RE: Evidence of Priority

He brought in a bunch of letters between the former owners and banks, which seemed to help support his priority date, at least to the early 1960's. He said his father bought the adjoining property in 1952 so he had him write an affidavit which supported the early 1930's priority date. They also mentioned that they have recently tied their three ^{pumps} together into one system, so I told them they needed to file a transfer and gave them an application to take with them. We amended the claim to show a 125hp pump exists rather than the 100hp one which was on the claim.

being first duly sworn, deposes and

says:

In November 1955 my father, brother and I purchased a farm that joined the Bradshaw 80a.

The first year I farmed our place in 1956 the Bradshaw well only pumped 10 in 15". He did not use it much because it was too costly. The next year he abandoned the well and the power line which came from our farm was taken down. A short time later Sawyers bought the 80 because they could put some of their water on it.

RE: Sawyer, Malcolm H.
51-5043-8

Dear Doctor Sawyer:

Earlier this summer I briefly mentioned to you the Rock Creek Waterusers, of which you are a member, were discussing plans to repair the Rock Creek ditch. I submit the following to bring you up to date on the events that have taken place. The basic remodeling effort is installing approximately 3800 feet of 36" tile from the diversion to the Taylor Ranch and then enlarging the open ditch from the Taylor Ranch east to a point about one-half mile west of your farm.

The Waterusers have filed for Articles of Incorporation and have picked the name "East Side Rock Creek Waterusers". The proposed improvement project has been surveyed and engineered by the Soil Conservation Service at an estimated cost of \$116,000. The ASCS office has approved the cost sharing application and has set aside approximately \$30,000 in government cost sharing funds payable to the Waterusers if the project is 75% completed by December 31, 1974. A formal commitment from F.H.A. is expected next week on a 40-year loan at 5% interest for the balance of the money needed. Four construction bids on the project were received with the low bid being \$137,910.70. The group felt this bid was too much higher than the government estimate and they felt we should seek other bids. Also, they discussed the possibility of cutting corners; thus estimating the job could be completed for approximately \$100,000.

October 18, 1974

I submit the following breakdown as to the shareholder's cost.

TOTAL COST - \$137,910.00

ASCS - 30,000.00

BALANCE AT 5% Interest-40 Yrs. \$107,910.00

ANNUAL PAYMENT = \$6,288.79 ÷ 2,000 shares
= \$3.14 Per Share

Our records indicate you have 75 shares of Rock Creek water. Therefore, your annual cost would be \$235.50. Also, please be informed the attorney's fees will be assessed to each individual shareholder and I do not know what these fees will be.

I anticipate a meeting of the members next week for a final vote as to whether or not they want to initiate the construction of the improvement to the Rock Creek ditch for an expense of \$100,000 to \$137,000 plus. Frank Bower and I both feel this would be a very feasible and beneficial undertaking at a relatively low annual expense. As you are aware, there is a water shortage problem on your farm plus the fact that the Rock Creek water is virtually free water. This improvement seems very economical.

Would you please express your opinion as soon as possible so that I can vote accordingly at the next meeting.

Very truly yours,

Yes

Re: Farm Mgmt. A/C #9 Sawyer
Proposed improvements and projected
income

Dear Sir:

Throughout the winter months, David and I have made an attempt to come up with solutions pertaining to the farm improvements. This letter will be a resume of the facts that we have obtained and also the recommendations for the actual improvements.

The south well was designed to pump 800 gallons per minute, or 88 inches of water. However, during the heavy pull down season which occurs during the middle of the summer, I don't believe this well is producing over 75 inches of water. Therefore, we have obtained an estimate on up-grading the efficiency of the south well. Enclosed is a copy of that estimate.

The well should be reamed from the 300 foot to the 400 foot level, from the present 12" to a 15" hole. The estimated cost on the well work is approximately \$600.00. Therefore, for all practical purposes, to up-grade this well with a 100 horsepower motor capable of pumping this 960 gallon per minute or 106" flow, the cost will be around \$4,000.00.

