A *Master's Report and Recommendation* was issued for the above subcases on November 4, 2002. That *Master's Report and Recommendation* is hereby amended to include the following:

RECOMMENDATION FOR PLACE OF USE DESCRIPTION USING DIGITAL BOUNDARY

Effective July 1, 2002, the Idaho Legislature approved the use of a Geographic Information system (GIS) for describing the place of use (digital boundary) for water rights meeting certain criteria. See I.C. §§ 42-219(2) and 42-1411(2)(h). The GIS mapping technology allows the geographic area encompassing the place of use for a water right to be particularly identified and visually displayed in a map overlay format through the aid of computer technology.

Digital Boundary mapping is appropriate for water rights that are for an irrigation purpose of use and also meet one of the following criteria: (1) used in conjunction with an irrigation project where the canals constructed cover an area of twenty-five thousand (25,000) acres or more; (2) the place of use for the water rights is located within an irrigation district organized pursuant to the laws of the state of Idaho; or (3) the water rights are for an irrigation project developed by an association, company, corporation or the United States to divert and deliver or distribute surface water under any annual charge or rental for beneficial use by more than five (5) water users in an area less than twenty-five thousand (25,000) acres.

The above water rights meet one of the above-stated criteria.¹ Therefore IT IS FURTHER

In incorporating a digital boundary into a partial decree, the electronic or digital data is what is actually decreed as opposed to the visually displayed map ultimately generated from the data. The data is stored on a CD-ROM. The data on the CD-ROM is incorporated by reference into the partial decree. Duplicate originals of the CD-ROM will be issued. The SRBA District Court retains on original together with the original partial decree, and the Idaho Department of Water Resources (IDWR) retains the other original. Upon request, the claimant can obtain a copy of the CD-ROM from IDWR at no cost, although GIS software will still be required to access the data. Subsequent administrative changes to the place of use will also be stored in a digital format and kept on file and maintained by IDWR. IDWR will maintain all computer software and/or hardware necessary for reducing the data G:\65MRR\65-3218 et al.doc

RECOMMENDED that the above water rights be decreed using a digital boundary with the partial decree containing the following additional language as set forth in the attached Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b):

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. §42-202B(2)(2003) and authorized pursuant to I.C. § 42-1411(2)(h)(2003). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.
