STOCKWATER Same as IRRIGATION

60 ACRES TOTAL

10 ACRES TOTAL

Use of this right with right no. 63-5334 is limited to the irrigation of a combined total of 56 acres in a single irrigation season.

This right is limited to the irrigation of 10 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use

The right holder shall designate one person who is responsible for monitoring and recording the flow rates measured and diverted from the various sources and points of diversion from the sources described by these water rights. Every year the main address and telephone number of the person responsible for monitoring and recording shall be sent to the Department of Water Resources prior to the irrigation season. Any change in the responsible person must be sent to the department within one week following the change. The notice of the responsible person must also reference the water rights that are being monitored and recorded.

The person in charge of monitoring and recording the diversion of water must submit measurement records for the first two (2) years of water use. Following the first two years of water use, reports need not be submitted to the department unless specifically required by subsequent written request by the department.

Source is also known as Corell Creek.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

The right holder shall maintain lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.

Failure of the right holder to comply with the conditions of Transfer 69538 is cause for the Director to rescind approval of the transfer.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion. Measuring devices shall also be installed and maintained at a) the mouth of Corral Creek where it discharges into Mores Creek and b) the mouth of Minneha Creek where it discharges into Mores Creek.
