_____	)	SPECIAL MASTER REPORT

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 12 (IDWR Basin 47)* on August 14, 1998. The Director recommended all of the above 28 claims to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from various springs in Twin Falls County for year-'round stockwater use with a priority date of January 1, 1875, based on beneficial use. The Director also noted under priority date:

4/17/1926 Claimed under federal reserved water right. This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Reserve 107.

On February 10, 1999, the State of Idaho filed an *Objection* to priority date for each claim: "If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934." The State also alleged that the water rights should not exist.

On May 12, 2003, the United States and the State filed a *Joint Motion to Vacate Hearing on Dispositive Motions and to Proceed with Hearing under I.C. § 42-1411(a)* in multiple subcases, including the above 28 subcases. On February 24, 2004, the State filed its *Report on*

Status of Idaho's Objections for Selected Subcases in Basins 35 and 47. The Report noted that the State's objections in 27 of the above 28 subcases have been withdrawn.¹

On March 12, 2004, the United States filed an *Affidavit of Eric V. Mayes* in 34 subcases, including the above 28 subcases.² Mr. Mayes, a natural resource specialist with the USDI / BLM in its Burley field office, stated that the claims are: 1) located on unreserved federal public domain as of April 17, 1926; 2) the lands currently remain under Department of Interior administration; 3) the water sources were confirmed by field investigation; 4) there is sufficient surface water at the sites for consumption by livestock; and 5) the sources of water are springs located at the claimed points of diversion and places of use.

Conclusions of Law

1. The *Affidavit of Eric V. Mayes* satisfies the requirements of I.C. §42-1411A for the United States to demonstrate a *prima facie* case of the existence of the water rights established under federal law; and
2. The United States of America is entitled to partial decrees adjudicating federal reserved water rights for the above 28 claims as described in the attached *Special Master Recommendations for Partial Decrees for Water Rights*.

DATED March 24, 2004.

Special Master
Snake River Basin Adjudication

¹ Subcase 47-16132 was not included in the State's *Report* because a *Partial Decree* in that subcase was set aside on January 12, 2004, based on the parties' *Stipulation* that a state-law based priority date was erroneous and that the subcase should proceed in accordance with I.C. § 42-1411A (a water right established under federal law).

² Mr. Mayes' *Affidavit* included subcases not yet ready for reporting by the Special Master:

47-16062 – the *Affidavit* states the priority date should be November 7, 1930, while the State's February 24, 2004 *Report* says it should be June 28, 1934. The subcase remains at issue.

47-16082, 47-16084 and 47-16086 – the *Affidavit* states the priority dates should be December 16, 1895 (state-law based), while the State's *Report* says the priority date for 47-16082 should be June 28, 1934. That suggests that the State would assert the same priority date for 47-16084 and 47-16086. Hence, the subcases remain at issue.

47-16114 and 47-16116 – the State's *Report* says that its objections continue.
