Diversion Description

DITCH. ALSO, PORTABLE PUMP INTO SPRINKLER SYSTEM AT VARIOUS PTS. Diversion from stream into a 2' x 2' ditch. Water is running at 0.50 feet deep at a slope of approximately 0.5%. Head structure is a combination of sand bags, boulders, old tin/corrugated metal, and an assortment of old carpet, rubber raft, and plastic tarp. Placed GPS ID tag on pine tree @ base of trunk. Pine tree is next to access road just above the POD. Most trees in the area are a variety of juniper and birch. Not many other pine trees in the area.

Assumptions

Slope of approximately 0.5%.

MEMO

9 December 2002

To: The file of 29-11681 (Andrus)

From: A. B. Ruberry

Subject: Intent of filing and recommendation

Today, I spoke to Jim Andrus regarding the purpose and intent of the above referenced claim to a water right. The discussion was centered around the purpose of the claim and how I could recommend it.

The first matter discussed was that of the advice extended by Andrus' attorney, Mr Jerry Rigby. Apparently, Mr. Rigby has advised them not to amend the claim for outside season of use. In Mr. Rigby's opinion, thereby voiding the opportunity of a successful recommendation. I am not sure I fully understand the discussion or logic behind this matter. IDWR legal staff is communicating with Mr. Rigby to discuss this detail.

The Filed Claim

29-11681 was filed as a Beneficial Use claim for outside season of use, from 9/15 to 4/15. This manner of filing the extended season of use is highly unusual; most are filed as 4/1 to 10/31. Thereby overlapping the decreed season of 4/15 to 9/15, as set forth in Union Grain and Elevator vs McCammon Ditch Co, (final amendment) August 6, 1932. Also claimed are 6.96 cfs, and 348 acres (based presumably on 0.02 cfs/ac), with a Priority Date of July 1, 1902.

Assessment of the claim is such that the elements are inconsistent with usual claim standards. For example, the Season of Use should be 4/1 to 10/31 (IDWR standard irrigation season for this area for beneficial use of irrigation), then, the Priority Date cannot be behind the 1932 decree date (earliest is August 7, 1932) and must be accompanied by supporting evidence; Andrus' have submitted several statements which tend to support the early and later use. While it is well understood, and, recognized by IDWR, this outside season use of irrigation practice has 'always' been the practice in the area, but the fact remains the decree is specific in defining the season of use as 4/15 to 9/15. Andrus' bought the ranch in 1959 and have every year since used the water, as available, for pre and post season of use irrigation as well as livestock watering. Livestock watering is not a claimed element of this claim, but should be. Irrigated acres are claimed as 348. Calculated GIS acres are 327.4. The claimed Place of Use acres have a few minor inconsistencies where some tracts are not owner by Andrus'.

The Recommendation

I explained to Jim Andrus that the claim elements could only be recommended as follows: August 7, 1932 priority date, one day after the Decree date at best, 327.4 acres (correcting ownership of certain parcels) with 6.55 cfs (@ 0.02 cfs/ ac.). Further, I explained that I would recommend the 29-11681 claim as above and mail them the Preliminary Director's Reports early in hopes of offsetting any unsettled or questioned issues.

I further asked Jim to write a chronological history, with Ken, of the ranch and the development of the current system and usage of the water. He will undertake this effort.

Dave,

Do you think we should talk to Jerry directly and find out his thoughts? It might save us some objection battles later on. I would like to find out what he's thinking.

To: McHugh, Candice
Cc: Tuthill, Dave
Subject: B29 Ext SOU

Just got off the phone with Ken Andrus. He and his brother are claimants in B29. My discussion was that Mr. Andrus has a claim that appears to claim the extended season of use (claim filed 4/24/1990), he was a little ahead of the curve.

I suggested he allow me to amend this claim to correct the priority date from 1902 to 1932 (it won't realize a 1902 date anyway) and correct the Extended Season of Use per our standard and directive; 4/1 to 10/31. He tells me he has been advised by Jerry Rigby NOT to allow IDWR to file this claim in accordance with our standard; 1932, and 4/1-10/31.

You might want to contact Mr. Rigby and jerk his chain.

8/29/01 Met w/ Jim and Kenneth Andrews. Discussed Agreed.
Process and time tables. Also discussed historic use of
Rts (Deerwood) and now Bll claims (the Contractor will BS along
to do GPS, Photo, MEASUREMENTS, etc. ...)

