REPORT OF ENGINEER

Permit No. 24647

This proof is for Completion of Works & Beneficial Use In Water District No.

1. Name of applicant O. S. Butler, Kimberly, Idaho
2. Source of water supply: Rock Creek
3. Location of point of diversion: Is in the SE 1/4 NW 1/4 of Section 21
T11 S. R. 18 E. County of Twin Falls
4. Describe works as they exist, giving dimensions and capacities of same: There is a rock and manure dam in Rock Creek at the point of diversion approximately 4' high and 20' long on the top by 4' wide. The spillway is through and over the rocks in the center of the dam. Diversion ditch is 4' wide in the bottom. Irrigation is from a large ditch on the north side of the field. All irrigation by gravity. The source of this water is Rock Creek.

5. Water is used for irrigation
6. State whether or not water has been turned into works of diversion: Yes
7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

S 1/2 NW 1/4, S 1/2 NE 1/4 Section 20, Twp. 11 South, Range 18 East, B. M.

See the map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: NOTE: Mr. Butler has canal water out of the Twin Falls Highline and has made a deal with the Canal Company whereby a 14" pipe extends across under the canal from the point of delivery in the South to a sump where he uses a 50-hp Westinghouse Motor and Pump to take all of his canal water to the South to high ground where he has developed a good farm. The water under Permits Nos. G-24646 G-24644 and 24647 actually replaces the canal water which has been moved to the higher ground to the South.

This examination was made on the 19 day of July, 1933

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.
