RE: Special Master's Reports -Problems
Basins 82-86 where SF-5s were submitted.

Certain BLM claims objected to by BLM and State of Idaho were resolved by SF-5. The claims were "dual" claims containing a state and federal basis.

Background: The parties have been struggling with how to resolve BLM objections to its own "dual" claims to fix things like POD and POU such that IDWR would sign the SF-5. BLM prefers the federal basis over the state basis, but IDWR holds no opinion with regard to federal reserve rights so would not sign onto an SF-5 in the past that contained a reference to a federal reserve basis. If the State of Idaho was an objector, then we were preparing SF-5s that struck out any reference to IDWR concurrence, elected the federal reserve, and the Attorney General signature as Objector represented concurrence from the State of Idaho. A problem arose for a few subcases where BLM objected but the State of Idaho did not. Yes, it was a dual claim, and we wanted the federal basis, but there was no objection by the State, so we had no one to sign onto an SF-5 with us. We tried several things but finally developed a method where IDWR could sign SF-5s containing a federal reserve basis by leaving them as "dual" claims. Now we use this method even if the State of Idaho is also an objector. Assertion of a preference for basis (election) is then identified at the Evidentiary Hearing (as is done for all other "dual" claims).

We finally developed a method to obtain IDWR concurrence for all subcases that contained a "dual" basis. As long as the SF-5 contains a state basis in it somewhere, IDWR is now signing SF-5s and conditions its signature such that it holds no opinion with regard to the federal basis (see signature page of SF-5). Even though BLM prefers the federal basis, the SF-5 preserves the "dual" based nature of the original abstract/dir rpt recommendation, so that IDWR can concur with changes (i.e. there is a state basis about which they can hold an opinion). These new SF-5s do not elect a basis. The SF-5: changes the state-based priority date to 06-28-1934 so that the State of Idaho (as an objector) will sign the SF-5, preserves the federal reserve basis (note that it is not struck out), and makes changes to other elements (like POD or POU). The amended notice of claim attached to the SF-5 now resembles all other "dual" claims where BLM then asserts a preference for the federal reserve basis.

The Special Master's Report and Recommendation (SMRR) for the following subcases should have made changes to the elements described in the SF-5 and then award the federal basis pursuant to the Affidavits filed and the Evidentiary Hearing. Note that the affidavits include these numbers in the section of the affidavit that says the elements of the federal reserve are as abstracted/recommended, except as corrected by the SF-5s. The SF-5s did not elect a basis.

Is this something the court can resolve sui sponte, or should we file Motions to Alter or Amend?

82-10677 * SF-5 preserves "dual" basis; BLM asserted preference for federal reserve basis (see paragraph 10 of PWR Affidavit and evidentiary hearing record); SMRR awards state basis instead of federal reserve.

82-10678 *

82-10729 *

82-10740 *

82-10749 *

82-10831 *

82-10865 *

82-11992 SF-5 dismissed claim –SMRR is correct and for right reason.

82-12000 SF-5 renumbered the claim to 85-15394, SMRR recommendation was correct in disallowing the old number 82-12000 but for the wrong reason: "However, on August 20, 2003, the United States, with IDWR's concurrence, filed an Amended Claim Standard Form 5 ~~agreeing to a June 28, 1934, state law-based beneficial use priority date and~~ agreeing that the claim should be renumbered to 85-15394 and 82-12000 disallowed."

85-15394 *

83-10370 *

83-10636 *

83-10654 *

84-11925 *

84-11958 *

84-12045 SF-5 preserved "dual" basis; PWR affidavit stated in paragraph 6 that the POD was on private land in 1926 which would have precluded a PWR 107 reservation; SMMR correctly awarded a state basis but for the wrong reason (should have been because of the Affidavit and not the SF-5 –the SF-5 did not elect a basis).

85-15241 SMRR has not been issued yet. Note that the SF-5 preserves the "dual" basis and BLM prefers the federal basis (see paragraph 10 of PWR affidavit, and evidentiary hearing record).

85-15267 *

85-10860 *

10. I have reviewed the BLM official business records for each of the subcases subject to this affidavit for a federal reserved water right pursuant to PWR 107. The elements of the claimed water rights have been verified through examination of claim files and physical field investigations and are correctly described in the abstract/recommendation of the claims issued by IDWR. The quantity for a federal reservation based upon Public Water Reserve 107 was stipulated to be 0.02 cfs, not to exceed 13,000 gpd. For the following subcases and based upon my review and independent verification, certain elements of the federal reserve basis are not exactly as described in IDWR's original abstract/recommendation and those elements have been altered by amended abstract/recommendations attached to Standard Forms 5 (hereinafter "SF-5"), amended claims that were filed in the subcases identified below:

a. **Subcase 82-10677:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

b. **Subcase 82-10678:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

c. **Subcase 82-10729:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

d. **Subcase 82-10740:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 20, 2003.

