

07/28/2006

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 47-7960

NAME AND ADDRESS: LITTLE MAC POWER CO INC
PO BOX 175
BUHL ID 83316

SOURCE: CEDAR DRAW

TRIBUTARY: SNAKE RIVER

QUANTITY: 50.000 CFS
36,135.000 AFY

PRIORITY DATE: 09/20/1983

The rights for the use of water confirmed in this license shall be junior and subordinate to all rights for the use of water other than hydropower, within the State of Idaho that are initiated later in time than the priority of this right and shall not give rise to any right or claim against any future rights for the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this right.

POINT OF DIVERSION:

T09S R15E S23 SESESE Within TWIN FALLS County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
POWER	01/01 12/31	50.000 CFS 36,135.00 AFY

This right does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.

Use of water under this right shall be non-consumptive.

PLACE OF USE: POWER Within TWIN FALLS County

T09S R15E S23 NWSE

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The diversion and use of water for hydropower purposes under this license is subject to review by the Director on or after May 15, 2019. Upon appropriate findings relative to the interest of the public, the Director may cancel all or any part of the use authorized herein and may revise, delete or add conditions under which the right may be exercised.

This right shall in no way be used to inhibit or alter the historical use of Cedar Draw by the Twin Falls Canal Co. as a water delivery channel and as a wasteway.

Right 47-07830 is also diverted through the point(s) of diversion described above.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

07/28/2006

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.

This water right is appurtenant to the described place of use.

This right is subject to all prior water rights and may be forfeited by five years of non-use.

Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law.

SUBJECT: Field Visit

On this day I met Clarence Peterson (Complaintant), Rocky Finney (rentor of Peterson farm) and Tom McCauley (Owner of powerplant).

Peterson alleges that McCauley's powerplant interferes with his water right. He says he has witnesses that water in creek is cut back to small amount and he cannot divert his right. McCauley points out that his diversion works to powerplant have a submerged orifice in works that keeps 10 cfs going down creek during summer and 5 cfs during winter as per FERC requirement and there is water for Peterson to divert. He points out that Peterson has only recently put in pump and right has not been used for years. He indicates that the diversion dam is the problem since it doesn't check the water high enough to get it into the pipeline going to the pump.

On inspection I found that the powerplant diversion has an orifice as McCauley described and at the time I visited the site there was estimated to be 8 to 10 cfs going down Cedar Draw below the powerplant diversion. Inspection of the Peterson diversion found that there was a crude rock and board check in the creek but the check did not elevate the water high enough to force water into the pipeline leading to the pump. (Note that the check dam was on McCauley property but the slide gate control on the pipeline is on Peterson property as is the pump.) Mr. Peterson, due to his age and health, did not go down into the canyon to view the diversion but Mr. Finney did and McCauley and Finney agreed to work together to shore up the check dam to make the diversion work. On returning to Mr. Peterson I pointed out there appeared to be sufficient water to fill his right but that the diversion works appeared to be the problem in his getting the water. He indicated that he had a contract that requires the powerplant to provide him sufficient water and that it was not just the diversion but he still contended that there has been less water than his right in the creek. I told him it did not appear to be a water right issue since in my opinion the problem was the condition of the diversion works. I told him I could not judge who was responsible according to any contract but that it appeared that Mr. McCauley and Mr. Finney were in agreement to solve the diversion works problem. Mr. Peterson still insisted that McCauley dries up the creek so I told both parties that McCauley was on notice that he needs to maintain a bypass flow and that if IDWR found this was not maintained we would take action to

NOV 28 1996

issue a cease and desist order with possible violation. The meeting ended and I took Mr. Peterson back to his house. On the way he insisted I stop at a neighbor's and he had the guy tell me there was at times not much water in the creek at the Peterson diversion.

I do not know if this matter is totally resolved but will investigate as appropriate on further complaint.

3. Source of water supply (a) CEDAR DRAW
which is tributary to (b) SNAKE RIVER
4. a. Location of existing point of diversion is: Township 9S Range 15E Section 23,
1/4 of SE 1/4 of SE 1/4, Govt. Lot, B.M., County of TWIN FALLS
Additional points of diversion if any: _____
- b. If instream flow, beginning point of claimed instream flow is:
Township _____ Range _____ Section _____, 1/4 of 1/4 of 1/4,
Govt. Lot _____ B.M., County of _____
ending point is: Township _____ Range _____ Section _____, 1/4 of 1/4 of
1/4, Govt. Lot B.M., County of
5. Description of existing diversion works (Dams, Reservoirs, Ditches, Wells, Pumps, Pipelines, Headgates, Etc),
including the dates of any changes or enlargements in use, the dimensions of the diversion works as
constructed and as enlarged and the depth of each well.

Water is diverted out of Cedar Draw Creek and into an earthen power canal. The diversion consists of stop log channels across both Cedar Draw Creek and the power canal of which the flow can be adjusted by adding or removing stop log boards. The power canal is approximately 2500 feet long and ends at a concrete penstock intake structure. The intake structure consists of self-cleaning trash racks and an overflow spillway which dumps excess water back to Cedar Draw Creek. A 48-inch diameter steel penstock (approximately 836 feet long) conveys the water to the powerhouse. The powerhouse houses four turbine/generator units. Water is then discharged directly back to Cedar Draw Creek from the powerhouse.

MICROFILMED

MAR 11 1993

6. Water is claimed for the following purposes:

(both dates are inclusive)

(cfs)

(acre feet)

For POWER purposes from 01-01 to 12-31 amount 50. or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) 50. (cfs) and/or (b) _____ (acre feet)

8. Total consumptive use claimed is N/A acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.) 165' of head, 4 turbines: 3 at 411 KW each and 1 at 257 KW for a total of

1490 KW.

10. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.