At the present time, we do not feel it would be practical to extend funds for the improvement of the north well. The man who drilled this well has passed away. Therefore, we were unable to obtain any pertinent information. However, from the bits and pieces of information that we can obtain, there apparently is hardware or drilling equipment down the well hole. At the time the well was drilled, it was cased from the 270 foot to the 330 foot level. The reason for this being the presence of an unstable type material, consisting of gravel, cinders and talc. In 1963, when the pump and liner were lifted out for additional drilling, the well caved in. It is anyone's guess as to how many dollars could be spent on this well and still come up with nothing. The only alternative we see at the present time is to abandon this well. We did obtain an estimate on the cost of drilling a new well to approximately 800 feet in depth in the same general area. This estimate came to between

eight and ten thousand dollars, depending upon how much casing had to be used.

Whereas there is not enough water on this farm to irrigate 160, let alone 240 acres, a sump at the east end of the farm is impractical. There just isn't enough waste water to warrant a sump pond. As a matter of fact, we feel it is so impractical we have not obtained an estimate.

Concerning the filling of the low places along the north end of field E and F and filling the sink holes in field B, we have come up with a solution that will serve a dual purpose. The settling pond, or drainage pond as it may be referred, close to Nial Bradshaw's house is full of top soil. We are going to have a carry-all cut back the banks, clean the pond, and carry the soil out into field E and F and into the sink holes at the top of field B. The cost of this project will be approximately \$300.00. We have given our okay on this project where it is necessary to clean the waste water that comes onto the farm in order for Frank to use it efficiently below the Rock Creek ditch.

If we can possibly increase the efficiency of the south well 25%, it will increase the over-all value of your farm and also increase your net income. This is a good farm, and with additional water the production can be increased. At the present time, Frank is actually irrigating this farm with the equivalent of what a farmer with Twin Falls Canal Co. water rights would be using on around 120 to 140 acres, that is with 100% delivery. If we can obtain 100 inches of water, Frank will have the equivalent of what a Twin Falls Canal Co. share holder would have on 100% delivery on 160 acres. Where your farm lays well, the fields are square, and a farmer can make maximum use of water, we feel the investing of \$4,000.00 into the south well is imperative.

This, of course, is your decision to make.

Enclosed you will also find a projected income from the crops Frank and the farm management have laid out for the coming season. I have been conservative in figuring these projected prices. There is around \$4,000.00 still to come in from the sale of 1968 Pinto Beans.

We are now experiencing some nice spring weather. Up until several days ago, it had been freezing at night. The farmers had been unable to get into the field, and now with the coming of spring weather, everyone is anxious to get at the job of producing the 1969 crop.

I shall await your decision on the recommendations set forth.

Sincerely yours,

Jack D. Pierce

Dr. Malcolm H. Sawyer
P.O. Box 1286
Apple Valley, California 92307RE: SAWYER, Malcolm H.
51-5043-8

Dear Doctor Sawyer:

Per your request, we have attempted to locate a water license for the Bradshaw well. Upon an inquiry to the Idaho Department of Water Resources, we find that a water license was never issued because the permit (No. G-24003) was cancelled in August 1964 by the State of Idaho. This permit was cancelled because Mr. Bradshaw failed to pay the required examination and licensing fees.

Because this area is a critical ground water area, there are no new permits being issued and no cancelled permits may be reinstated. However, we have been informed that a water right may have been established by the diversion and beneficial use of water when the well was being used for irrigation purposes by Mr. Bradshaw. The state has supplied us with the necessary forms to file for the claim through the beneficial use provision. If this claim is not protested, we will file an "Application for Transfer" which allows us to change the point of diversion from the Bradshaw well to the well you are presently pumping, or to a new well.

We plan to file a claim to an additional 80 inches of water. If this claim is not protested, and we feel the claim is strong enough to justify increasing our pumping capacities, we would be able to pump 210 inches of water legally.

It would cost about \$5,300 to increase the present well to a capacity of 177 inches. If we reamed the existing well, we could expect to get the full 210 inches. However, this would cost approximately \$15,000 for pump and motor changes, plus the cost of reaming. Present economic conditions do not justify the expense which would be encountered to increase the capacity of the well.

We do recommend that we file claim to the water for several reasons. Economic conditions could change enough to justify the costs of increasing our pumping capacities. If we do acquire the claim, it will be an asset to the farm. Therefore, the farm's value would be increased. The strength of any water right or claim is substantiated by the length of time the claim or right has been filed. Therefore, it would be to our benefit to file the claim now, even if we do not intend to pump the additional water at this time. If we file the claim and receive no protests, then we can continue to pump our present 130 inches without losing claim to the additional 80 inches.

