	)	37-20234 and 37-20235
	)	(6 FORMER PWR 107)

I. PROCEDURAL BACKGROUND

Claims were filed by the United States Bureau of Land Management for the above listed water rights. The United States originally claimed these rights under both state law and as a federal reservation. The state-based portion of each right was investigated by the Idaho Department of Water Resources ("IDWR") and reported in a *Director's Report*. IDWR did not investigate the federal reservation theory because those are based on federal law. I.C. § 42-1411A.

Objections were filed by Pickett Ranch & Sheep Co., Joe Tugaw, Jared Bedke, Bruce Bedke, Scott Bedke, Karl Bedke, Joyce Livestock Company, Jerry Hoagland, Michael Poulton, Gary Poulton, Western Stockgrowers Association and the State of Idaho. Those *Objections* were withdrawn on August 29, 2002. *Notice of Withdrawal of Objection* (August 29, 2002); *Stipulation to Resolve Objections* (March 11, 2003); *Revised Exhibits A and B Part 1 for Stipulation to Resolve Objections filed on March 11, 2003*. (April 11, 2003) An evidentiary hearing was held on April 23, 2003. The United States Bureau of Land Management withdrew the federal basis for these claims and opted to pursue these rights solely under the state basis. *Motion to Withdraw the Federal Law Reserved Right Basis for the Claim*

and to Proceed Under the State Law Beneficial Use Basis for the Claim. (June 13, 2003)

The United States BLM submitted an *Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Rights Claims*, an *Amended Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims*, an *Affidavit of Lisa A. Jaro* and an *Amended Affidavit of Lisa A. Jaro*. *Standard Forms 5* were filed February 9, 2004 and February 17, 2004.

II. STANDARD OF REVIEW

The United States claimed the priority date for these rights as January 1, 1879. That priority claim was investigated by IDWR and recommended in the *Director's Report*. Both the United States and IDWR agreed to later priorities in *Standard Form 5* settlement agreements. Recommendations in *Director's Reports* have *prima facie* weight as set forth in I.C. § 42-1411(4)-(5). Where the *Director's Report* draws a conclusion as to a element of a water right, the *prima facie* weight afforded the *Director's Report* confers a presumption that sufficient proof has been made to prevail on the issue, absent competent evidence to the contrary. If rebutted, the presumption disappears, and the party with the benefit of the presumption retains the burden of persuasion on the issue. *State v. Hagerman Water Right Owners*, 130 Idaho 736, 947 P.2d 409, 418 (1997).

III. FINDINGS OF FACT ON ELEMENTS

A. Ownership of the Water Right

These water rights were claimed by the United States Bureau of Land Management. IDWR investigated the ownership element of these rights. The *Director's Report* concluded that the owner of these water rights is the U.S. B.L.M. There are no objections to ownership. There is "substantial evidence" that the United States is the owner of these rights.

B. Priority Date

These water rights were claimed by the United States with early priority dates. IDWR investigated, and the *Director's Report* concluded that the priority date for these rights is January 1, 1879. The *Standard Forms 5* filed for each of these rights lists priority dates later than 1879. Both the claimant and IDWR signed the *Standard Forms 5*. Therefore, there is "substantial evidence" that the priority date for these rights is the later date contained in the *Standard Forms 5*.

C. Source

The claims assert various sources for these water rights. IDWR investigated the source element for each right. The *Director's Report* concluded that the sources for these rights were as claimed. No objections were filed to the source element. There is "substantial evidence" that the sources are as contained in the *Director's Report*.

D. Quantity

The quantity claimed for these water rights is 13,000 gallons or less per day. The *Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims* states, "Based upon the field verification and my review of the field investigation documents, there is sufficient water at this site for consumptive use by livestock." *Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims*, p.7, ¶ 7.; *Amended Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims*, p.7, ¶ 7.; *Affidavit of Lisa A. Jaro*, p.7, ¶ 7.

In addition, IDWR investigated the quantity element for each right and submitted a *Director's Report* with specific quantities determined for each water right. There is "substantial evidence" of the quantity for each right.

E. Point of Diversion

Each claim asserted a point of diversion that was expressed with a legal description. In addition, IDWR investigated the point of diversion element for each right under the state basis and submitted a *Director's Report*. The *Director's Report* for these rights concluded that the points of diversion were as claimed. There is "substantial evidence" of the points of diversion for each right.

F. Purpose of Use

The claimed purpose of use for each of these rights is "stockwater." The United States asserted that "Based upon the field verification and my review of the field investigation documents, there is sufficient water at this site for consumptive use by livestock." *Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims*, p.7, ¶ 7.; *Amended Affidavit of Floyd P. Dewitt in Support of Basin 37 BLM PWR 107 Water Right Claims*, p.7, ¶ 7.; *Affidavit of Lisa A. Jaro*, p.7, ¶ 07. In addition, IDWR investigated these rights and concluded that purpose of use is "stockwater." There is "substantial evidence" that the purpose of use is "stockwater."

G. Period of Use

The claimed period of use for each of these stockwater rights is January first to December 31st of each year. IDWR investigated the period of use element and submitted a *Director's Report* that concluded that period of use was year round. There is "substantial evidence" of the period of use for each water right.

H. Place of Use

Each claim asserted a place of use that was described by a legal description. In addition, IDWR investigated these rights under the state basis. The *Director's Report* for these rights concluded that the places of use were as claimed. There is "substantial evidence" of the place of use for each water right.

IV. CONCLUSION

Therefore, based on the files for these subcases and the record contained therein, IT IS RECOMMENDED that these water rights be **decreed** with the elements set forth in the attached *Special Master's Recommendations for Partial Decree*.

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance
with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a
final judgment and that the court has and does hereby direct that the above judgment or order shall be a final
judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.
