Case No. 39576	**AMENDED AFFIDAVIT OF LISA A. JARO**

STATE OF IDAHO)
) ss.
COUNTY OF LINCOLN)

I Lisa A. Jaro, being of lawful age, and having first been duly sworn, do depose and state:

1. My name is Lisa A. Jaro. I am a graduate of the University of Idaho. I received a Bachelor of Science degree in Technology of Agricultural Science in 2002. I am an employee of the U.S., Department of Interior, Bureau of Land Management. The following statements are based upon my personal knowledge. My present position is that of Natural Resource Specialist

(Water Rights) for the United States, Department of Interior, Bureau of Land Management (hereinafter "BLM"), Upper Snake River District, Shoshone Field Office, located in Shoshone, Idaho. I have extensive knowledge of, and experience with, the official business records of BLM associated with its water right claim filings in the Snake River Basin Adjudication (hereinafter "SRBA"), including but not limited to: BLM water right claim files; BLM water right field investigations; Master Title Plats (hereinafter "MTP"); Historical Indexes (hereinafter "HI"); and Control Document Index cards (hereinafter "CDI cards"). Since April 2000, I have been dealing with water rights, and I have: investigated hundreds of claims; collected, compiled and analyzed factual information and evidence for over a thousand water right claims; reviewed and analyzed official business records associated with water rights that are maintained by BLM, the Idaho Department of Water Resources (hereinafter "IDWR"), several Idaho Counties, and various federal agencies.

2. As part of my assigned duties and responsibilities since January 2003, I am responsible for coordinating the activities of BLM with the SRBA for the Shoshone Field Office of the Upper Snake River District (hereinafter "USRD"), and individually responsible for handling the water right claims made by the United States of America on behalf of BLM for the Shoshone Field Office within the USRD.

3. At the request of counsel for the United States, I am amending my previous affidavit to make certain corrections. This amended affidavit shall supercede and replace my previous affidavit in its entirety. The following is a summary of the important changes:

a. Two subcase numbers were mistakenly included on Attachment 1 to my previous affidavit and have been removed from this affidavit: 37-16632 and 37-17349.

MAY-15-2003 THU 09:39 AM FAX NO. P. 03

b. Four subcase numbers were mistakenly omitted from Attachment 1 to my previous affidavit and have been added to this affidavit: 37-16349, 37-16665, 37-16667, and 37-16669. I have researched these additional subcases and they are properly presented within this affidavit.

c. This amended affidavit corrects my previous affidavit to properly reference Attachment 1 throughout this amended affidavit.

4. At the request of counsel for the United States, I have reviewed the official business records of BLM that comprise the SRBA Water Right Claim files for the SRBA subcases listed on Attachment 1. The subcases shown in Attachment 1 are BLM water right claims to natural playa lakes (i.e. waterholes) and naturally-occurring free-flowing springs.

5. The Master Title Plats are official business records of the United States that identify United States' property and its status. The MTP is the United States' official Record of Title. It is a graphic display of township survey data, and are drafted from information abstracted, compiled, and composed from the latest approved U.S. Government Survey Plats, survey field notes, and protraction diagrams. It describes the locations of United States property, aliquot parcels, and government surveyed "lots." I have reviewed these records and determined that the federal public domain containing the water sources asserted in SRBA claims listed on Attachment 1 were located on unreserved federal public domain as of April 17, 1926; and this land currently remains under Department of Interior administration, except as follows. The following is a summary of land acquisitions associated with certain captioned subcases.

6. The claimed water sources described by the subcases listed on Attachment 1 were confirmed by field investigation.

a. **Subcase 37-20119:**

The tributary described in the Director's Report is listed as Magic Reservoir. BLM objected to this claim to make the tributary description consistent with IDWR data entry standards. According to those standards, man-made structures are not to be used as tributary names. Investigation of the claim has determined that the tributary would be better described as "Big Wood River."

MAY-15-2003 THU 09:40 AM FAX NO. P. 07

7. Based upon the field verification and my review of the field investigation documents, the source of water for the subcases listed on Attachment 1 is a natural playa lake (i.e. waterhole) or a free-flowing spring located at the claimed Point of Diversion and Place(s) of Use, except as follows.

a. **Subcase 37-20041:**

BLM objected to the Point of Diversion (hereinafter "POD") and the Place of Use (hereinafter "POU") description that was recommended in the Director's Report. The Notice of Claim submitted to IDWR correctly described the claim, but BLM provided an incorrect map with the notice. The POD was recommended as NWSENW, S27, T03N, R19E, but should be described in the NWSWNW. See attachments to BLM's Standard Form 1 Objection. The POU was recommended as SENW, S27, T03N, R19E, but should be described in the SWNW. See attachments to BLM's Standard Form 1 Objection.

The POU was recommended as NENE, S33, T04S, R13E, but should be described in the SWNW. See attachments to BLM's Standard Form 1 Objection.
