STANDARD FORM 5

**STIPULATED ELEMENTS OF A
WATER RIGHT**

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties agree and stipulate that the elements of this water right should be described in accordance with the attached pages, which have been initialed by the parties. Each party shall bear such party's own costs and attorney fees in the above-captioned matter. In the event IDWR does not indicate its concurrence with this Standard Form 5, and the elements of this water right are subsequently changed through settlement with IDWR or through judicial proceedings, the claimant of the water right hereby agrees that claimant will not allow any element of this water right to be increased (i.e. increases to quantity, purposes of use, season of use, number of irrigated acres, or changes to a more senior priority date or different points of diversion) unless expressly agreed to in writing by the parties; claimant, however, may without the prior approval of the parties hereto permit the location of the irrigated acres to be changed to other locations on claimant's land, which does not include public lands, and the change does not increase the total number of irrigated acres stipulated hereto.
