10. Remarks I presently have water rights in the Twin Falls Canal Co., however, it is difficult to irrigate my 5 acres with ditch water because of heavy siltation of the ditches; the rotation of use is very inconvenient because of the subdivision in which my 5 acres is located; it will be much more convenient and practical to sprinkler irrigate my pasture with well water.

I have previously made application for .1 cubic foot of water to irrigate this same land. My reason for applying for another .1 cubic foot is because the facilities I intend to install will pump approximately 100 gallons per minute and if I am limited to 45 gallons per minute, the irrigation of this small tract of land will take a considerable length of time. It would be much more feasible and practicle if I were allowed to appropriate .2 cubic feet per second so the whole of the land could be irrigated in a much shorter time.

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.
