including the dates of any changes or enlargements in use, the dimensions of the diversion works as
constructed and as enlarged and the depth of each well.

Our water system consists of a collective drainfield, a collection tank, and a pipe that runs about 3/4 mile downhill to our house. There is an earth dam that runs across the gulch to help keep water in the collection area to provide us a constant supply. In wet years, the water is visible at the surface, and may run for a few hundred feet. In dry years, the water is only subsurface. The areas where the water comes to the surface most frequently, are fenced. A dirt road provides access from our house to the dam and collection area.

If your answer is No, describe in Remarks below the authority you have to claim this water right.

13. Describe any other water rights used at the same place and for the same purposes as described above.

We also have a domestic well on this property.

or None ()

14. Remarks:

This water right has been filed on before.
Once in a while the water actually has streamflow, but
does not leave 4N, 1E, 501. Usually it is a few
pools of water where it comes up as springs. And sometimes
it is not visible on the surface.
