	)	
Case No. 39576	)	FINDINGS OF FACT AND
	)	CONCLUSIONS OF LAW
_____	)	FOR WATER RIGHT 61-11921

I. FINDINGS OF FACT

A notice of late claim was filed for this water right pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of this water right.

An objection was filed on November 13, 2000, by Carlene Smith and Batruel Dairy. An objection was also filed on October 29, 2001, by the United States of America, Bureau of Land Management. On November 14, and December 15, 2000, a response was filed by Batruel Dairy and Roger Jones, respectively. The parties filed a *Stipulation to Resolve Objections* in this subcase and other subcases owned by Batruel Dairy. The Idaho Department of Water Resources was not a signature to the *Stipulation*. The parties filed a Standard Form 5 on October 23, 2002. On October 29, 2002, IDWR filed a *Notice of IDWR Non-Concurrence in Basin 61 Subcase Settlements Submitted Without IDWR Signature*. The attachment to the *Notice* made changes to water right 61-11921 (see attachment to this master's report.) Those changes are as follows: "priority date" changes from March 15, 1898 to July 31, 1898; add domestic use as a "purpose of use"; change acres from 208 to 316 acres; include additional language; and make changes to existing language. A hearing was held on the *Notice of Non-Concurrence*. The parties agreed that the water rights should be recommended as per the attachments to the *Notice of Non-Concurrence*.

II. CONCLUSIONS OF LAW

Therefore, based on the file and record herein and pursuant to the *Notice of IDWR Non-Concurrence* and the *Standard Form 5*, IT IS RECOMMENDED that the elements for water right 61-11921 be decreed as set forth in the *Attached Recommendation for Partial Decree pursuant to I.R.C.P. 54(b)*.

DATED: June 11, 2003.

IDWR REPORT REGARDING
NON-CONCURRENCE WITH THE PARTIES' STIPULATIONS

IDWR submits this report as an explanation to the Court and the parties of its non-concurrence with the stipulations filed in the following Smith/Batrue subcases:

61-293B – IDWR cannot concur with the parties' stipulation since it does not resolve the BLM's objection to the place of use element. However, it is IDWR's understanding that there is a Stipulation to Resolve the United States' objections to this water right that has yet to be finalized. It is further IDWR's understanding that this stipulation allows certain public lands to remain on this water right. Once the stipulation with the United States has been filed, IDWR will be able to concur with the place of use element as agreed upon by the parties.

Further, IDWR disagrees with the priority date. The priority date originally recommended by IDWR was a typographical error. The appropriate priority date as agreed upon by the parties and IDWR is August 1, 1898; this priority date is identified on the revised recommendation attached hereto and incorporated herein.

61-293C – See explanation concerning priority date for 61-293B above. In addition, the ownership of this water right has changed. Filed contemporaneously herewith is a Notice of Completed Administrative Proceeding that changes the ownership and revises the priority date to August 1, 1898. Although this subcase is an uncontested overlapping water right, correcting the priority date that is based upon a typographical error is appropriate.

61-293D - See explanation concerning priority date for 61-293B above.

61-2000B - IDWR cannot concur with the quantity as specified under the purpose and period of use on the amended recommendation attached to the parties' stipulation. The quantity element under the purpose and period of use should be 2.056 cfs; the same quantity as listed under the quantity element of this water right. Also, a necessary remark was not included in "Other Provisions Necessary for Definition or Administration of This Water Right" pertaining to the lockable device. Attached hereto is a revised recommendation which is incorporated herein that properly lists these elements.

61-11921 – IDWR cannot concur with the parties' stipulation since it does not resolve the BLM's objection to the place of use element. However, as discussed above in water right number 61-293B, once the United States' stipulation is filed, IDWR will be able to concur with the place of use element as agreed upon by the parties.

IDWR further disagrees with the quantity element and the priority date. The quantity element should be 1.16 cfs based upon the agreed capacity of the ditch not 1.24 cfs. The attached recommendation properly lists the quantity element for this water right. The quantity element under the purpose and period of use should remain as reflected in the parties' stipulation with stockwater and domestic use being non-cumulative.

The appropriate priority date as agreed upon by the parties for this water right is July 31, 1898, and is identified on the revised recommendation attached hereto and incorporated herein.
