Counsel for the United States of America

**IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS**

In Re SRBA	)	Subcase No. 75-11200
	)	
Case Number: 39576	)	AFFIDAVIT OF GARY L. MILLS
_____	)	

State of: IDAHO
County of: LEMHI

Gary L. Mills, being first duly sworn upon oath, deposes and says:

1. I am currently employed by the United States Department of Agriculture, Forest Service (Forest Service), as the Fire Management Officer for the Salmon-Challis National Forest. I have been employed by the Forest Service for 36 years.

2. As part of my assigned duties and responsibilities as the FMO for the Salmon-Challis National Forest, I am familiar with use at Moyer Administrative Site.

3. I have reviewed the reserved water right claim, as amended and attached as Exhibit 1, submitted by the Forest Service for Moyer Administrative Site (Claim).

4. The Claim was prepared by Forest Service personnel as part of their normal duties. I verified the legal locations as set forth and described in Exhibit 1 and have personal knowledge that the location of the point of diversion and point of use and source of the water supply are true and correct as described in Exhibit 1.

5. The Claim is situated wholly within National Forest System lands. It is currently utilized by the Forest Service at Moyer Administrative Site to manage National Forest System lands.

6. The Claim is necessary for the administration of the National Forest pursuant to the Organic Administration Act of 1897, 16 U.S.C. § 475 *et seq.*, for the purposes of securing favorable conditions of water flow and to furnish a continuous supply of timber.

7. The United States filed this Claim for use in association with Moyer Administrative Site, located in a remote part of the Salmon-Challis National Forest. The administrative site includes two fourplex apartments, seven duplexes, a laundry, a shop, storage buildings, two helipads and other capital improvements. It is used every year to house summer crews including a fire crew, a rappelling crew (specialized fire fighters who rappel from a hovering helicopter down into a fire), trail crew, a timber saw crew and a fish inventory crew.

Personnel utilize water at this site for administrative purposes. Occupation and use of Moyer Administrative Site is essential to the overall administration of Forest Service programs on this part of the Salmon-Challis National Forest. A primary purpose is fire: fire detection, fire suppression, fire management and fire prevention to improve and protect the forest from destruction by fire, thereby ensuring continued viability of the resources on surrounding federally reserved National Forest System land. The presence of other resource management crews also contributes to the prevention of destruction by fire and other depredations. This contributes directly to enhancing resource conditions such as watershed protection, preservation of timber stands, wild land character, and public safety thereby directly contributing to the maintenance of and improving watershed conditions, timber production and favorable conditions of water flow.

8. Based upon personal experience and knowledge, discussions with Forest Service personnel and review of relevant Forest Service records, including but not limited to, on-site inspection records, water has been historically, and is presently utilized at Moyer Administrative Site in quantities up to and including 0.06 c.f.s. during the period of January 1 through December 31, as described in Exhibit 1.

9. Based upon the forgoing, I have personal knowledge of the following elements of the reserved water right claim:

a. The name and address of the claimant is:
