My name is Cherry Thomas. I am a previous owner of the NW 1/4 of the NW 1/4 of Section 24, Township 12 South, Range 18 East. (2568 Rock Creek Road), Before me my parents Mr. & Mrs Lloyd Weech owned this property. They acquired it from Mr. & Mrs. Champ Gray, There is irrigation wells and a pump located at Spring sites on this property which we ran to pump water into Rock Creek. We would then re divert water from Rock Creek through the existing diversion ditches and apply the water to this property. We did this as long as we owned the property.

My name is Lucy Gray; together with my husband Champ Gray we owned land including the NW 1/4 of the NW 1/4 of section 24, township 12 south, Range 18 east. (2568 Rock Creek Road) In 1945 we began pumping water from spring sites at that location running the water into Rock Creek and rediverting water from Rock Creek through existing diversion ditches for use on that land and continued to do so until we sold that land to Loyd Weech.

RE: NOE Reply SNAKE RIVER BASIN ADJUDICATION CLAIM(S): 47-120L, 151L, 4455, 152B

Dear Mr. Frazier,

With regards to the SRBA Basin 47 Notice of Error reply for A47-120L and 151L. You indicated that you would like to see changes to the quantity, point of diversion, and total acres made on your recommendation. For 47-120L and 151L as of 1987, within the historically irrigated decreed place of use, 26 acres of irrigation was identified within property you own. When Upper Rock Creek Ranch Subdivision was developed, the distribution was set up as 0.03 cfs per lot, which left 0.32 cfs per decreed right (120L & 151L) appurtenant to the property you now own. Those two decreed rights are now fully appropriated. The points of diversion for these two rights were recommended based on the decreed locations, since no approved transfer through IDWR has legally moved the points of diversion for this place of use.

Your SRBA Basin 47 Notice of Error reply for A47-4455 indicated that you would like to see changes made to the recommended quantity, total acres, and priority date. As A47-4455 is claimed on the same place of use as 120L and 151L, the same 26 acres of irrigation were recommended per the recognized priority date of 1957. As discussed previously, the priority date for A47-4455 was recommended as the date when the groundwater ceased being used under license 47-2500 and was available to be beneficially used on your claimed place of use. Per a 1947 licensing field exam for 47-2500, the examiner wrote on the exam that the POD in question was not being used to irrigate any land in Section 24...therefore we cannot recognize your claimed date of 1945. Also, a statement by Lois Willis indicates that the well was still being used for its licensed purpose in 1950 and in 1957 the accomplished transfer of points of diversion under 47-2500 occurred. Based on this information, 1957 is the earliest priority date that can be recommended for 47-4455. The quantity recommended for A47-4455 was based on the IDWR standard of 1 miner's inch (0.02 cfs) per acre of irrigation. Therefore 26 acres at 0.02 cfs per acre equals 0.52 cfs or 26 inches.

You also mentioned that you did not recall a claim for A47-152B. This claim was actually appurtenant to property located at 12S 18E S24 SWSW, which according to the Twin Falls County tax lot information is not owned by you. Apparently whoever purchased the property in question did not do a change of ownership. Therefore, you do not need to take any further action with regards to A47-152B.

Sincerely,

Amanda J. Kriwox

COMMUNICATION DOCUMENTATION

August 12, 2005

RE: Lois Willis files; 47-137B, 183, 184A, 2192A, 2474, 2486A, 2500A, 2523, 2533, 2545, 2484A, & 2487A

Meeting with Lois Willis and her daughter Colleen Lawler on Friday August 12, 2005. Kelly Christensen sat in on this meeting with me.

Rock Creek water is delivered to Willis property by the East Rock Creek Ditch (aka R.O.I ditch). The "little ditch" used to convey water but in 1991 they stopped using it b/c of poor maintenance, etc. Now all water goes down the ERC ditch. No longer gravity irrigating. All water (RC & GW) goes into a pond and is pumped from there.

Discussed creating a permissible place of use for system. Both Mrs. Willis and Ms. Lawler were in agreement that this would be the most beneficial means for them to use their water.

DECREE RIGHTS DISCUSSED

A47-184A

Ms. Lawler conceded that Mr. Daw (A47-184B) is to receive 20" of water for 10 acres of this decreed place of use.

Daw: 0.40 cfs
Willis: 0.775 cfs

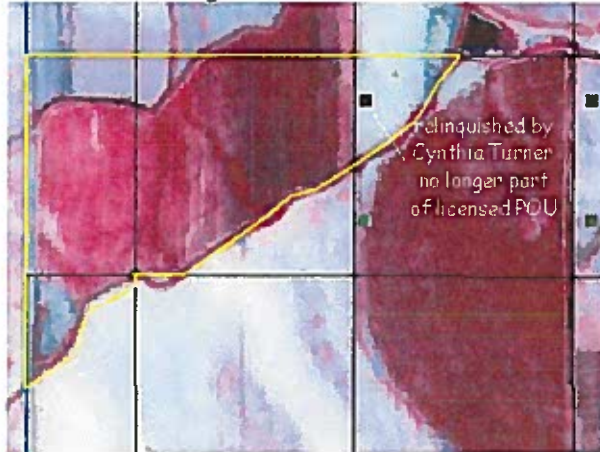

LICENSES DISCUSSED

A47-2474

* claim was more than licensed for. A lot of the Willis licenses are the same scenario. We discussed and decided to go with a PPOU for everything related to this Willis property. Acres and cfs will be limited to license within the PPOU.