The cost of filing for a claim to a water right is \$10.00. I suggest we go ahead and file on this water, and base any further decision on the reaction we receive from other water users in the area.

If a dispute should arise, a claim to a water right will have less influence on the court than a licensed water right. Before any money is spent on pump improvements, we would obtain the advice of an attorney about the strength of our claim as opposed to the cost of the improvements.

I would appreciate receiving any comments or suggestions you have concerning this matter, and will wait until we hear from you before proceeding further.

Sincerely,

David L. Boss

3 April 1969

Mr. Jack D. Pierce
Farm Management Department
Fidelity National Bank
Twin Falls, Idaho 83301

Dear Mr. Pierce:

Thank you for your letter of March 28th, and its very comprehensive information. It is apparent that something must be done to increase the supply of water, and this is your authorization to continue with that project.

Your letter is the only real information I have had in a long time as to how the well is producing, and I am quite shocked and disappointed. Enclosed is some information regarding the well which might give some clues to a knowledgeable driller. It is possible that after reviewing the enclosed information - which I would like to have you keep on file in my farm account - that you may decide to use a somewhat different approach to increasing the well production.

You will note that between the 723 ft. and 735 ft. level, very few balings were obtained. In fact, Mack Grey told me at the time the well was being drilled that practically no balings were obtained and that it was his opinion that we had encountered an underground stream. The experience with Doctor Creed's well in 1957 may be significant, and as a matter of fact the production of water from my well, compared with what it used to be, is so poor that it makes me wonder if someone is sneaking water out of a well that should not be in operation.

My recollection is that at some time in the past the well produced around 1400 gallons a minute, with less than a 20 foot draw-down.. My knowledge about wells is obviously limited, but it would seem to be common sense to me to insure that the driller plumbs the well to below the 735 ft. level and does whatever cleaning out is necessary.

I assume that the reason for enlarging the well up to 15" between the 300 and 400 levels is to instal larger bowls. The drilling history does not appear to indicate much water source at that level. The fax copy of the estimate from Lane & Bowler is not very clear, but it seems to indicate the purchase of a 7 stage 12" bowl assembly.

RE: Evidence of Priority

Dear Claimant:

* RESPONSE DEADLINE *
* MARCH 15, 1995 *

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will, at a later date, conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided by the claimant supporting the priority date claimed.

If you no longer own the property to which the claim is appurtenant please forward this correspondence to the present owner, or return it to the department. If you have received this correspondence from the previous owner of the property it is recommended that you file a Change of Ownership form with the Department in order to receive future mailings and to continue to be a party in the adjudication.

Please find enclosed a computer printout of your Notice of Claim and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a

January 10, 1995
page 2

notarized affidavit.

Please submit the required evidence supporting the priority date by March 15, 1995, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Sincerely,

Douglas Jones, P.E.
Water Rights Supervisor

Change of Address

Dear Claimants,

IDWR has been notified the address presently in our claim records is incorrect. Although we have reached you at the address above, we need you to confirm this is your correct mailing address. Future notices related to your SRBA claim(s) can be sent only to the address on your claim(s) or as otherwise changed by you. The staff of this agency must avoid relying upon the word of others about your mailing address.

If the address above is correct, please sign your name at the bottom of this letter, and return it to this office. Otherwise, please make the proper corrections, sign, and return this letter. Thank you for your help. We hope to assure that you receive future notices about SRBA matters.

If the ownership of the property to which the water right(s) referenced above apply has changed, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the claim record.

