Subj: Unusual forfeiture circumstance

RE: A47-07287

Good morning, Dave:

Here's the situation: A license was issued for storage and irrigation with a surface water source ('74 priority, '82 proof, '82 exam, '83 Lic. Amendment sent, '87 Lic. Amendment received, '87 Lic. issued). In 1985 the Dept declined to reauthorize storage due to failure to repair unsafe conditions at the dam. Prolonged drought conditions may have limited availability of water for storage. Water has not been stored at the dam since at least 1985, but certainly since 1988 (when I first observed the structure). However, it is my opinion that while IDWR would normally not hold a claimant to the forfeiture provisions when water is not available, that forfeiture does apply in this case due to neglect in maintaining the storage system.

Could you provide your opinion on the above matter by Monday afternoon, or sooner? I have an appointment on Tuesday with the owner/claimant with regards to a dam safety enforcement action thru the Attorney General's office (John Homan). I think there will be some difficult decisions for the owner to make, depending on how this forfeiture issue resolves. Please let me know if there are other factors I need to consider before making a preliminary recommendation on the SRBA claim.

Thanks,

Doug

NOV 28 1996

MEMORANDUM

TO: John Homan & Dam Safety Section
CC: Files D47-07287, (Leno Dam), A47-07287
FROM: Douglas Jones
DATE: March 5, 1996
RE: Meeting with Tom Leno, Jr

Tom Leno, the dam owner's son, came to the office today to discuss the problems at the dam. During the conversation we talked about the present condition of the dam, the Department's position with regard to maintenance, alternatives to meet concerns, validity of the water right.

Mr Leno reviewed the file to look over department observations of the present condition of the dam and he requested copies of a memo to the file (12/14/95 by Corey) and a mail message to D.Shaw (3/1/96 by me). The Skinner memo reiterates problems at the dam and mentions the forfeiture issue. My mail message to Dave Shaw requests an opinion regarding forfeiture when the structure has not been maintained to a level sufficient to authorize storage, regardless of the availability of water.

I explained that no response was received to repeated attempts by the department to maintain the dam. He explained that his father had a medical problem in the past and that his father basically hoped the problem would go away if ignored. Mr Leno's parents were alarmed by the consequences specified in the letter under the Attorney General's letterhead and he said they asked him to work with the department. Mr Leno indicated that he would be pursuing an alternative to meet IDWR conditions for the structure. I outlined the alternatives: 1) breach the dam; 2) render it incapable of storing water; 3) repair the structure.

For economic considerations Mr Leno said that they could not afford to repair the dam or to breach it themselves (and especially could not afford to pay for an IDWR-contracted dam breach). Furthermore, he indicated that the dam acts as a flash flood peak flow attenuation structure and would not like to see it breached. The remaining solution then is to render the dam incapable of storing water. Mr Leno said that he would like to lock the gate open. I pointed out that the chain or lock could be cut. He responded that he had intended that the securing system would be similar to the USFS guarded lock arrangement - protected in a steel cylinder. I expressed the preference that the slide gate be removed, but that IDWR will not dictate what methods must be used. IDWR needs a proposal and timeframe in writing for review and will comment on the acceptability and/or suggest refinements. I further explained that an advantage of his visit is that more alternatives could be put down for his consideration. At this point we digressed some and talked about the eventual solution being effective and

NOV 28 1996

page 2
March 5, 1996
Leno memo

practical (constructible, economic and maintainable).

In addition to removal of the gate or locking it open, IDWR expects that a trash rack will be installed to prevent obstruction of the intake by debris. I suggested two possible configurations: 1) A rectangular arrangement of parallel rebars oriented to facilitate raking the debris while standing on the upstream slope of the dam; 2) A conical arrangement which would allow debris to float toward the peak. I encouraged him to seek other alternatives and to provide sketches and complete descriptions, including how the rack would be secured in place. One suggestion for securing it was to sink steel posts into the reservoir sediment and welding the rack to them. Another possibility discussed was to embed legs of the rack into concrete pads/anchors set beneath the ground surface.

In the event of a high volume, short duration runoff, which surcharges the reservoir, the velocity of water through the outlet will continue to present a serious erosional problem below the dam. I recommended that he consider rehabilitating the scour below the outlet or providing an alternative system to reduce the erosive activity. I suggested that he could embed a barrel into the existing scour and extend the outlet pipe into it. He would need to back fill around the barrel and provide rock armoring around the lip and down the stream channel some distance. Mr Leno rightly expressed concern that the barrel life could be limited due to abrasion by suspended particles. One solution would be to use heavy steel pipe instead of a barrel and tacking a plate on the bottom or securing it in concrete. In either case a drain hole would need to be provided. Another solution would be to install a heavy gauge deflector plate in the barrel/pipe to absorb the brunt of the discharge velocity.

Mr Leno said that the dead storage will keep the area too wet to do any work until late summer. I told him that late summer would probably not be acceptable and that water could be lowered using a pump so that work could be done by mid-spring.

