STATE OF IDAHO
DEPARTMENT OF WATER RESOURCESINSTRUCTIONS FOR FILING
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

This form has been prepared to assist all claimants and owners of water rights to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. All claimants and owners of water rights are required to notify the Department of Water Resources (IDWR) of any change in mailing address or change in ownership of all or part of a water right. In addition, all purchasers of water rights within a pending general adjudication area must inquire whether a notice of claim has been filed and, if not, shall file a notice of claim if necessary.

Effective July 1, 2000, the Idaho Legislature amended Section 42-248, Idaho Code to include a provision for fees to file a Notice of Change in Water Right Ownership. Please see details at Item 8, below, to determine if fees are required for your filing.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, **the seller should be able to provide you with the water right or adjudication claim number(s).** Please enter the number(s) at **Item 1.** Corresponding water right and adjudication claim numbers should be listed next to each other on the form. You may have purchased only a portion of the water right(s) held by the seller. If so, the water right(s) held by the seller may need to be "split" to provide you your share of each right. Indicate if a split is required by checking in the space provided next to each water right.

If you receive water from a municipal provider, an irrigation district or other water delivery organization, where the water rights are held by the organization, please do not use this form to record a change. You may need to contact the water delivery organization to determine if any action is necessary.

If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If adjudication claims for the rights are required and have not been filed, IDWR will so advise you.

2. The information described at **Item 2** is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. **Do not** obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner/claimant(s) of the water right(s) at **Item 3.**
4. The name, mailing address, and telephone numbers of the new owner/claimant(s) is entered at **Item 4.** Please indicate the relationship between multiple owners by using the connector "and", "or", or "and/or." If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign; however, only one of the named parties is required to sign.
5. At **Item 5**, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.

6. You may have purchased only a portion of the water right(s) held by the seller. If this change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. For each water right requiring a split between owners, fill in the appropriate spaces in the box(es) at **Item 6**. Copy the page as many times as necessary to fully describe each water right after the change. Include documentation as necessary to describe nonstandard agreements or arrangements regarding division of the water right(s). **If the water right(s) will not be split, skip Item 6 and go to Item 7.**
7. The new owner(s) must sign the form in the space(s) provided at **Item 7**. If an "and" connector is used at Item 4, all parties must sign this form. If an "and/or" or "or" connector is used, all parties may sign; however, only one of the named parties is required to sign. If someone other than the owner signs the notice, evidence of authority to sign for the owner must be attached. If the new owner is a corporation or other organization, the person signing the notice must be an officer of the corporation or otherwise have authority to sign for the organization and must include their title with the signature.
8. The Legislature has waived the fee to file a Notice of Change in Water Right Ownership for any water right pending in a general water right adjudication such as the Snake River Basin Adjudication. This waiver ends when a partial decree is issued for the water right that has been claimed. For water rights not pending in a general adjudication, the filing fee is \$25 per water right, except for those water rights which will be divided as a result of the change in ownership. The filing fee for division of a water right is \$100 per water right to be divided. When complete, you should retain a copy and return the original form to the IDWR office nearest you:

EXAMINATION

Date 6-20-80 Accompanied by Peter Link (owner) Total Q measured .71 cfs (by Pressure gage)
 If source is surface water, estimate total flow of source Measured 5-19-80
 Methods of measurement Access Port / Nozzle Pressure Meets Permit requirements? Yes (M.D. Page by Permit)
order modifying not in file

Measurement calculations:
 Annubar/Eagle Eye: $H = 4.0' - 1.2' \text{ correction} \Rightarrow 3.8'$, $D = 6.065$
 $Q = 6.065^2 (3.95) \sqrt{3.8} = 276 \text{ gpm} \Rightarrow .62 \text{ cfs}$
 Nozzle Pressure Measurement: 22-1/4 heads @ 51.33 Pci $\Rightarrow 134 \text{ gpm}$
 25-1/4 heads @ 77.33 Pci $\Rightarrow 180.5$
 $320.5 \Rightarrow .71 \text{ cfs}$ CAPACITY
 $V = .71 \times 1.9835 \times 245 = 345.0$ $63 \times 4 = 252.0$ ✓
 Eagle Eye # 091464, Corr. -1.2"

System Description 10" well with submersible pump. Approx 2900 ft of steel 6" mainline. Reported well depth is 1000' with pump set at 250'. Reported water temp. is 103°F

RECOMMENDED AMOUNTS

Irrigation requirement = 4.0 AFA/Acre

Remarks Trajectory measurement made at discharge to pond to confirm Annubar measurement.

Trajectory measurement: 3 1/8 ID Pipe, 26" Out, 8" Down

$$V = \sqrt{\frac{(3 \frac{1}{8})^2 (32.2)}{(2)(\frac{8}{12})}} = 10.65 \text{ ft/sec} \quad Q = \left[\frac{(3 \frac{1}{8})^2 \pi}{4} \right] (10.65) = .57 \text{ cfs}$$

The Annubar measurement was made under open discharge conditions. Several minutes after the pump was started. This well appeared to draw down rapidly when pumped; flow decreased with time pumped. Recommend that .71 cfs measured at the sprinkler nozzles be used as system capacity.