Toured PODs w/ Jim. Far upper is the only one used
now which goes to a pipeline for sprinkler irrigation
both East and West over rolling terrain. Jim also
showed me a POD to a ditch which runs off the creek
to the East (not used since $\approx$ 1987 or so) will add to
Amendment of claims and Bll claim. GPS'd & photo'd both

POD's

Also discussed the purchase of — CUTLER DITCH RIGHT(S)
which they claim are old Indian Rts dating to 1868, thus
according to the Ft. Bridger Treaty of 1868. Some references
to 29-0247 and 29-0248 (not included in the 1164E Decree,
circa 1932). MORE RESEARCH is needed on this matter.

Apparently, there is some connection to the Cutler Ditch Rts.

which were supposedly Tx'd down river to McCammon. I advised
they contact Atty Ray Rishy (their choice), to explain the situation,
if favorable, contact IDWR for a Temp Tx until a PD is
issued on Rts on E.B.S. OR THEN FILE A FORMAL Tx TO MOVE
THE 1868 Rts where they need them — ALL THEY WANT IS THE
PRIORITY DATE OF THE 1868 Rts.

Re: Water District 29, Portneuf River

Dear Mr. Green:

In your telephone call of September 14, 1988, you stated that the irrigation season in Water District 29 under the Portneuf River decree ends on September 15. You asked me what action, if any, should be taken by the watermaster after that date.

The historical practice on the Portneuf is for the watermaster to stop delivering water rights under the decree on September 15. After that date it has been the practice of the waterusers to divert water as needed irrespective of the priorities under the decree.

It is the normal duty of a watermaster to delivery water rights on a stream in accordance with the terms of the applicable decrees. Consistent with court decree, it has been the long-standing practice on the Portneuf for the formal irrigation season to end on September 15 and for the watermaster to discontinue delivering irrigation water rights after that date. I do not find it appropriate to order the watermaster to alter that longstanding practice this year.

Waterusers who have historically diverted water and put it to beneficial use after September 15 each year may have established legal rights to continue that practice. The extent of any such rights will be determined in the pending Snake River basin water rights adjudication.

I hope this letter has adequately answered your question.

Sincerely,

R. KEITH HIGGINSON
Director

No. A29-11681

Lava Hot Springs, Idaho
28 March 1995

My family moved from Utah and purchased this property in 1959. The water right has an interesting history. The property was once a part of the Fort Hall Indian Reservation. Tradition has it and it has been told to us by neighbors who are now dead that an Indian named Bob Smith was given this property by his commanding officer in payment for some scouting services he had performed for the army. Mr. Smith irrigated some of the land along Bob Smith Creek; he raised cattle and horses. Subsequently the government did not recognize his (Mr. Smith's) right to the land, but he wouldn't move off. One winter Mr. Smith went to the Washakie Reservation near Portage, Utah. He contracted pneumonia and died. Some of his family also died there; the remainder of them never returned.

In 1902 the land was opened for homesteading and has a 1902 decreed water right.

Bob Smith's grandson, Chester Ottogary visited our place about 1976 and confirmed the above story and said he was going to establish an Indian water right for the property. He never did and is also now deceased.

Carrol Willmore, a neighbor who died in 1993 at age 85 stated on several occasions that he knew and worked with Hen Monroe and Bill Godfrey, the three of them all being employed by Dave Monroe, the man who owned and homesteaded this property, that these men conversed with common knowledge about the Indians irrigating this property prior to 1902.

Because of the water right date recognized by the Idaho Department of Water Resources rather than the traditional use right established by Bob Smith, it is necessary to irrigate and use water on this property outside of the normal irrigation season of Apr. 15 to Sept. 15. This is a common practice of land owners along the Portneuf river or its tributaries, Bob Smith ^{Creek} being one of those tributaries. This has been the case on this property since 1902 when it was homesteaded by Dave Monroe.

NOV 14 1990

Lava Hot Springs, Idaho
- 5 Mar - 1995

On most years and especially during drought years we use the water from Bot Smith Creek for irrigation purposes both before the regular irrigation season starts on April 15 in this area and after the irrigation season ends on Sept. 15th. We have done this since my family acquired this farm in 1959. Many neighbors also do the same especially those with later diked water rights.

