Supplement to Form 110,

Mrs. E. M. Eldridge, H. E.

The applicant and deceased husband aettled on this claim in the spring of 1887, after practically all of the land along the Hughes Creek bottom, from the mouth of the creek up the stream for a distance of about five miles, had been located for placer purposes. Later on a portion of the land upon which applicant settled was patented as placer ground. That portion of the ground along the creek which divides the applicants claim into two noncontiguous tracts, it is held, never exhibited any paying values and was simply patented in order to hold this lower creek bottom as a dumping ground for the placer workings higher up the creek. Furthermore, said applicant has always held and improved a large portion of the patented placer ground, such as is shown on the accompanying map, and at no time has she been requested to discontinue the occupancy of the land. Also the fact that aside from that portion of the Eagleson claim which lies adjacent to this noncontiguous tract on the south, there is absolutely no agricultural land whatever on the southwest, appears to add to the claimants priority of right to the tract, of eighteen acres in area, which is separated from the main ranch by the patented placer claims.

I take this means of putting before the Service the fact that the present applicant has a preference right to the two noncontiguous tracts of land for which she is making application.
