Re: Water Right 65-00054X

Dear Sir:

My recent letter to you of 7/31/89 discussed the place of use for the above decreed right and the need to correct the water right record. However, additional information relayed to me by Dave Shaw, Adjudication Bureau Chief in the Idaho Department of Water Resources State Office, shows that your pasture is entirely in the SENE of Sec. 13. Apparently, some distortion occurred in copying the topographic map that I used in determining the pasture boundary. Therefore, no action is required to update the water right record.

Please disregard my comments in the previous letter concerning the description of 65-00054X. An adjudication claim should still be filed to retain the right, but the claim can be filed during the Gem County claims-taking period of 10/30/89 to 2/14/90. I apologize for my error and any subsequent inconvenience.

Sincerely,

Steve Lester 
Sr. Water Resource Agent

Re: Water Use Complaint

Dear Sir:

RECEIVED
AUG 01 1989

Department of Water Resources

This letter concerns complaints filed with the Idaho Department of Water Resources (IDWR) regarding your use of Payette River water for irrigation and stockwater uses in the pasture south of Highway 52 and west of Mill Road. The pertinent water right is decreed right 65-00054X through the Last Chance Ditch Company. The right describes 37 acres of irrigation in the SENE Sec. 13, T6N, R2W.

A chronology of events is provided for your consideration. The following information summarizes the situation.

7/5/89 - Helen Ranstrom called the IDWR State Office to complain about excessive watering of your pasture and related damage to her property.

7/11/89 - The Western Regional Office received the 7/7/89 memo from the State Office concerning the Ranstrom complaint.

7/13/89 - I called the Ranstrom residence twice but no one was home.

7/17/89 - Mr. Ranstrom returned my call of 7/13. A field visit appointment was made for 7/20/89 to investigate the complaint.

7/18/89 - Juanita Quick called me to complain about your water use practices. The complaint was similar to H. Ranstrom's.

7/20/89 - The field visit occurred.

The following people were present during all or part of the on-site investigation: D. Vaughn, H. Ranstrom, J. Quick, Sally Graham, Eddy (last name unknown), and me.

The inspection revealed that a low point exists in the portion of the field adjacent to Hwy. 52. Parts of the pasture were saturated and had standing water several inches deep. Drainage of part of the area is insufficient to prevent significant standing water. Our discussion of this lead to suggestions to improve the situation. The best recommendation was to construct an adequate drain ditch to drain water to the west into what was identified as the Last Chance drain ditch. It was not possible during the visit to determine the cause of the obvious damage to the complainants' property. For more information on improving irrigation practices, please contact the local SCS and/or ASCS offices in Emmett.

Letter to D. Vaughn
page 2

The statutory authority of the IDWR does not extend to such situations involving complaints of property damage due to water use. These are civil matters between the involved private parties. As with other property damage issues, a water user may be liable for damages caused by irrigation and other water use practices.

Additional research shows that irrigation rights in the Payette River Decree imply stockwater use as an incidental use in the same lands described for irrigation. Therefore, the stockwater use is covered by right 65-00054X. The irrigation and implied stockwater use under 65-00054X are decreed in the SENE Sec. 13. However, the field investigation revealed that part of your irrigated pasture, approximately two acres, falls within the NENE Sec. 13 and is therefore not protected by the present description of the water right. This discrepancy should be corrected in one of two ways. One, an Application for Transfer could be filed to correct the water right record. Two, an Adjudication Claim may be filed to show the current situation as long as the area in the NENE (part of field bordering Hwy. 52) was irrigated prior to the beginning of the Snake River Basin Adjudication, which commenced on 11/19/1987.

As part of the Snake River Basin Adjudication, an Adjudication Claim must be filed to retain decreed right 65-00054X. The same is true for most existing water rights. Gem County claims-taking is scheduled to start on 10/30/1989. Because a claim must be filed anyway, I recommend that you use the Adjudication Claim alternative to clarify and protect your water right. The use of the Last Chance Ditch Co. right 65-00054X is not legally protected in the NENE Sec. 13 until the water right record is corrected. Your interests are served by acting immediately in this matter. I strongly urge you to correct this matter within 30 days to avoid the possibility of an illegal diversion.

I hope the above information proves useful in settling the controversy between the involved parties.

Sincerely,

Steve Lester
Sr. Water Resource Agent

DIRK KEMPTHORNE
Governor

KARL J. DREHER
Director

Dear Basin 65 water user:

This letter is to inform you that you may be eligible to file a stockwater claim with the Idaho Department of Water Resources (IDWR) in connection with the Snake River Basin Adjudication (SRBA). IDWR is sending this letter to water users in Basin 65 who might have relied upon the non-irrigation season stockwater provision in the Payette Adjudication. This provision states:

"When stockwater is not a specifically mentioned use for a right that includes irrigation, a reasonable flow is implied and included for the watering of livestock during the non-irrigation season."

In another basin, the Idaho Supreme Court struck down general provisions that contained similar language. The non-irrigation season stockwater language quoted above was not included in the General Provisions for Basin 65 because of the Idaho Supreme Court's ruling.

IDWR recognizes that in reliance on the non-irrigation season stockwater language in the Payette Adjudication, water users might not have filed stockwater claims in the SRBA to cover the non-irrigation season period. Individuals who historically watered livestock during the non-irrigation season without a separate stockwater claim might desire to file a new stockwater claim with IDWR.

To be eligible for a new non-irrigation season stockwater claim:

1. You must have actually and historically watered livestock during the non-irrigation season without a separate stockwater right.
2. You must have filed a surface water irrigation claim in both the Payette Adjudication and the SRBA.
3. You must not have filed a stockwater claim with the surface water irrigation claim.

If you meet these three requirements, you may file a Notice of Claim form for stockwater with IDWR. **To have a timely filing you must file this claim with IDWR by May 25, 2001.** IDWR will waive filing fees for these stockwater claims if filed before this deadline. Failure to file your claim in a timely manner may prevent you from claiming it in the future. Notice of Claim forms are available on IDWR's website at www.idwr.state.id.us/info/water/srba/forms.htm or from any IDWR office. Claimants can call IDWR, Western Region at (208) 334-2190 to make an appointment if they need assistance filling out a Notice of Claim form.

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief
