NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided, if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) are for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

I called Gary and he informed me that he sold these water rights to Patrick , so I then call Pat and made an apt. to go see him about these files , at first I gave him a change of ownership form with all file numbers and one of Kelly's cards and suggested he go in and discuss this change and some other problems he has with his water rights. Right 7592 he will go in and review this right with Kelly. Right 7138 , Pat said there are 2 POD and 7457 right is now being used in the new pond, the 2 ponds which 7457 was used are gone and on the pencil photo 47-7138 the 4 small ponds are gone . On the ponds I walked them using approx 3 feet per step. And while at the new pond Pat said he did not know the dept of the pond but looking at it I would guess 8 to 10 feet deep. On the photo 47-13364 Pat marked the CC lands , underground pipe and gated pipes the area [red] where the creek water is used , the brown area at north on this photo is June grass and he said it is being irrigated for pasture. Just west of POD # 1 are 2 small fish ponds as shown on photo. While reviewing file 4017 Pat thought this may be a duplicate right but would talk to Kelly about it when he goes into IDWR office to update all his files.

Based upon the 2004 aerial photo, the pond covered by license 47-7592 has been farmed over. Determine if the intent was to forfeit the right.

There should be two or three diversions for 47-7138 and 47-7457. The licensing field exam for 47-7138 indicated 2 diversions, one for the 4 southern most ponds and one for the 2 northeastern ponds. The two northwest ponds were licensed through 47-7457. Sketch the discharge routes from the ponds.

Determine the pond locations and sizes. If the ponds are no longer used determine as best as possible the date of last use if the claimant is interested in maintaining the right(s).

As a side issue, layout the stream channel route, especially in the area of the northern ponds. Contrast this delivery system with the Munk system.

RE: Application for Permit
No. 47-7138

N/A

Other diversions are also of concrete and about same size. Diversion ditch to facility is 24" concrete ditch approximately 200 ft. long, there is also a diversion ditch from the top ponds to the lower ponds which flows back into the stream channel, is recharged, and then flows into the two bottom ponds which is approximately 200' long, and 24" wide and deep. The top three ponds measure 102' in length, 20' in width at bottom, 24' at the top, and are about 6' in depth.

The above portion of the facility is complete and has been in operation since May of 1970. DIVERSION

The bottom diversion and pond have not been constructed but will be completed within the next two years. It will consist of a diversion the same as those above, a pond 200' long 30' wide and 6' deep, and ditches from the diversion and from the tail of the last pond of concrete, approximately 450' total, and 24" wide and deep.