e. **Subcase 82-10749:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

f. **Subcase 82-10831:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

g. **Subcase 82-10865:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

SMR's OK → h. **Subcase 82-11992:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003 to **dismiss** this claim.

i. **Subcase 82-12000:** IDWR's original abstract/recommendation describes this claim as residing in Basin 82. Review of IDWR's Administrative Basin Boundary Map identifies this claim as actually residing in Basin 85. BLM and IDWR filed an SF-5 (amended claim) with the court on August 20, 2003 that **renumbers this claim to 85-15394.**

STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA
Case No. 39576

SUBCASE NO.: 82-10677

STANDARD FORM 5
AMENDED CLAIM

ck

For Domestic and Stockwater Rights

This form is used to report the stipulated elements of one "domestic and/or stockwater" right acquired under state law and/or one federal reserved water right and to amend the Notice of Claim. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the elements of this water right should be decreed as described per the attached Amended Claim, except IDWR's concurrence is limited to the state based elements only. Since by law IDWR neither investigates nor recommends federal reserved water rights it has no knowledge of, nor opinion regarding, the validity of the federal basis of the right. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages.

In Re SRBA

Case No. 39576

)
) Subcase 82-10677
) (USDI/BLM)
)
) SPECIAL MASTER REPORT

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 22 (IDWR Basin 82)* on March 19, 1999. The Director recommended 82-10677 to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from a spring for year-'round stockwater use in Idaho County with a priority date of January 1, 1861, based on beneficial use. The Director also noted: "This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Water Reserve 107."

On June 2, 1999, the State of Idaho filed an *Objection* in multiple subcases, including subcase 82-10677, objecting to priority date ("If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934.") and alleging that the water right should not exist. On September 17, 1999, the United States filed an *Objection* to source.

On August 29, 2002, the United States and certain private parties filed a *Stipulation* in multiple subcases, including 82-10677 and an *Order Granting Withdrawal* was entered on September 5, 2002. On June 10, 2003, the United States filed a *Notice Regarding Priority Date* stating the priority date for the federal reserve basis of the water right claim should be April 17, 1926. On June 11, 2003, an *Order Dismissing State of Idaho Objections* was entered based on the parties' *Stipulation to Resolve Objections*. However, on August 14, 2003, the United States,

with IDWR concurrence, filed an *Amended Claim Standard Form 5* agreeing to a June 28, 1934 priority date.

Conclusions of Law

The United States of America is entitled to a partial decree adjudicating a water right as described in the *Amended Claim SF-5* and the attached *Special Master Recommendation for Partial Decree for Water Right 82-10677*.

DATED November 17, 2003.

DISTRICT COURT-SRBA
TWIN FALLS CO., IDAHO
FILED

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA) Subcase 82-12000
Case No. 39576) (renumbered to 85-15394)
) (USD/BLM)
)
) SPECIAL MASTER REPORT
) AND RECOMMENDATION

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 22 (IDWR Basin 82)* on March 19, 1999. The Director recommended 82-12000 to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from a spring for year-'round stockwater use in Idaho County with a priority date of January 1, 1878, based on beneficial use. The Director also noted: "This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Water Reserve 107."

On June 2, 1999, the State of Idaho filed an *Objection* in multiple subcases, including subcase 82-12000, objecting to priority date ("If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934.") and alleging that the water right should not exist. On September 17, 1999, the United States filed an *Objection* to basin number.

On August 29, 2002, the United States and certain private parties filed a *Stipulation* in multiple subcases, including 82-12000, and an *Order Granting Withdrawal of Objections and Responses* was entered on September 5, 2002. On June 11, 2003, an *Order Dismissing State of Idaho Objections* was entered based on the parties' *Stipulation to Resolve Objections*.

The United States filed a *Notice of Priority Date* on June 10, 2003, stating the priority date for the federal reserve basis of the water right claim should be April 17, 1926. However, on August 20, 2003, the United States, with IDWR's concurrence, filed an *Amended Claim Standard Form 5* agreeing to a June 28, 1934, state law based beneficial use priority date and agreeing that the claim should be renumbered to 85-15394 and 82-12000 disallowed.

Conclusions of Law

The United States of America is entitled to a partial decree adjudicating a water right under state law-based claim 85-15394 as described in the *Amended Claim SF-5* and the attached *Special Master Recommendation for Partial Decree for Water Right 85-15394*.

Recommendation

THEREFORE, IT IS RECOMMENDED that claim 82-12000 be disallowed, the claim having been renumbered as 85-15394.

DATED November 20, 2003.