Sincerely,

Adjudication Bureau Staff

SRBA CLAIMS RECEIVING CHECKLIST

CLAIMANT'S NAME Idaho Frost Elinor Sawyer Estate CLAIM IDENT. NO. A47-04111

DATE RECEIVED 11-28-88 CK # 218188 AMOUNT \$ 130-

- | | YES | NO |
|--|--|--------------------------|
| 1. Is the name and address complete with zip code? | ☒ | ☐ |
| 2. Is a priority date entered? | ☒ | ☐ |
| Is the water use exempt from the Permit requirements, or if it is not exempt, has a Permit been approved or a License issued?
A Permit is required: (1) for groundwater developed after March 25, 1963 (except single family domestic and stockwater wells using less than 13,000 gpd), or (2) for surface water developed after May 20, 1971 (except for instream stockwater). USE CARE IF CLAIM IS RETURNED. REFER TO ADJUDICATION MEMOS # 1 (ADJ. CLAIMS/APPLICATIONS) AND # 9 (REJECTION OF CLAIMS). EXPLAIN IN COMMENTS. | | |
| 3. (a) Is a source entered? | ☒ | ☐ |
| (b) Is a tributary to entered? (if required) | ☒ N/A | ☐ |
| 4. Is the legal description of the p.d. sufficient? | ☒ | ☐ |
| 5. Is there a description of the diverting works? | ☒ | ☐ |
| 6. Are the water uses appropriate for the form? The short form is limited to domestic and stockwater uses with direct diversion. All claims that include storage or instream stockwater must use long form. | ☒ | ☐ |
| Is the period of use included? | ☒ | ☐ |
| Is a quantity claimed for each use? | ☒ | ☐ |
| 7. Is a total quantity claimed entered? | ☒ | ☐ |
| 8. If required is a consumptive use entered? | ☒ N/A | ☐ |
| Is the consumptive use correct? | ☒ N/A | ☐ |
| 9. Are the non-irrigation uses listed properly? If this claim is on the short form, and more than one domestic use is listed, single ownership must be stated. If not under single ownership, see Adjudication Memo # 4. | ☒ N/A | ☐ |
| 10. Is (are) the place(s) of use and purpose(s) indicated? | ☒ | ☐ |
| 11. Is (are) the county(ies) entered? | ☒ | ☐ |
| 12. Is the ownership of p.u. checked? | ☒ | ☐ |
| 13. Are other water rights listed or "none" indicated? | ☒ | ☐ |
| 14. If required, are remarks correct? (If the claimant does not own the place of use, authority for filing the claim must be explained in the remarks.) | ☒ N/A | ☐ |
| 15. Is the basis of the claim indicated? | ☒ | ☐ |
| 16. Is the claim signed by the claimant, and is the signature appropriate? (If an individual is the claimant, has that individual signed the claim, or if an organization is the claimant, is the organization signature block complete?) | ☒ | ☐ |
| Has the claim been signed, sealed, and dated by a notary? | ☒ | ☐ |
| Was this claim filed on time, or was an extension granted? | ☒ | ☐ |
| Is the fee enclosed correct? | ☒ Exempt | ☐ |
| If this claim is based on an existing water right, has the identification number been entered? | ☒ N/A | ☐ |
| Should this claim be receipted and data entered? | ☒ | ☐ |

SUBJECT: LIMITAION REMARK IN A47-04111

phone call (.) walk-in (X)

She is working on an appraisal for the lands these claims are appurtenant to and asked about the "limitation to 2.6 cfs for the entire 240 acres" Remark in A47-04111. I told her I wasn't sure who put that in or how valid it would be in the final recommendation. If there was evidence in the licensing exam that 2.6 cfs was the system capacity, it may have some bearing... If the additional 80 acres were from a separate system and later were moved to the other pump, there may be some allowance for an additional rate of diversion. It would just depend on what we found during our review of these claims in the SRBA. She said she would just put in the usual disclaimer about statutory claims for her report, but just wondered what that remark meant?

DEPARTMENT OF WATER RESOURCES

Department of Water Resources
Southern District Office

Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. **The filing of this claim does not confirm the water right but will serve for information purposes only.** It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Idaho First National Bank, Trustee for Malcolm Sawyer
(name of claimant)
of Trust Department, Box 509, Twin Falls, Idaho, 83301, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) ground water
_____, tributary to _____
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount <u>1.6 cfs</u>	Use <u>irrigation</u>	Period of Use: From <u>April 1</u> To <u>November 1</u>
Amount _____	Use _____	Period of Use: From _____ To _____
Amount _____	Use _____	Period of Use: From _____ To _____
(cfs, gpm or a/f)	(dom., irri., stock, etc.)	(both dates inclusive)

- (3) Total quantity of water claimed: 1.6 cubic feet per second, or _____ acre feet per annum, and/or 718.08 gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) 10-22-53

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
NE ¼ NW ¼, Sec. 32 Twp. 11S Rge. 19E B. M. County of Twin Falls
 Additional points of diversion: N/A

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. Pump - size and capacity not available.