Dave Monroe (Martin) homesteaded this farm in 1902. I saw and talked with him before he died (about 1960-62) at Oro, Idaho. He verified to me and my father that he used the water any time of the year he wanted regardless of the designated irrigation season. Some people even talk of irrigating the snow off from the fields on this farm.

28 March 1995

I Wayne Avery know that Andruses Have used Water for Irrigations before and after ^{the} Irrigation season. This is a common practice in this area for people with a late Water right.

It is my understanding that this was a practice that has went on since the ground was ^{first} irrigated.

Lava Hot Springs Idaho
April 9, 1990

Idaho State Water
Resources Board:

I am writing this as a member
of The Lava Irrigation Co., on the
Sunny Side Ditch as it is commonly
known; and also as a member of
the Kidd family. We are the only
family to still own our original
homesteads. All the rest have changed
ownership times without number.
I am the oldest living person to have
known constantly about the
irrigation situation in this
community.

I went to college with Elmo
Hjggenson, in Pocatello in 1929 and
1930. He was your hydrologist
and I believe his son is your
hydrologist now.

Our project is small, only slightly
more than a thousand acres in
the beginning. Highway 30 has

MICROFILMED

NOV 16 1992

Taken away some of our land.
There was plenty of water, for
everyone in the beginning. They
turned what water they needed
into our canal and turned it
back into the river when they were
through using it. They always tried
to keep some water in the canal
through the winters for livestock.
Sheep men would buy hay from the
farmers and feed the sheep in the
fields and have canal water
for the sheep to drink.

They built the reservoir at
Chesterfield, they tried turning the
stored water down the Portneuf
River, which would not carry the
extra water. They paid damages
for several years to farmers
downstream for flooding the fields.
They then built the long outlet canal
to bypass the farms. In the beginning
the canal would not carry the

water, but the canal eroded until we have the bad situation we have today.

The McCammon Mill sued to get its water, and they won the lawsuit, and a decree was handed down about the various water rights. Since then, the McCammon Mill sold its water right, I believe to either the McCammon Canal Co. or to some of its members.

Ever since, our project has had less and less water, so we have tried to get water into our canal before the irrigation season began, and also after the irrigation season had ended, to soak up our fields for the next season. I personally have watered fields when several inches of snow were on the ground. I have done this all through my life time. Nobody has ever tried to stop us, and I feel that

we have established a right to do this.

Now, companies have planned to build hydropower plants in the river, and they intend to demand the entire river flow when the irrigation season ends until the spring when the season begins again. The way things are shaping up, we will have scarcely any water at all. They should not be allowed to do this to us. The plants are not needed at all, and the Federal Government should never have approved their building.

Sincerely

P.O. Box 137 William Kild

Residing at LAWA HOT SPRINGS, Idaho
Commission Expires LIFETIME

TO WHOM IT MAY CONCERN:

I, Fred G. Walker, would like to say, I was born and raised on the Walker Ranch located near Lava Hot Springs, Idaho, and lived there until February 1953. I was also the Ditch Checker for one summer while living there. There was plenty of water for all of the ranches in the area before the Chesterfield Dam was constructed, no one in the area had any water problem until after the construction of that Dam. Then the situation seemed to change a very great deal. The Jannyside Ditch Company had plenty of water for all users at the beginning as well as at the ending of the season. They all irrigated and used the water all season until it froze up in the winter. We had all the water for all the ranchers in the area all season long. Everyone had all the water needed to irrigate their land from early in the spring until it all froze up with the winter. My folks before me had plenty and I had plenty for the same acres and the same farm from early spring until it froze up with the winter.

APPENDAGE TO THE FILING OF WATER OF Kenneth, Colleen, & Jim Andrus

Our present decreed water rights are jeopardized by

1. Illegal loss free transportation of storage water in the river channel. We ask the adjudication process to correct this situation by requiring the users of the storage water to stand the loss or require all the water users in the river district to share in the loss on a percentage basis according to the cubic feet of water they have decreed to them.
2. Many years after established use rights and decreed rights numerous wells have been allowed in the upper basin area, draining the aquifer. We ask an in depth study be made to determine the affect on the river flow before a decision is made.

Historically the amount of our water has been cut down during the irrigation season because there is not enough water to fill all the rights. Of necessity we have used the water at any time during the non irrigating season in any amount needed first come first serve down the river. We request this use right recognized and established as a legitimate water right.
