**NOTICE OF ERROR
REPLY**

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS:

Water right number: 23-20B

STEPHEN J MC GRATH
PO BOX 50731
IDAHO FALLS ID 83405-0731
Telephone Number: (208)524-0731

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

The total combined diversion rate is less than the total of the component water rights resulting in a net loss of decreed water rights.

2. Describe the changes you wish to make in the proposed recommendation:
Increase total combined diversion rate to 1.0 cfs for Right Nos.:

23-00019D; 23-00020B; 23-00047D; and

Increase total combined diversion rate to 2.0 cfs when above rights are used in conjunction with Right No. 23-00093B.

3. Give a brief explanation as to why you disagree with these portions:

Our water rights are decreed rights by previous Idaho court decrees. The proposed conditions result in a taking without compensation by the State of Idaho, which is prohibited by both the United States Constitution and the Constitution of the State of Idaho.

 I AGREE with this proposed recommendation: no changes need to be made.

MEMORANDUM

TO: FILES 23-00019A/00020/00047B/00093

FROM: PAM SKAGGS²⁸/STATE OFFICE

SUBJECT: TRANSFER 4851

DATE: March 17, 1998

=====

Transfer 4851 changes the point of diversion under a portion of Rights 23-00019A (C & D), 23-00020 (A & B), 23-00047B (C & D), and 23-00093 (A & B), splitting each right.

Review of the recorded rights show that the transfer also represents a change in place of use to the historically irrigated land. The place of use has been modified over the years through unrecorded transfer to include the 45 acres under the proposed place of use. No physical change occurs.

The applicant is the new owner of this portion of the ranch and wants to add two separate points of diversion; a diversion ditch to serve the west side of the property and a pump to serve the east side of the property. The creek bisects the property in a north south direction.

Recommended conditions include watermaster control, measuring devices and lockable controlling works, irrigation overlap, multiple points of diversion, combined right conditions, and standard transfer conditions.
