I suggested that he wait until field verification of his claims to finalize any new filings (if necessary) as the claims do not clearly identify actual irrigation practices and the only practical way to determine what is required is to do a comprehensive system review.
