MEMORANDUM

TO: FILE NO. 36-07879
FROM: PAM SKAGGS/^{CB}STATE OFFICE
SUBJECT: TRANSFER NO. 4367
DATE: August 1, 1994

=====

This transfer was filed to move 4 acres of irrigation from the original place of use in Basin 36 to a new property and owner in Basin 47. The original owner, as confirmed by the Gooding County Assessor's office, supplied the department with a "Notice of Intent to Sell" a portion of Right No. 36-07879 to the applicant.

The portion of ground that the right is being removed from has been changed to a corral area and water will no longer be used there. No apparent expansion occurs through this transfer, however there is a question of whether hydrologic basins 36 and 47 are interrelated or not.

Both the original and the new place of use are included in the general map of the Eastern Snake River Plain Aquifer description, but the hydrology section suggests that the groundwater aquifers on each side of the Snake River at these locations may not be directly related to each other, only tributary to the river.

This transfer should not be approved without special conditions and considerations since the effect in Basin 47 could be similar to a new appropriation. Other required conditions include well drilling requirements, irrigation overlap and standard transfer conditions.

NOV 28 1996

MEMORANDUM

Date: August 1, 1994
From: Jim Johnson
To: File
Subject: Transfer Application

=====

This transfer application has been recommended for approval mainly influenced by a map of the Eastern Snake River Plain showing a common aquifer underlying the two locations identified on the transfer. There is not total consensus among hydrologist that the map is accurate.

Since this transfer is not large in the number of acres being relocated and since there probably will not be a measurable impact to other groundwater rights located in basin 47 when irrigation occurs, approval of this transfer can be considered even if the map is incorrect. The impact of groundwater diversion will most likely occur to the nearby flows of the Snake River. The impact of the depletion will be diffused over several months and will be so small that changes in the Snake River flows cannot be measured.

However, no additional transfers should be considered such as this one until more information can be determined on the hydrologic conditions. Approval of this transfer is not to be used as a guide for future applications.

Conditions of Transfer Approval

1. Advance the priority date of the water right.
2. Require un perforated casing through the first confine layer.
3. Use other standard conditions.

INTER-DEPARTMENT MEMO

TO: Cliff Gambrel Transfer App.SUBJECT: Field InspectionFROM: Jim StantonDATE: 6-13-94

I visited the original P/U in early May. Of the 9 acres licensed, it appears that a maximum of 8 acres may have been irrigated. Mr. McMinn still is irrigating about 4 acres. He sold 3 acres to a neighbor a couple years ago (according to him) without water rights; that land is now covered with corrals, etc., so does not appear to be irrigated. This may be a case of res judicata, in that 9 licensed acres minus 4 acres still being irrigated leaves 5 acres that could be transferred. The aerial photo shows a maximum of 3 to 3 1/2 acres that could have been sold to the neighbor without water. I did not visit the Gambrel property.
