SUBJECT: QUESTIONS ON PROPERTIES WATER RIGHTS????

phone call (.) walk-in (x)

He is thinking of buying this property from Dale Wright and had questions on these water rights.

Looked at the decree for A47-02316A and found that the original license was split into three parts. The A and B portions were decreed as a result of a lawsuit. The B portion is in CRP at this time and I explained that it is protected from forfeiture during that period and may be resumed in the future. He wondered how that resumption may affect his right... The C portion had not yet proved beneficial use at the time of the decree, it later became a license when proof was submitted. (This part has not yet been claimed in the SRBA.)

I checked the evidence of priority submitted for statutory claim A47-04099 and there was an affidavit that would probably suffice for 1969 instead of the claimed 1966. Told him the 1969 date would not really affect his priority as there are no other claims in the area between 1966 and 1969 anyway.

Jim told him the watermaster for the area was Charles Runyan and it might be a good idea to call him @ 543-8601 and ask him questions he had on delivery of water in the area...

RE: Snake River Basin Adjudication (SRBA)
Twin Falls County

Dear Mr. and Mrs. Wright:

I am in the process of reviewing the Notices of Claim to a Water Right which you filed for land irrigated by Salmon Falls Creek and groundwater located in Township 9 South, Range 13 East, Section 32, and Township 10 South, Range 13 East, Sections 4 and 5. At this time, I am reviewing the claims that include irrigation. There are five claims in this category: A47-02316A, A47-02353, A47-04099, A47-07252 and A47-12971.

Two of these claims, A47-04099 and A47-12971 are based on beneficial use. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used. This date is the Priority Date as shown on the enclosed print-out. The Department is under a legal obligation to gather evidence from the claimants supporting the date of first use, or Priority Date, for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary. Please submit this evidence by June 15, 1992.

If no evidence is submitted, your claimed priority date cannot be recommended to the Court for decree. This could jeopardize your water use under this right. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible.

Additionally, I will be conducting field examinations for adjudication claims in the area during the week of May 11. I will be verifying the combined diversion system for the two sources of

MEMORANDUM

To: FILES A47-02316A, 02353, 04099, 07252
From: HELEN HARRINGTON-THORNTON
Date: March 22, 1993
Subject: PARTIAL REVIEW OF CLAIM

=====

I began a review of Dale Wright's claims due to work being conducted in the Blue Gulch Critical Groundwater Area by Western Region personnel. Roxanne McCarthy and I conducted some field work in May, 1992 in the area, which included a visit to Mr. Wright's property.

At the time of the field visit, I had two basic questions about the water use:

A47-12971 - this is a well used for domestic, stock and irrigation uses. I did not take any measurements, however, I did confirm the existence of the well and uses. Photos can be found in the file.

Supplemental rights from Salmon Falls Creek and ground water for irrigation. I confirmed that the well pumps into the canal which carries the water from the creek.

The irrigation rights (A47-02353, A47-02316A, A47-04099 and A47-07252) generally have been claimed as permissible place of use, with a few acres difference on each claim. Based on the most recent licensing exam (47-07252, 7-24-84) the total irrigated acres is 1196.

Additionally, it appears that the total capacity of the Salmon Falls Creek diversion is 16.0 cfs. I have made this determination based on the July, 1984 field examination. Therefore, the total diversion rate of the three Salmon Falls Creek rights (47-07252, 02316A, and 04099) is 16.0 cfs. However, I have not yet acquired evidence of priority for A47-04099. Once evidence is submitted, final recommendations can be made combining all these rights.

I have not completed the review of A47-12971 either, because evidence of priority is needed. Rather than follow up on this now, it will probably be better to wait until Basin 47 is being worked on in case other questions arise and all of these issues can be dealt with together.
