March 16, 1990

Mr. Eugene Edwards
Box 1145
Salmon, Idaho 83467

Dear Mr. Edwards:

After examining your ranch (T. 21 N., R. 22 E., Sections 30 and 31) and reviewing your irrigation system with you on March 14, we agree with the following points:

1. The present irrigation system on the uplands probably is a significant source of the water sustaining the wetlands along the bottom lands.
2. The extensive wetlands and brushy riparian areas on your ranch represent very valuable wildlife habitat for waterfowl, upland game birds (pheasants and turkeys), big game (deer), furbearers, and nongame wildlife. These types of habitats are in short supply across the nation and are becoming more and more scarce as wetlands are converted to other uses.
3. The coarse, porous soils on your property appear to require more than an average water supply to maintain the high water tables supporting the wetlands.
4. A change in the irrigation system to significantly less water applied and/or sprinkler irrigation would almost certainly lead to a net loss of these valuable wetland habitats.

In view of the above, the Department of Fish and Game does support your effort to obtain sufficient water rights to maintain your present irrigation system. You might consider requesting a separate allocation specifically for wildlife as an alternative route to obtaining an adequate water supply to maintain your present program. If we can provide you more information or assistance, please contact Regional Wildlife Biologist Mike Scott at our Salmon Office.

Sincerely,

Herb Pollard
