Renumbered Notice of Claim to a Water Right No. 63-31971

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim represents a split of the claim filed by a previous owner during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience, as we have had several water right changes to process. Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Re: Split of SRBA claim 63-07278

Ok Denise, here is the deal.

This claim was filed based on a permit so the claim shows a greater diversion rate and acreage than what was licensed. The permit was licensed after the SRBA claim was filed. Thus the claim needs to be amended as the license approval automatically amends the claim.

✓DB

Second, a change of ownership was filed. I checked the paperwork and all looks well. So the claim needs to be split. I would give it two new numbers and if you look at Terry Scanlan's memo, I agree with his findings.

Thus Splits:

Quarter Circle DJ Ranches:

T4N, R1W, S11, NENE 23 acres

0.46 cfs irr

103.5 afa irr

0.01 cfs stock

2 afa stock

63-31970

SAF:

T4N, R1W, S1, SWSW 38 acres

SESW 37 acres

1.5 cfs irr

337.5 afa irr

0.03 cfs irr

6 afa stock

63-31971

Same POD for both of them.

I have GIS maps made so you don't need to worry about that.

Thanks,

Craig

Subject: Change of Ownership for 63-7278

Hello Karan,

I received a Change of Ownership for 63-07278 from Quarter Circle DJ Ranch Co to SAF, LLC

I will keep it in a folder in my office, but just thought I would let you know I received it. This looks like a split in the license where part of the irrigated ground changes to SAF, but the remaining stays in Quarter Circle DJ Ranch Co.

Anyway, I will probably need to look at the file to review it but there isn't a rush.

But... if you need the contact phone number to SAF, it is 386-9196. And it looks like Foad Roghani, Managing Member is your contact.

Later,

Craig

Subject: Water Right Change of Ownership Form

Dear Sue:

On behalf of SAF LLC, I pleased to submit the enclosed water right change of ownership form for a 75-acre portion of irrigation water right 63-7278. SAF LLC recently purchased an approximate 80-acre parcel consisting of the South $\frac{1}{2}$ of the Southwest $\frac{1}{4}$ of Section 1, Township 4 North, Range 1 West. The lands include a 75-acre portion of the place of use for water right license 63-7278. Ownership of the remaining 23 acres of water right 63-7278 will remain with Quarter Circle DJ Ranch.

The license authorizes diversion rates of 1.96 cfs for irrigation of 98 acres and 0.04 cfs for stockwater. The water right will be split proportionally with irrigated acres. Therefore, ownership of a 75/98 portion (1.50 cfs for irrigation of 75 acres and 0.03 cfs for stockwater) should be transferred to SAF LLC.

Please contact me with any questions.

Sincerely,

Terry M. Scanlan, P.E.

SUBJECT: Certified Water Measurement - Permit #63-7278

The flow from the well listed under permit 63-7278 was measured by me personally on October 5, 1984. The well is 420 feet deep and equipped with a VM Diesel engine, serial #11541624 rated at 96 brake horsepower. The well is additionally equipped with a Layne Bowler pump head and a Randolph right angle drive, model F30. The discharge pipe is 8 inches in diameter and equipped with a new 8" Badger meter rated in gallons.

The well and pump was operated with the owner and myself present and measured after stabilization of the pumping level in the well. Water is discharged into a concrete ditch running north and south and is not pressurized at the well head. Production from the well was measured at 1,550 gallons per minute or 3.45 cubic feet per second.

If any questions arise regarding this measurement, please contact me directly.
