1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Quantity; purpose and period of use

2. Describe the changes you wish to make in the proposed recommendation:

Our water right states that we have 3.910 CFS not 3.90
Our water right does not list .406 AFG or that 1.58 cfs is reserved for conveyances less

back
see attached - not enough room for comments

@ or that it does not exceed .02 cfs / acre not more than 3.5 afa / acre

3. Give a brief explanation as to why you disagree with these portions:

We believe your recommendation should read the same as the original H₂O right.

☐ I AGREE with this proposed recommendation: no changes need to be made.

Additional comments: I couldn't read the red lettering on the enclosed map - Font was too small & letters/numbers bled together, so don't know if it is accurate.

Also, we have not received anything on our other water right on the Lemhi River (74-01606C).

**** This was sent to the wrong address.*

2. ① Quantity should read 3.910 CFS

② delete 406.00 AFY - I don't find this in my original H₂O right

- also delete that 1.58 cfs is for conveyance losses. I haven't found that in my copy of the H₂O right

③ delete the no more than .02 cfs or 3.5 af/a/acre - I don't see that in our original water right