RECOMMENDATION

NOV 20 2003

David A. [Signature]
SPECIAL MASTER

10. I have reviewed the BLM official business records for each of the subcases subject to this affidavit for a federal reserved water right pursuant to PWR 107. The elements of the claimed water rights have been verified through examination of claim files and physical field investigations and are correctly described in the abstract/recommendation of the claims issued by IDWR. The quantity for a federal reservation based upon Public Water Reserve 107 was stipulated to be 0.02 cfs, not to exceed 13,000 gpd. For the following subcases and based upon my review and independent verification, certain elements of the federal reserve basis are not exactly as described in IDWR's original abstract/recommendation and those elements have been altered by amended abstract/recommendations attached to Standard Forms 5 (hereinafter "SF-5"), amended claims that were filed in the subcases identified below:

- a. **Subcase 83-10370:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.
- b. **Subcase 83-10636:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.
- c. **Subcase 83-10654:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

RECOMMENDATION

NOV 20 2003

6. The MTPs are official business records of the United States that identify United States' property and its status. The MTP is the United States' official Record of Title. It is a graphic display of township survey data, and are drafted from information abstracted, compiled, and composed from the latest approved U.S. Government Survey Plats, survey field notes, and protraction diagrams. It describes the locations of United States property, aliquot parcels, and government surveyed "lots". I have reviewed these records and determined that the federal public domain containing the water sources asserted in SRBA claims listed on Attachment 1 are located on unreserved federal public domain as of April 17, 1926; and this land currently remains under Department of Interior administration (except where specifically noted below). The following is a summary of land acquisitions associated with the subcases listed on Attachment 1.

a. **Subcase 84-12045:** United States Cash Entry Patent (CE Pat) number 3610 was issued to George W. Snyder on 11/02/1903. Subsequently, the United States reacquired this land pursuant to Warranty Deed from Central Idaho Title, Inc. on 7/19/1990. The United States assigned serial number IDI-27563 to this action.

10. I have reviewed the BLM official business records for each of the subcases subject to this affidavit for a federal reserved water right pursuant to PWR 107. The elements of the claimed water rights have been verified through examination of claim files and physical field investigations and are correctly described in the abstract/recommendation of the claims issued by IDWR. The quantity for a federal reservation based upon Public Water Reserve 107 was stipulated to be 0.02 cfs, not to exceed 13,000 gpd. For the following subcases and based upon my review and independent verification, certain elements of the federal reserve basis are not exactly as described in IDWR's original abstract/recommendation and those elements have been altered by amended abstract/recommendations attached to Standard Forms 5 (hereinafter "SF-5"), amended claims that were filed in the subcases identified below:

a. **Subcase 84-11925:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

b. **Subcase 84-11958:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

c. **Subcase 84-12045:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003. SF-5 preserves "dual" claim

d. **Subcase 85-15241:** IDWR's abstract/recommendation described the Tributary as "Six Mile Canyon". Review of the U.S.G.S. 7 1/2 minute (topographic) map for this area describes the geological feature that the spring contributes water to as "Sixmile Canyon". The tributary would be more accurately described as "Sixmile Canyon", rather than referenced as "Six Mile Canyon". There has been no SF-5 filed in this subcase

e. **Subcase 85-15267:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

f. **Subcase 86-10860:** BLM and IDWR filed an SF-5 (amended claim) with the court on August 14, 2003.

In Re SRBA) Subcase 84-12045
Case No. 39576) (USDI/BLM)
)
) SPECIAL MASTER REPORT
)

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 22 (IDWR Basin 84)* on March 19, 1999. The Director recommended 84-12045 to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from a spring for year-'round stockwater use in Idaho County with a priority date of November 18, 1895, based on beneficial use. The Director also noted: "This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Water Reserve 107."

On June 2, 1999, the State of Idaho filed an *Objection* in multiple subcases, including subcase 84-12045, objecting to priority date ("If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934.") and alleging that the water right should not exist. On September 17, 1999, the United States filed an *Objection* to point of diversion.

On August 29, 2002, the United States and certain private parties filed a *Stipulation* in multiple subcases, including 84-12045, and an *Order Granting Withdrawal of Objections and Responses* was entered on September 5, 2002. On June 11, 2003, an *Order Dismissing State of Idaho Objections* was entered based on the parties' *Stipulation to Resolve Objections*.

The United States filed a *Notice of Priority Date* on June 10, 2003, stating the priority date for the federal reserve basis of the water right claim should be April 17, 1926. However, on

August 14, 2003, the United States, with IDWR's concurrence, filed an *Amended Claim Standard Form 5* agreeing to a June 28, 1934, state law based beneficial use priority date.

Conclusions of Law

The United States of America is entitled to a partial decree adjudicating a water right under state law-based claim 84-12045 as described in the *Amended Claim SF-5* and the attached *Special Master Recommendation for Partial Decree for Water Right 84-12045*.
