I. PROCEDURAL BACKGROUND

The above-captioned water rights were claimed in the SRBA as federal reserved water rights pursuant to Public Water Reserve 107, by the United States Department of the Interior, Bureau of Land Management. Notice of the elements of each claim was reported by the Idaho Department of Water Resources. Objections were filed by the State of Idaho regarding whether the claimed rights met the criteria for a federal reserved right pursuant to PWR 107.

On February 24, 2004, a trial was held on these and other claims pursuant to Idaho Code 42-1411A(12), which requires the United States to demonstrate a *prima facie* showing of the existence of the claimed federal reserve water right. In conjunction with that trial, the United States filed affidavits, which were admitted into evidence, for each of the claimed rights to meet its burden.

II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

Based upon the file and record in these subcases, and the affidavits presented at the hearing on the matter, this Special Master makes the following findings of fact and conclusions of law:

1. Prior to April 17, 1926, the subject water source for each claim was located on unreserved federal public domain land.

2. Prior to April 17, 1926, no water rights had been established pursuant to state law for the use of the water from the subject water source for each claim.

3. On April 17, 1926, President Coolidge executed Public Water Reserve 107, which withdrew the 40 acre tract of land upon which the subject water source for each claim is located from the public domain. The tract of land withdrawn for each claim is described as the "place of use" element on each of the attached *Special Master's Recommendation*.

4. The subject water source for each claim consists of a spring or water hole of the type contemplated by Public Water Reserve 107.

5. Contemporaneously with the withdrawal of the land, President Coolidge impliedly reserved enough water to fulfill the primary purpose of the land reservation for each claim.

6. The minimum amount of water necessary to fulfill the primary purpose of the land reservation is the amount set forth in the "quantity" element on each of the attached *Special Master's Recommendation*.

7. The United States has satisfied its burden under Idaho Code section 42-1411A(12) as to the nature and existence of the claimed federal reserve water right for each claim.

8. The elements of the federal reserved water right for each claim are set forth on each of the attached *Special Master's Recommendation*.

III. RECOMMENDATION

Therefore, based on the file and record herein, IT IS RECOMMENDED that the above-captioned water rights be decreed as a federal reserved water right with the elements as set forth in each of the attached *Special Master's Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b)*. It is further recommended that to the extent any concomitant state-law water right was claimed in the alternative for the above-captioned rights, that said right not be confirmed in any partial or final decree.

Dated March 9, 2004.
