Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 22 (IDWR Basin 82)* on March 19, 1999. The Director recommended 82-10678 to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from a spring for year-'round stockwater use in Idaho County with a priority date of January 1, 1861, based on beneficial use. The Director also noted: "This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Water Reserve 107."

On June 2, 1999, the State of Idaho filed an *Objection* in multiple subcases, including subcase 82-10678, objecting to priority date ("If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934.") and alleging that the water right should not exist. On September 17, 1999, the United States filed an *Objection* to source, point of diversion and place of use.

On August 29, 2002, the United States and certain private parties filed a *Stipulation* in multiple subcases, including 82-10678 and an *Order Granting Withdrawal* was entered on September 5, 2002. On June 10, 2003, the United States filed a *Notice Regarding Priority Date* stating the priority date for the federal reserve basis of the water right claim should be April 17, 1926. On June 11, 2003, an *Order Dismissing State of Idaho Objections* was entered based on

the parties' *Stipulation to Resolve Objections*. On August 14, 2003, the United States, with IDWR's concurrence, filed an *Amended Claim Standard Form 5* to change the name of the tributary from "Buffalo Gulch Creek" to "Buffalo Gulch" and to change the point of diversion and place of use. The priority date noted in the *SF-5* was June 28, 1934, because IDWR's concurrence was limited to the state based elements only: "Since by law IDWR neither investigates nor recommends federal reserved water rights it has no knowledge of, nor opinion regarding, the validity of the federal basis of the right."

An I.C. §42-1411A hearing was held on September 25, 2003, for the United States to demonstrate a *prima facie* case of the existence of the water right established under federal law (even though objections to the claim were filed). On the date of the hearing, the United States submitted an affidavit by Frederic W. Price (a BLM water rights specialist) who said the land surrounding the claim was unreserved federal public land as of April 17, 1926, the water source was confirmed by field investigation and there is sufficient surface water at the site for consumption by livestock.

The Special Master entered a *Special Master Report* on November 17, 2003, recommending that the water right be decreed based on state law with a priority date of June 28, 1934. But on December 19, 2003, the United States filed a *Motion to Alter or Amend* stating that the United States did not waive its claim based on federal law by signing the *SF-5*. That fact was confirmed during a hearing on January 15, 2004.

Order

THEREFORE, IT IS ORDERED that the United States' *Motion to Alter or Amend* is granted.

Conclusions of Law

The United States of America is entitled to a partial decree adjudicating a federal reserved water right for claim 82-10678 as described in the attached *Amended Special Master Recommendation for Partial Decree for Water Right 82-10678*.