I have requested some indication from SRBA administrative staff whether forfeiture of water right could be asserted based on lack of maintenance/storage authorization during drought conditions. Mr Leno wants to leave the dam in place so that they could resume use of it. I expressed my opinion that forfeiture of irrigation storage will be recommended in the adjudication based on the information available in the dam safety file. Later I deduced that the small volume of dead storage could possibly be recommended as stockwater storage under this right. The basis of this conclusion is that storage ceased prior to 11/19/1987 and therefore may be an accomplished transfer of nature of use. This would provide a rationale to justify leaving the structure in place.

MAY 28 1996

page 3
March 5, 1996
Leno Memo

It is my opinion that Mr Leno left the office reassured that IDWR will continue to work with him to reach a workable solution, but that a plan and timeframe must be submitted. He said that he will have the plan to us within the next 4 weeks (before 30 days). I gave him both my card and Corey's card and encouraged him to contact us before then if he has any questions. He said that since he lives in Twin Falls he would like to work with this office. I told him that we will accept the plan and forward it to the State Office for final review and approval.

NOV 28 1996

MEMORANDUM

TO: John Homan & Dam Safety Section
FROM: Douglas Jones
DATE: March 1, 1996
RE: Leno Dam

D47-07287

I was contacted today by Tom Leno, Jr in reference to the 2/22/96 letter from John Homan, Deputy Attorney General, to Thomas Leno (Sr). Tom Leno has indicated that he is very interested in complying with IDWR's criteria and has made an appointment to come to the office on Tuesday 3/5/96 at 9 AM to review the file and discuss options.

I plan to meet with him since Corey will be out next week. I will provide him copies of file correspondence, any other requested information and discuss the options available for the structure. It is my opinion that until a plan is submitted, with a timeframe for effecting that plan, the conditions set forth in the 2/22/96 letter to resolve the Attorney General's action will not have been met.

At this point the options available to the Lenos appear to be limited to either breaching the dam or removing the gateworks and installing a trash rack. If the latter option is selected I am inclined to encourage the owners to remedy the erosion feature at the discharge end of the outlet. Various solutions will be discussed with Leno when he visits the office.

During our conversation I indicated that IDWR has concerns whether the water right for storage is still valid. From personal observation I know that water has not been stored for over seven (7) years (since 1988), and perhaps since 1984. Tom Leno said that possible forfeiture could sway their decision on what work they would do. I will be discussing the forfeiture issue with the SRBA administrative staff.

3. a. Location of point of diversion is SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 17 Township 16S
Range 16E B.M. Twin Falls County; additional points of diversion if any: _____

b. If water is not consumed, it will be discharged into all consumed at a point in _____ $\frac{1}{4}$
of _____ $\frac{1}{4}$ of Section 20 & 21 Township 16S Range 16E B.M. _____
4. Water will be used for the following purposes:
Amount 60A. ft. (cfs or acre-feet per annum) for Irrigation purpose from June 1 to Sept. 1 (both dates inclusive)
Amount _____ for _____ purpose from _____ to _____ (both dates inclusive)
Amount _____ for _____ purpose from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated:
a. _____ cubic feet per second and/or
b. 60 acre feet per annum.
6. Proposed diverting works:
a. Description of ditches, flumes, pumps, headgates, etc. Earth filled Reservoir, drained by
12" steel pipe about 1 1/2 miles long.

b. Height of storage dam 20 feet, active reservoir capacity 60 acre feet; total reservoir
capacity 60 acre feet, materials used in storage dam: Earth and rock
Period of year during which storage will occur Jan. 1 (Mo. Day) to Dec. 31 (Mo. Day) inclusive.
c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
7. a. Time required for the completion of the works and application of the water to the proposed beneficial use
is one years.
b. Estimated construction cost is \$ 50,000.00
8. Description of proposed uses:
a. If water is not for irrigation: Water is for irrigation
(1) Give the place of use of water: _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$ of Section _____ Township _____
Range _____ B.M. _____
(2) Amount of power to be generated: _____ hp under _____ feet of head.
(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be
supplied with domestic water _____
(5) If water is to be used for other purposes describe: _____

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

TWP.	RANGE	SEC.	NE 1/4				NW 1/4				SW 1/4				SE 1/4				TOTALS
			NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	NE 1/4	NW 1/4	SW 1/4	SE 1/4	
16S	16E	20											40	40					80 Acres
16S	16E	29			40	40	40	40	40	40	40	40			40	40			400 "
16S	16E	29																	

Total number of acres to be irrigated 480

c. Describe any other water rights used for the same purposes as described above. The applicant, Mr. Tom Leno already has an established water right to the flow from Mule Creek Springs License No.'s 47-2048 & 47-2118.

9. a. Who owns the property at the point of diversion Federal Government
 b. Who owns the land to be irrigated or place of use Mr. Tom Leno
 c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing Owned by applicant
