	) RECOMMENDATION

Findings of Fact

The Director of the Idaho Department of Water Resources filed his *Director's Report for Domestic and Stockwater, Reporting Area 12 (IDWR Basin 47)* on August 14, 1998. The Director recommended claim 47-15549 to the United States of America, Department of Interior, Bureau of Land Management, Idaho State Office, 1387 S. Vinnell Way, Boise, Idaho, 83709-1657, for .02 cfs from Shack Creek in Twin Falls County for year-'round instream stockwater use with a priority date of January 1, 1875, based on beneficial use. The Director also noted under priority date: "4/17/1926 Claimed under federal reserved water right. This water right is also claimed based on federal law with an April 17, 1926, date of priority pursuant to an Executive Order signed the same date and known as Public Reserve 107."

On February 10, 1999, the State of Idaho filed an *Objection* to priority date: "If this water right exists, the State Law based portion of this right should have a priority date no earlier than June 28, 1934." The State also alleged that the water right should not exist.

On May 12, 2003, the United States and the State filed a *Joint Motion to Vacate Hearing on Dispositive Motions and to Proceed with Hearing under I.C. § 42-1411(A)* in multiple subcases, including subcase 47-15549. On February 24, 2004, the State filed its *Report on Status of Idaho's Objections for Selected Subcases in Basins 35 and 47*. The *Report* noted in subcase 47-15549: "Objection continues to instream flow under PWR 28. The legal description contains land not within the legal description within PWR 28."

On April 8, 2004, the United States filed an *Affidavit of John R. Ash* in 119 subcases (47-15285, *et al.*), including subcase 47-15549. Mr. Ash, a natural resource specialist with the USDI / BLM in the Jarbidge field office located in Twin Falls, stated the following in several subcases, including 47-15549:

As these subcases describe claims to streams, the lands described in these subcases would only be subject to a federal reserve pursuant to **PWR 28**. This reservation is not limited to certain water source types. As these subcases do not describe springs or waterholes, PWR 107 would not apply to these subcases. . . . I was able to determine that those subcases were also located on unreserved deferral public domain as of May 31, 1915, which was the date of PWR 28.

. . . .
Upon closer examination of the BLM Claim file, the MTP [Master Title Plats], and the HI [Historical Indexes], it was discovered that this instream stockwater claim [47-15549] is partially subject to a federal reserve pursuant to **PWR 28** and that the claim should be appropriately split into two “new” separate claims: one based on state law and the other based upon state and federal law. The federal claim basis is claimed pursuant to an Executive Order, dated May 15, 1915, and known as **Public Water Reserve 28**. The state basis is based on beneficial use with a priority date of June 28, 1934.

On June 10, 2004, the United States and the State, with IDWR’s concurrence, filed *Standard Form 5’s* agreeing to split 47-15549 into 47-17115 (state law) and 47-17116 (PWR 28). An I.C. § 42-1411A hearing was held by telephone on July 1, 2004. R. Lee Leininger appeared for the United States, along with Frederic W. Price; David J. Barber appeared for the State of Idaho; and Nicholas B. Spencer appeared for IDWR.

Conclusions of Law

1. The United States of America is entitled to partial decrees adjudicating water rights for subcases 47-17115 and 47-17116 as described in the *SF-5’s* and the attached *Special Master Recommendations for Partial Decrees for Water Rights 47-17115 and 47-17116*, and
2. The United States is **not** entitled to a partial decree for 47-15549, the claim having been split into 47-17115 and 47-17116.

Recommendation

THEREFORE, IT IS RECOMMENDED that claim 47-15549 **not** be decreed and that the claim should be dismissed with prejudice.
