Address: 727 East 1550 North, Shelley, Idaho 83274

D. OBJECTION:

I object to the following elements as recommended in the Director's Report.

1. ☐ **Name and Address**

Should be:

2. ☐ **Source**

Should be:

3. ☒ **Quantity**

Should be reduced by the amount of water historically intercepted by the ditch that historically collected water from two springs as it traversed west from the original point of diversion on Aspen Creek to Cherry Creek.

4. ☐ **Priority Date**

Should be:

5. ☐ **Point(s) of Diversion**

Should be:

6. ☐ **Instream Flow Description**

Should be:

7. ☐ **Purpose(s) of Use**

Should be:

8. ☐ **Period of Year**

Should be:

9. ☐ **Place of Use**

Should be:

10. **I object because:**

- ☐ This water right should not exist.
- ☐ This water right was not recommended, but should be recommended with the elements described above.

E. REASONS SUPPORTING OBJECTION(S):

This water right, as originally filed, diverted water from 3 sources; i.e., Aspen Creek and two unnamed springs along the historic ditch. The Claimants and/or their predecessors ceased using that ditch approximately 50 years ago, apparently changing their point of diversion several miles downstream on Aspen Creek. In so doing, they abandoned and/or forfeited that quantity of water which was originally supplied from those springs. Those springs do not flow into Aspen Creek and cannot be replaced with Aspen Creek water. This objecting party does not know how much water those two springs contributed historically to the flow in that ditch; however, this water right should be reduced by whatever amount that was.

The objecting party has knowledge of these facts because the point of diversion for the historic ditch is located on property owned by this objecting party's family. This objecting party states that no water has been diverted from Aspen Creek into the historic ditch by any party for decades, other than this objecting party and family members who are co-owners of three water rights in Aspen Creek, i.e., 29-2174, 29-2176, and 29-11182. The initial section of the ditch has been exclusively used and maintained by family members between the point of diversion from Aspen Creek and the authorized places of use under these three family water rights. Beyond that point, the ditch has not been used by anyone for any purpose for approximately 50 years, and it essentially no longer exists.

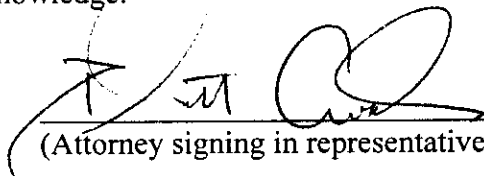

In addition, the Claimants have, by moving their point of diversion several miles downstream, effectively converted this water right into a highwater water right because Aspen Creek rarely reaches their new point of diversion. One of this objecting party's upstream water rights is junior to the Claimants' right. However, this objecting party should not be required to bypass water needed to satisfy his junior right in order to satisfy the Claimants' right, except in those rare high water conditions where it is likely that such water will actually reach the Claimants' new point of diversion.

Therefore this objecting party respectfully requests that the Claimants' water right be modified accordingly in the Court's decree.