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

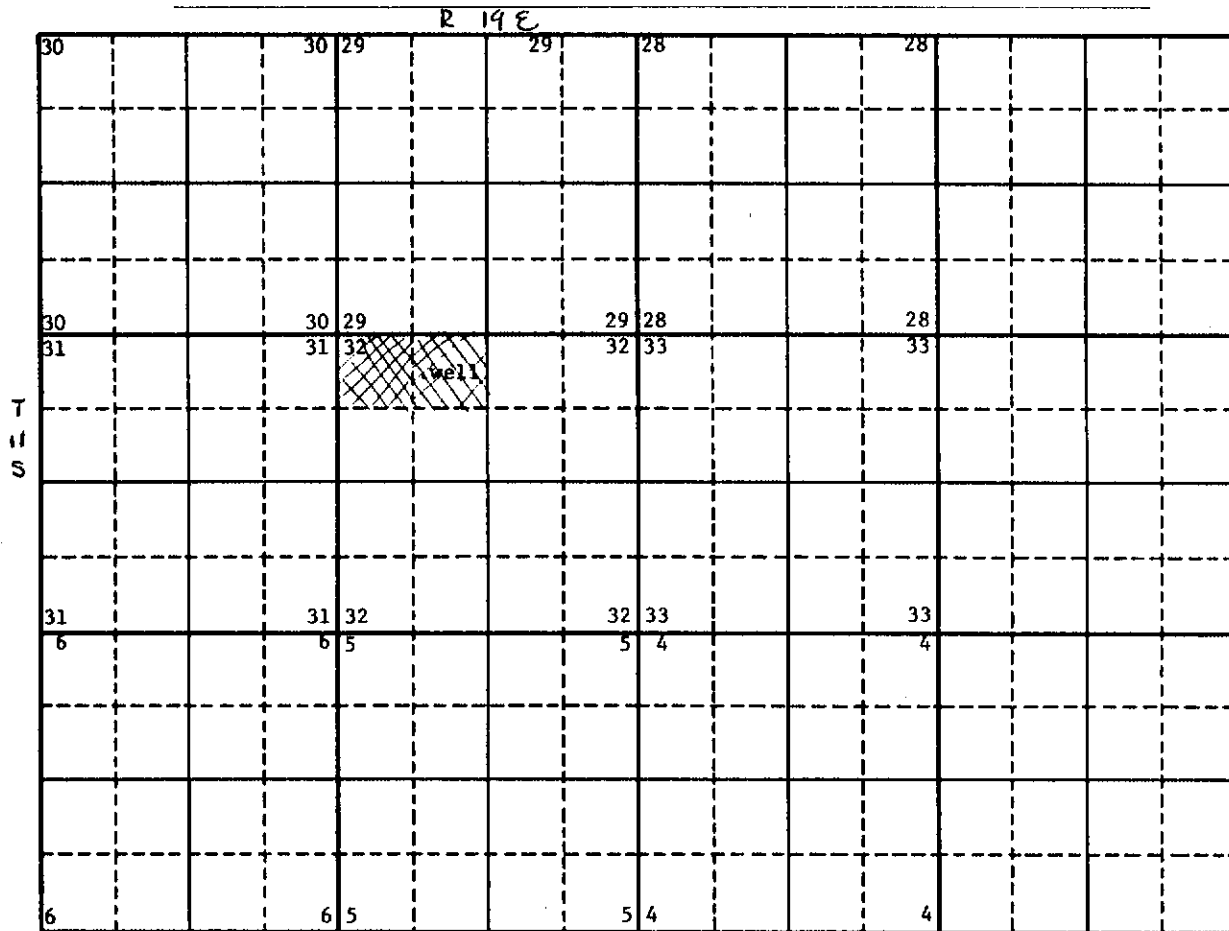

[illegible]

Total No. of acres 80

- B) If the water is used for other than irrigation, fully describe that use, being as specific as possible: N/A

- (7) If you are claiming water as a member of an organization, list name of organization: N/A

(8) Remarks _____

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

State of Idaho)
County of Twin Falls) ss.

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiants knowledge.

IDAHO FIRST NATIONAL BANK, TRUSTEE FOR MALCOLM SAWYER

David L. Boos, Property Administrator-Trusts
