CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 01.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.
7. Unperforated well casing shall be retained above the first confining layer to prevent interference with shallow wells and recharge to the river.
8. No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the redirection pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.
9. Totalizing measuring devices shall be maintained at the exchange wells and redirection pumps from the Teton River.

WATER RIGHT NO. 22-07205

CONDITIONS/REMARKS:

10. The exchange wells must inject water into the Teton River whenever water is being diverted from the river under this license, and the injection must continue after the diversion from the Teton River ceases until the water not diverted reaches the point of injection.
11. The power supply to the exchange wells cannot be contracted under the power company's interruptable rules unless the power company agrees to notify the right holder at least 24 hours prior to the time the power service is terminated.
12. The rate of rediversion from the Teton River shall not exceed the rate of injection into the Teton River from the exchange wells.
13. This right is limited to the irrigation of 2200 acres in the place of use described above in a single irrigation season.