A47-2484A

* 8 acres of this licensed POU is appurtenant to property owned by Louis Bettencourt now. Was unsure whether when Willis bought the property if the water went with the property or if it needed to be split between the 2 owners of the licensed POU. Ms. Lawler produced documentation stating that the 8 acres in the SWSE were relinquished by original owner (Cynthia Turner) as part of a Desert Land Entry agreement... so those 8 are no longer available. Will recommend 60 acres for this license based on this information.

This loss of 8 acres also affects 47-2486A and 47-2487A. Recommend 60 acres to Willis for these licenses as well.

SAME POU licensed in 47-2484, 47-2486, & 47-2487

A47-2486A & A47-2487A

* Discussed differences between licensed and claimed pods. The original underflow wells (artesian) were pumped into Rock Creek and then rediverted @ the pou. The artesian wells were used at least through 1940 but the change in location occurred before 1950. Decided that they needed to amend claims to reflect the 2 licensed wells that are now being used as pods for system. A47-2487A was left as claimed and A47-2486A was amended to reflect the pod in the SESW section 31.

A47-2192

* Licensed and Claimed POU and POD differ. POU is owned by 3 different people. Daw and Funk have not filed claims based on this license. Willis only owns @ 50 acres of licensed POU. The original pods are known as the "Norton" wells. They were pumped into Rock Creek and rediverted at several points along the East Rock Creek ditch @ the licensed POU. These wells are no longer being used on this property. David Crockett could possibly file a claim for them under an accomplished transfer as they used to be on his property. But Ms. Lawler agreed that this claim can be disallowed as the wells are no longer in use and the 2 licensed wells on the property have no excess volume/rate available to accommodate the water that this license provided.

DISALLOWED!!

A47-2500A

* Questions re: POU being owned by 2 claimants as well as when changed on pods occurred. Ms. Lawler provided information proving that the wells were still being used on the licensed POU in 1950 but when her parents bought the place @ 1957 the pods had been moved. Can recognize this change as an accomplished transfer. Also agreed that the recommended cfs should be corrected to reflect the actual number of acres owned by Mrs. Willis.

Amanda J Kriwox
Water Resource Agent

Claim filed in 1938 stated that
use of water on claimed POU
from wells began on 6-1-1960.
Orig. claim filed by H. Frazier.

In 2005, Frazier changed p date
to 4-25-1945, which cannot
be recognized b/c the wells
were being used under license
47-2500 on a different POU.
no land in S24 was licensed
for irrig by these wells.

Remarks:

There are two wells on this property, GPS # 04455 9183 well is the only one with a pump on it. I placed an IDWR tag on the power pole next to the pump #A0009183, this well is on top of a spring. The other well #04455 NOPM has no pump and did not tag, just a 12' casing and hard to place. It is located just above a spring that feeds Rock Creek, also.

Well #04455 9183 is used to supplement irrigation on this forty acre parcel. The pump on Rock Creek GPS#0445511864 is used when Rock Creek water isn't available for pumping.

Pump: No Pump

We discussed at some length when the water was put to use on this property NWNW 12S 18E Sec 24. Probably the best avenue, would be to get in contact with some of the Willis Family who the land exchange took place with. Apparently the Grays traded land with the Willis Family back in the 1950s which involved keeping the water on this property at that time. There was too much water loss by the time it reached the lower properties S31 and S26 (around 60-70 % loss).

Best regards,

RE: Evidence of Priority

* RESPONSE DEADLINE *
* MARCH 15, 1995 *

Dear Claimant:

The Notice of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will, at a later date, conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided by the claimant** supporting the priority date claimed.

If you no longer own the property to which the claim is appurtenant please forward this correspondence to the present owner, or return it to the department. If you have received this correspondence from the previous owner of the property it is recommended that you file a Change of Ownership form with the Department in order to receive future mailings and to continue to be a party in the adjudication.

Please find enclosed a computer printout of your Notice of Claim and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement.

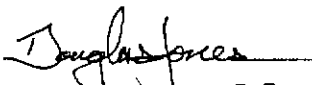

SPECIAL NOTE: The Department will not recommend the Notice be decreed by the court as claimed if no evidence of a priority date is submitted. It will be to your advantage to provide clear and convincing evidence. If you choose to submit statements from individuals as evidence, the statement must be in the form of a

STATE OF IDAHO DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that Meander Corp. (Name of Claimant)
