10. **I object because:**

- ☒ This water right should not exist.
- ☐ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S):

This water right relies upon point of diversions and a ditch that have not been utilized by the Claimant or her predecessors for approximately 50 years. The point of diversion from Aspen Creek is located on property owned by family members of this objecting party. This objecting party and his family members own three water rights in Aspen Creek also diverted at this same point, i.e., 29-

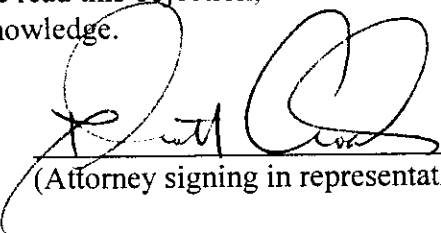

2174, 29-2176, and 29-11182. These three water rights are the only water rights that have been diverted from Aspen Creek at this point for decades. No one else, including the Claimant, has diverted, or even attempted to divert, water from Aspen Creek at this point under any other water rights for many decades.

The ditch originally used under this Claim by the Claimant's predecessors has also been abandoned for decades beyond the point needed to serve the water rights of this objecting party, as listed above. The ditch, beyond that point, is not functional. A flume over one ravine has not existed for decades. The ditch simply cannot deliver water from Aspen Creek to the Claimant's place of use and has not for approximately 50 years. Similarly, the objecting party does not believe that the ditch could or does intercept any spring waters along the way which could be delivered to the Claimant's place of use. Finally, this objecting party is not aware of any irrigation taking place at the alleged place of use for decades. Therefore this objecting party believes that the subject water right has been forfeited and should not be included in the Court's decree.
